REPORT OF THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
Washington, D. C., November 1, 1893.

SIR: In compliance with the instructions contained in your letter of September 9, 1893, I have the honor to submit the following report of the operations of the Bureau of Internal Revenue for the fiscal year ended June 30, 1893, and also certain additional information relating to the collections made and work performed during the first three months of the current fiscal year.

The titles of the tables* found at the close of the bound volume of

this report are as follows:

Table A, showing the receipts from each specific source of internal revenue and the amounts refunded in each collection district, State, and Territory of the United States for the fiscal year ended June 30, 1893.

Table B, showing the number and value of stamps for special taxes, manufactured tobacco, snuff, cigars, cigarettes, distilled spirits, fortified sweet wine, fortified wine for export, fermented liquors, oleomargarine, and opium manufactured for smoking purposes; also the number of the different kinds of certificates of registry, with the number and value of documentary stamps used for validating unstamped instruments, issued to collectors of internal revenue during the fiscal year ended June 30, 1893.

Table C, showing the percentages of receipts from the several general sources of internal revenue now taxable in each State and Territory of the United States to the aggregate receipts from the same sources, by

fiscal years, from July 1, 1863, to June 30, 1893.

Table D, showing the aggregate receipts of internal revenue in each collection district, State, and Territory of the United States, by fiscal years, from September 1, 1862, to June 30, 1893.

Table E, showing the receipts from specific and general sources of internal revenue, by fiscal years, from September 1, 1862, to June 30,

1893.

Table F, showing the ratio of receipts from specific sources of internal revenue to the aggregate receipts of the same, by fiscal years, from

July 1, 1863, to June 30, 1893.

Table G, showing the returns of distilled spirits, fermented liquors, manufactured tobacco, snuff, cigars, and cigarettes, under the several acts of legislation and by fiscal years, from September 1, 1862, to June 30, 1893; also statement of the production of distilled spirits and fermented liquors in the several States and Territories, by fiscal years, from July 1, 1877, to June 30, 1893.

^{*}The tables here referred to are omitted from this report.

Table H, showing the receipts from special taxes in the several States and Territories for the twelve months ended June 30, 1893.

Table I. Abstract of reports of district attorneys concerning suits and prosecutions under the internal-revenue laws during the fiscal year ended June 30, 1893.

Table K. Abstract of seizures of property for violation of internal-

revenue laws during the fiscal year ended June 30, 1893.

Table L, showing the collections, expenses, and percentage cost of collection in the several collection districts during the fiscal years ended June 30, 1892 and 1893.

COLLECTIONS FOR THE CURRENT FISCAL YEAR.

I estimate that the total receipts from all sources of internal revenue for the current fiscal year will be \$150,000,000.

RECEIPTS FOR THE PAST EIGHT FISCAL YEARS.

Fiscal year ended—	1		
June 30, 1893	 		\$161,004,989.67

. ,	•		, ,

COLLECTIONS FOR THE FISCAL YEAR ENDED JUNE 30, 1893.

In the last annual report of the Commissioner of Internal Revenue my predecessor estimated that the receipts of this bureau for the fiscal year ended June 30, 1893, would reach the sum of \$165,000,000. Owing to the general depression of business throughout the country I regret to say this estimate was not realized, the actual receipts from all sources for the fiscal year above named being \$161,004,989.67.

The following tables exhibit in detail the amount of internal revenue collected during the fiscal year ended June 30, 1893, the sources from which the revenue was derived, the total sum collected in each district.

State, and Territory, the cost of collecting, etc.:

COST OF COLLECTION.

The cost of collection for the past fiscal year, distributed among the different items of appropriation, was approximately as follows:

different items of appropriation, was approximately as following	/ 11 is •
For salaries and expenses of collectors, including pay of deputy collectors, clerks, etc., and including expenses incident to enforcing the provisions of law taxing oleomargarine, and the provisions of the act of October 1, 1891, relating to the payment of bounty on	•
sngarsngar.	\$1, 875, 774, 29
For salaries and expenses of revenue agents, surveyors of distilleries,	
gaugers, storekeepers, and miscellaneous expenses	2, 101, 992. 40
For salaries and expenses of sugar inspectors	30, 260. 93
For paper for internal-revenue stamps	57, 258. 46
For expenses of detecting and punishing violations of internal-revenue laws. For salaries of officers, clerks, and employes in the office of Commis-	21 508 65.
sioner of Internal Revenue	271, 530. 90
Total expended	4, 358, 325, 63
Deduct expenses relating exclusively to the payment of bounty on sugar, as follows:	1, 550, 525, 65
Additional deputies and clerks	
Polariscopes and articles used in making analyses of	
sugar, etc	,
sugar, etc	
Additional clerks in office of Commissioner	
9,210,00	138, 586.27
Leaving the net cost of collection	4. 219. 739. 36

The percentage of the cost of collection is 2.62 per cent. The expenses for the previous fiscal year were \$4,315,046.26, being 2.80 per cent of the collections, so that, while the collections during the fiscal year were in excess of those of the previous year, the percentage of cost of collection has decreased.

The amount appropriated for salaries and expenses of agents, gaugers, storekeepers, etc., was, including a deficiency appropriation, \$2,100,000.00, while owing to the increased number of distilleries in operation, resulting in an increase in the amount of taxes collected from spirits of nearly \$4,000,000 as compared with the previous year, as shown in this report, the actual expenses for this purpose were \$1,992.40 more than the amount appropriated, as shown by unpaid accounts now on file, and for which an additional appropriation will be needed.

MISCELLANEOUS EXPENSES.

The act of Congress approved August 7, 1882, making provision for sundry civil expenses for the year ending June 30, 1883, required the Commissioner of Internal Revenue to make a detailed statement of all miscellaneous expenditures in the Bureau of Internal Revenue for which appropriation was made in that act. In accordance with this requirement, I submit the following detailed statement of miscellaneous expenses incurred:

expenses fucurred:	
Locks for use at distilleries	\$2,732.77
Hydrometers used in gauging spirits	7, 019. 97
Weighing beams for use in weighing spirits	3,395.75
Expenses of testing spirits weighed, labor, etc	23.21
Steel letters for numbering stills	1.00
Saccharometers, polariscopes, stills, and chemicals for testing sweet-wine	
samples	843. 15
Stationery for internal-revenue officers	358. 75
The Internal Revenue Record supplied to internal revenue offices	2,200.02
The Federal Reporter for the office of the Commissioner of Internal Rev-	
enue	17.50
Compensation of United States attorneys in internal-revenue cases allowed	
under sections 827 and 838, Revised Statutes	1,710.00
Traveling expenses of clerks under special orders of the Department	237. 15
Expenses of seizures and sales by collectors	570.48
m-4-1	10 100 55
Total	19, 109, 75

ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.

I estimate the expenses of the internal revenue service for the fiscal year ending June 30, 1895, as follows:

•	, , ,	
1	or salaries and expenses of collectors, including pay of deputy collectors and clerks, and expense of enforcing the act of August 2, 1886, taxing oleomargarine, and the act of August 4, 1886, imposing on the Govern-	
	ment the expense of the inspection of tobacco exported, and the act of	
	October 1, 1890, providing for payment of a bounty on sugar, including miscellaneous expenses incident to ascertaining and paying said	
	bounty	\$1 9 00 000`
r	or salaries and expenses of twenty revenue agents, for surveyors, for	φ1, 200, 000
1	fees and expenses of gaugers, for salaries of storekeepers, and for mis-	•
	cellaneous expenses	.2, 150, 000
1	or salaries and expenses of sugar inspectors	36, 000
Ţ	or salaries and expenses of sugar inspectors	65, 000
	or detecting and bringing to trial and punishment persons guilty of	00,000
1	violating the internal-revenue laws, including payment for information	:
	and detection	75,000
τ	or salaries of officers, clerks, and employés in the office of the Commis-	10,000
. 1	sioner of Internal Revenue	272, 580
	STOREST OF TREE TREADURES	212; 300
	m 4.3	4 400 700

SALARIES.

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30, 1895, the sum of \$272,980 as salaries for the following officers, clerks, and employés in this Bureau:

One Commissioner, at	\$6,000
One deputy commissioner, at	3,600
One chemist, at	
One microscopist, at	2,500
Two heads of division, at	
Six heads of division, at	2.250
One superintendent of stamp vault, at	2,000

One stenographer, at	\$1,800
Twenty-five clerks, at	
Twenty-five clerks, at	1,600
Thirty-five clerks, at	1,400
Twenty-five clerks, at	1, 200
Fourteen clerks, at.	1,000
Forty-one clerks, at	900
Three messengers, at	840
Fourteen assistant messengers, at	720
Thirteen laborers, at	660

An aggregate of 209 persons.

I also recommend the appropriation of the sum of \$2,500 as salaries for one stamp agent at \$1,600 and one counter at \$900, the same to be reimbursed by the stamp manufacturers, as provided by the act of August 5, 1882.

SCALE OF SALARIES OF COLLECTORS.

The recommendations made for the salaries of collectors are based upon an estimate of their probable collections according to the following scale, with the qualification that if the actual collections should vary from the amounts estimated the salaries will be readjusted at the end of the fiscal year:

For collection of—	Salary.	For collection of—	Salary.
\$25,000 or less. 25,001 to \$37,500 37,501 to 50,000 50,001 to 75,000 75,001 to 100,000 100,001 to 125,000 125,001 to 175,000 175,001 to 225,000 225,001 to 275,000 225,001 to 375,000 325,001 to 375,000 325,001 to 375,000	2, 125 2, 250 2, 375 2, 500 2, 625 2, 750 2, 875 3, 000 3, 125	\$375,001 to \$425,000 425,001 to 550,000 475,001 to 550,000 550,001 to 625,000 625,001 to 700,000 700,001 to 775,000 775,001 to 850,000 850,001 to 925,000 925,001 to 1,000,000 1,000,001 and upward	3,500 3,625 3,750 3,875 4,000 4,125 4,250 4,375

OFFICIAL FORCE.

The force connected with this Bureau during the fiscal year which ended June 30, 1893, in the various districts throughout the United States, as reorganized under the executive order of May 21, 1887, was 63 collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
37	4, 250 4, 125 4, 000	1 3 5 2 1	3, 625 3, 500	1	\$3,000 2,875 2,750 2,625

There were also employed 963 deputy collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
22 11 33 1 10 31 2 59 9	\$2,000 1,900 1,800 1,750 1,750 1,600 1,550 1,450 1,450 1,400 1,350	34 169 127 136 2 64 4 23 1 5	\$1,300 1,200 1,100 1,000 950 900 850 800 750 700 600	9	\$506 486 425 400 360 300 250 240 200 150

There were also employed in the offices of the different collectors 185 clerks, who received per annum salaries as follows:

Number.	Salary.	Number	Salary.	Number.	Salray.
1	\$1, 800 1, 600 1, 500 1, 400 1, 300 1, 250 1, 200	8	\$1, 150 1, 100 1, 000 900 800 750 720	9 2 11 1	\$700 650 600 500 400

Also 30 porters, messengers, or janitors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
6	500 480	1	300	12	\$180 120 100

In addition to the foregoing there were also employed for limited periods 458 persons in duties solely connected with the execution of the provisions of the act of October 1, 1890, relating to the payment of bounty on sugar produced, as shown more in detail in that part of this report relating to that subject.

At the close of the year ended June 30, 1893, 211 officers, clerks, messengers, and laborers were employed in this Bureau, and the aggregate amount paid during the year for their salaries was \$271,530.90.

STOREKEEPERS, GAUGERS, ETC.

There were also employed 518 gaugers, who received fees not to exceed \$5 per day; 578 storekeepers, and 1,190 storekeepers, and gaugers, whose pay did not exceed \$4 per diem, and 6 distillery surveyors. All the foregoing officers are paid only when actually employed.

Storekeepers are assigned to those distilleries only which have a surveyed daily capacity of 100 bushels or more, and are paid such compen-

sation as may be prescribed by the Commissioner of Internal Revenue,

not to exceed \$4 per day.

The pay of storekeeper and gaugers assigned to distilleries whose registered daily capacity is 20 bushels or less is fixed by law at \$2 per diem. The pay of those assigned to larger distilleries has been graded according to the following scale:

Compensation for storekeeper and gaugers assigned to distilleries having a surveyed daily capacity exceeding 20 bushels and not exceeding 40 bushels, \$3 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 40 bushels and not exceeding 60 bushels, \$3.50 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 60 bushels, \$4 per day.

GENERAL CONDITION OF THE OFFICE AND THE SERVICE.

I take great pleasure in testifying to the fidelity, diligence, and accuracy of the officers, clerks, and employés of this Bureau during the passed and current fiscal years. The work of the office is in a most excellent condition, is practically up to date, and all business has been accurately and promptly disposed of.

During the past fiscal year the offices of the several collectors of internal revenue have been examined as often as was possible with the

limited number of revenue agents employed.

Such examinations resulted in finding the offices of collectors and their subordinates, as a rule, in good condition.

REVENUE AGENTS' DIVISION.

Twenty revenue agents have been employed during the last fiscal year, one as chief of division in this office, twelve in charge of territorial divisions, three in the examination of the offices and accounts of collectors, and four in assisting agents in charge of divisions and on special duty.

EXPENSES OF REVENUE AGENTS.

There have been expended from the appropriation for salaries and expenses of revenue agents during the year the following amounts:

Aggregate salary of agents	\$41, 739, 00
Aggregate amount of traveling expenses	27, 440, 20
Stationery furnished agents	358, 75
Transportation over Pacific railroads	
•	
m	

WORK OF REVENUE AGENTS.

Two thousand one hundred and ninety-four violations of law have been reported by revenue agents during the year; 545 persons have been arrested on their information; property to the value of \$192,437.67 has been reported by them for seizure, and \$68,692.24 for assessment for unpaid taxes and penalties.

ILLICIT STILLS SEIZED.

The following statement shows the number of illicit stills seized, persons arrested, and casualties to officers and employés during the fiscal year ended June 30, 1893:

Districts	Stills seized.		Number of persons	Casualties.

The accounts for expenditures under this appropriation are rendered monthly, with an itemized statement, and in all cases supported by proper subvouchers duly sworn to. These accounts pass through all the accounting offices in the Treasury Department and are filed in the Register's office.

INTERNAL REVENUE INSPECTORS.

In accordance with the provisions of legislative act of March 3, 1891, authorizing the Commissioner of Internal Revenue to employ not to exceed twelve inspectors whose duty shall be to inspect sugar upon which a bounty is required to be paid, and to perform such other duties as may be required by the Commissioner, twelve inspectors have been employed during the past year at a compensation of \$5 per day while actually and necessarily employed and their necessary traveling expenses.

These inspectors have been employed most of the time in connection with the payment of bounty on domestic sugar, and have been assigned as follows:

District of Kansas	[.]	j 1
Districts of Nebraska and Montana		1
First district of California		
Districts of Louisiana, Texas, and Florida		

The duties which they have performed have been the inspection and classification of sugar upon which a bounty was claimed, making examinations and inspections at sugar factories, and other work incident to that branch of the service.

During the maple sugar season inspectors were employed in connection with inspection and classification of maple sugar upon which bounty was claimed in the following districts:

Districts of New Hampshire and Massachusetts	2
Fourteenth, twenty-first, and twenty-eighth districts of New York	
Twelfth and twenty-third districts of Pennsylvania	1
Tenth and eighteenth districts of Ohio and first and fourth Michigan	

The services of inspectors are indispensable, in my opinion, to protect the interests of the Government in connection with the payment of bounties on domestic sugar. During the past year the duties imposed upon them were performed in a manner entirely satisfactory to this office, especially in the cane-sugar-producing districts, where it was found necessary to employ some of them during the entire year. In the beet and sorghum producing districts they were employed from three to five months, and in the districts where maple sugar is produced their services were required about three months.

When not occupied with duties as sugar inspectors they were employed with revenue agents on general duty in connection with the

internal-revenue service.

EXPENSES OF REVENUE INSPECTORS.

The appropriation for the payment of salaries and expenses of inspectors was \$33,000. The following expenditures chargeable to that appropriation have been made during the year:

Aggregate salary of in Aggregate amount of Transportation over I	traveling ex	penses	 	12	092.41

REDEMPTION OF CHECK AND PROPRIETARY STAMPS.

There have been received since July 1, 1892, and up to June 30, 1893, 83 applications for redemption of check and proprietary stamps in sums ranging from 8 cents to \$40, the various values stated amounting in the aggregate to \$235.73. The time allowed by law for the redemption of such stamps having expired June 30, 1886, the claims were rejected and the stamps forwarded therewith were returned.

At the close of the last fiscal year there were remaining 78 packages of check and proprietary stamps undisposed of. These packages are made up of cases incomplete as to data, some containing stamps without claims and others claims unaccompanied by stamps. None of the old claims have been disposed of and are chiefly those for which no clue to ownership can be obtained.

PRODUCTION OF STAMPS.

The Bureau of Engraving and Printing prints and supplies all of the internal revenue stamps used, with the exception of stamps for tobacco imprinted upon foil wrappers, which have been printed and furnished by the John J. Crooke Company, of New York, under a contract which provides that the imprinting of such stamps shall be without cost to the Government, the contractor receiving such remuneration from the manufacturers of tobacco as may be agreed upon between them, and reimbursing to the Government the salaries of one stamp agent for the United States and one counter, amounting to \$2,500 per annum.

MANUFACTURE OF STAMP PAPER.

After due advertisement for proposals to furnish paper for the present fiscal year to be used in printing United States internal revenue stamps, three bids were presented. The bids were opened March 8, 1893, and after proper consideration of the same, the customary and usual tests of the various samples of paper submitted with the bids having been made, the contract for supplying such paper was awarded on the 6th day of April, 1893, to Messrs. F. R. Walker & Son, of the city of New York, at the rate of 6 cents per pound, including expenses for its transportation and delivery at the Treasury Department. Under the contract for the previous fiscal year the price paid was 6.1 cents per The advertisement for the proposals stated that the quantity of paper likely to be required for the present year would be about 800,000 pounds. It is now apparent by the regular annual increase of the demand for the several classes of stamps that the amount of paper required will be 900,000 pounds. The manufacture of paper under the present contract was commenced on the 7th day of August, 1893.

OFFICIAL COUNT OF STAMPS IN VAULT.

In accordance with instructions contained in Department letter of December 14, 1892, appointing a committee to make an inventory of the internal revenue stamps in the vaults of the stamp division, the committee reported and took possession of the vaults at 9 o'clock on the morning of December 27, 1892, with a force of 3 clerks, 40 expert counters, and 20 packers and laborers, selected from different offices and bureaus of the Department, and proceeded at once with the count, completing the work at 12 o'clock on the 30th of the same month. They reported the balances found by actual count to agree in every respect with the balances reported by the superintendent of the vault and the statement of balances called for by the books of the office of the Secretary, all of which were verified by the count and found to be absolutely correct. The following summary of transactions illustrates the magnitude of the work performed in this branch of the Internal Revenue Bureau during the past year, as reported by the committee:

FI 93——36

There were on hand December 28, 1891, when the previous count was made, 63,551,673 stamps, value, \$23,760,884.85; from that date to December 27, 1892, there were received from the Bureau of Engraving and Printing and from collectors for reissue, 999,496,182 stamps, value, \$176,874,082.05, making a total to be accounted for of 1,063,047,855 stamps, value, \$200,634,966.90.

There were delivered for issue, reissue, and destruction during the period named 998,230,011 stamps, value, \$178,030,506.55, leaving a balance to be accounted for on the morning of December 27, 1892, of 64,817,844 stamps, value, \$22,604,460.35, which by actual count were

found to be in the vaults on that date.

A careful examination of the bookkeepers' accounts by money values was made, and they were found to strictly agree with the reports of the superintendent of the vault and with the books of the Secretary's Office.

The committee, in closing their report, state that they feel justified in emphasizing the fact that these extensive operations, involving the receipt, custody, and issue of more than 1,000,000,000 of stamps, have been conducted without loss to the Government, a result which indicates the highest degree of efficiency on the part of the officials and employés charged with this responsible duty, and that the system of checks adopted by the Department to insure accuracy and proper accountability is well calculated to secure that result.

A second count, required in the transfer of the office by ex-Commissioner John W. Mason upon his retirement from office, was commenced on the morning of April 19, 1893, and completed at noon on Saturday, April 22, under the supervision of a committee appointed by the honorable Secretary of the Treasury for that purpose. The committee reported that all the stamps with which the Commissioner was charged were properly accounted for, the accounts of this office being verified and found to agree with those of the Secretary's Office in each particular and in the same manner as stated in the case of the previous count.

STOCK OF STAMPS IN VAULT.

The present stock of stamps in the vaults of this Bureau does not come up to the requirements of the statute and is inadequate to meet the demands of the service. It is estimated that the three months' supply which the statute requires to be in the vault should be 263,208,000 stamps of the various classes and denominations. The stock on hand in the vault at the present time is only 108,704,844 stamps of all denominations. The inability to maintain the stock at the statutory requirement is due to the failure of the Bureau of Engraving and Printing to fill the orders from this Bureau as called for. There are now due from the Bureau of Engraving and Printing on past orders 106,370,100 stamps, and orders for the November delivery amount to 76,940,000 stamps.

REGISTRATION OF CHINESE.

Under the provisions of the act of May 5, 1892, certificates of residence of Chinese laborers, and other than laborers entitled to remain in the United States after the date of said act, are required to be issued by this office. The total number of certificates so issued was 13,243. The following tabulated statement will show the number issued, respectively, by collectors in the States and Territories named:

STATEMENT OF CERTIFICATES OF RESIDENCE ISSUED TO CHINESE.

		0
	Alabama	43
	Arkansas	13

TOBACCO DIVISION.

The aggregate amount of taxes collected from tobacco during the last fiscal year was \$31,889,711.74. This amount includes internal-revenue taxes paid by stamps on imported and manufactured tobacco, snuff, cigars, and cigarettes.

The net increase of collections for the last fiscal year, as compared with those for the previous fiscal year, was \$889,218.67. The increase

from the following named articles were:

Cigars and cheroots	141, 870. 43
Total Deduct decrease chewing and smoking tobacco	982, 976. 08 93, 757. 41
Net increase of collections	889, 218, 67

The decrease in the amount collected from chewing and smoking tobacco is believed to be due to the large increase of sales of leaf tobacco to consumers both by farmers and retail dealers in leaf tobacco.

The increase in the number of cigars and cigarettes and in the quantity of snuff and the decrease in the quantity of smoking and chewing

tobacco for the last fiscal year, as compared with those taxed for the previous fiscal year, were—

Cigars and cheroots	numberdo	265, 397, 700 283, 715, 860
Total		
Snuff	pounds	748,543 $1,562,272$
Net decrease, tobacco and snuff	do	813, 729

The export account shows an increase in manufactured tobacco and snuff of 276,738 pounds; an increase in the number of cigars exported of 262,006; and an increase in the number of cigarettes exported of 76,982,240.

COMPARATIVE STATEMENT.

The following exhibit shows in detail the receipts for the fiscal year ended June 30, 1893, from each particular source of the tobacco tax, as compared with those for the previous fiscal year:

RECEIPTS FROM TOBACCO AND SNUFF.

Manufactured tobacco	\$15, 143, 984. 91 714, 773. 63
Total for year ended June 30, 1893	15, 858, 758. 54 15, 907, 603. 40
Decrease in collections Decrease from chewing and smoking tobacco Increase from snuff.	48, 844. 86 93, 757. 41 44, 912. 55
RECEIPTS FROM CIGARS AND CIGARETTES.	
Cigars and cheroots	\$14, 442, 591, 35 1, 588, 361, 85

Increase over fiscal year 1892	360, 298, 689
The increase during the fiscal year 1893 of taxed ciga 283,715,860, and of cigarettes exported was 76,982,240. The of cigarettes imported and withdrawn for consumption was	rettes was e increase

^{*} See note on page 568.

THE TABULAR STATEMENTS.

In the tables* annexed will be found statements showing the manner in which the manufacturing is distributed among the different States and districts, the number of persons and firms engaged in each of the two branches of manufacturing, the quantity of different kinds of materials used, and the quantity and kind of product manufactured. tables are compiled from the reports received from the collectors of internal revenue of the transactions of manufacturers in their several districts for the calendar year ended December 31, 1892, a period of time differing from the fiscal year, which will account for any apparent discrepancies between them and the previous part of the report relat-

ing to tobacco.

There were in New York City thirty-two persons who qualified and kept books as tobacco manufacturers solely for the purpose of lawfully dealing in the refuse scraps, clippings, cuttings, and waste made by cigar manufacturers. They sort, sieve, and pack this material and export most of it to foreign countries. The rest they sell in bulk, under permits, to other manufacturers, who manipulate it and pack their product as smoking tobacco. During the year 1892 they purchased 1,626,556 pounds of such material, exported 911,319 pounds, and sold 567,155 pounds to other manufacturers. These purchases and sales are not included in the tabular statement, because they did not pack and sell any of this tobacco for use and consumption. Many eigar manufacturers who prepare for use and pack as smoking tobacco their refuse material have, during the year 1892, qualified as tobacco manufacturers in addition to those who qualified during the year 1891. The number of tobacco manufacturers who buy leaf and manufacture it is not over The other persons who are reported as tobacco manufacturers are either scrap dealers or cigar manufacturers who have qualified as tobacco manufacturers to enable them to pack, stamp, and sell their refuse scraps, cuttings, clippings, and waste.

^{*} See nôte, page 551.

a Increase.

b Decrease.

NOTE 1.—Increase in "smoking" includes scraps, cuttings, and clippings put up by manufacturers of cigars who, under law and circular 361, qualified as manufacturers of tobacco.

NOTE 2.—Tax on tobacco and snuff, year 1890, was 8 cents per pound, and for the year 1891 was reduced to 6 cents per pound.

SMOKING OPIUM.

As an effective enforcement of section 36, act of October 1, 1890, imposing a tax of \$10 a pound upon all opium manufactured in the United States for smoking purposes is impossible, for the reasons set forth in detail in my predecessor's last annual report (1892, page 38), without additional legislation, I renew the recommendation therein made that the law be amended so as to provide that all smoking opium found unstamped shall be deemed to have been manufactured or imported since October 1, 1890, and shall be forfeited to the United States (following the precedents found in sections 3378 and 3403, Revised Statutes, as to tobacco, snuff, and cigars).

I also renew the recommendation that the provisions of sections 3373, 3374, 3375, and 3376, Revised Statutes, be adapted to the stamping of prepared smoking opium, and so drawn in detail and enacted.

DIVISION OF LAW.

ABATEMENT CLAIMS.

On the 1st of July, 1892, there were pending 219 claims for abatement of assessed taxes, amounting to \$146,072.37, and during the year 3.610 claims, amounting to \$416,000.39, were presented.

3,610 claims, amounting to \$416,000.39, were presented.

Of these, 2,566 claims, amounting to \$299,880.05, have been allowed by this office, and 1,009 claims, amounting to \$155,070.63, have been

rejected or returned for amendment.

This left 254 claims for abatement still pending on the 30th of June,

1893, amounting to \$107,122.08.

Since that date and up to October 1, 718 other claims have been filed, amounting to \$93,675.66; 347 claims have been allowed, amounting to \$26,465.90, and 336 rejected or returned for amendment, amounting to \$35,472.38, and on the 1st of October, 1893, 289 claims for abatement were pending, amounting to \$138,859.46.

REFUNDING CLAIMS.

On the 1st of July, 1892, there were pending 137 claims for the refunding of taxes collected, amounting to \$110,719.68, and during the year 223 other claims, amounting to \$127,337.37, were presented.

Of these, 139 claims, amounting to \$56,198.34, have been allowed, and 74 claims, amounting to \$9,931.44, have been rejected or returned for amendment. This left 147 claims for refunding still pending on the

30th of June, amounting to \$171,927.27.

Since that date and up to the 1st of October, 1893, 44 other claims, amounting to \$9,409.28, have been received. Of these, 24 claims have been allowed, amounting to \$5,500.47, and 26 have been rejected or returned for amendment, amounting to \$2,224.99, and on the 1st of October, 1893, 141 claims for refunding were pending, amounting to \$173,611.09.

REBATE OF TAX ON TOBACCO.

On the 1st of July, 1892, there were no rebate claims on hand. Between that date and June 30, 1893, 31 claims, amounting to \$741.11, which had been returned for amendment, have been received. These claims have all been disposed of, 28 claims, amounting to \$691.35, being allowed, and 3 claims, amounting to \$49.76, being rejected.

COMPARATIVE STATEMENT OF DISTILLERIES REGISTERED AND OPERATED.

The whole number of grain distilleries registered during the fiscal year ended June 30, 1893, was 1,798, of which number 1,617 were operated.

The numbers registered and operated during the fiscal year ended June 30,1892, were 1,663 and 1,457, respectively, showing an increase during the last fiscal year of 135 in the number registered and of 160 in the num-

ber operated.

The larger portion of the increase in the number registered and in the number operated occurred in the class of distilleries having the smaller capacities for the production of spirits, there having been an increase of 118 in the number of distilleries of this class registered and an increase of 136 in the number operated.

In the class of larger distilleries there was an increase of 17 in the

number registered and of 24 in the number operated.

During the fiscal year ended June 30, 1892, there were registered 1,414 distilleries of the smaller class, varying in daily grain capacity from not over 5 to not over 60 bushels each, and of this number 1,223, or 85 per cent, were operated.

Of the larger distilleries, having daily grain capacities varying from 60 bushels to several thousand bushels each, 249 were registered and

234, or nearly 94 per cent, were operated.

During the fiscal year ended June 30, 1893, of the smallest distilleries 1,532 were registered and 1,359, or nearly 89 per cent, were operated.

Of the larger distilleries 266 were registered and 258, or 97 per cent,

were operated.

There were 11 rum distilleries registered and 11 operated, an increase of 1 in the number reported for the previous fiscal year

of 1 in the number reported for the previous fiscal year.

There were 3,180 fruit distilleries registered and 3,115 operated, a decrease of 1,301 in the number registered and of 1,343 in the number operated during the fiscal year.

The total number of grain, molasses, and fruit distilleries registered

and operated during the year is 4,989 and 4,743, respectively.

There was a decrease of 1,165 in the number of all kinds of distilleries registered and of 1,182 in the number of all kinds operated during the fiscal year ended June 30, 1893, as compared with the fiscal year ended June 30, 1892; but this decrease occurs wholly in the class of fruit distilleries, there being, as shown above, a considerable increase in the number of grain distilleries.

The average yield per bushel of grain was $\frac{126,545,017}{*29,030,409} = 4.35 +$ gallons of spirits.

The average yield per gallon of molasses was $\frac{2,106,765}{*2.775,752}$ = .758+ of a gallon of rum.

"Two million one hundred and eight thousand eight hundred and twenty five gallons of molasses were used for the production of spirits instead of rum; and their equivalent, estimated in bushels of grain, is added to the total grain in determining the yield per bushel of grain.

COMPARATIVE STATEMENT OF MATERIALS USED AND SPIRITS PRODUCED DURING THE LAST TEN FISCAL YEARS.

The quantity of grain used for the production of spirits during the fiscal year ended June 30, 1893 (29,030,409 bushels, including 328,039 bushels, which is the estimated equivalent of 2,108,825 gallons of molasses used for the production of spirits), is an increase of 2,540,582 bushels over the amount used in the preceding fiscal year (26,489,827 bushels), and is 7,217,180 bushels more than the average (21,813,229 bushels) for the last ten years. The number of gallons of spirits produced from grain during the year (126,545,017 gallons) shows an increase of 13,732,294 gallons over the product (112,812,723 gallons) for the year ended June 30, 1892, and is 34,694,304 gallons more than the average produced (91,850,713 gallons) for the last ten years.

The yield of spirits from each bushel of grain is 4.35+ gallons.

The yield for the two preceding years was 4.32+ for 1891 and 4.24+

gallons for 1892.

The quantity of molasses used for the production of rum during the fiscal year (2,775,752 gallons) shows an increase of 224,993 gallons over the quantity used in the previous year (2,550,759 gallons), and is 367,784 gallons more than the average (2,407,968 gallons) for the last ten years.

The quantity of rum distilled from molasses during the fiscal year (2,106,765 gallons) shows an increase of 150,447 gallons over the product of the previous year (1,956,318 gallons), and is 275,065 gallons more than the average product (1,831,700 gallons) for the last ten years.

^{*} The ganging of spirits after rectification, by United States gaugers, was discontinued August 15, 1893.

DIVISION OF ASSESSMENTS.

The following statements relative to assessments, to spirits deposited in and withdrawn from distillery warehouses and special bonded warehouses, the number and location of such warehouses and the names of the proprietors thereof; to the stock of spirits in the United States October 1, 1893; to the exportation of spirits, fermented liquors, tobacco, snuff, cigars, and cigarettes in bond; to the exportation of tobacco, cigars, fermented liquors, and stills, with benefit of drawback; to the use of grape brandy tax-free in fortifying wines, and to the act of March 3, 1891, authorizing the use of alcohol tax-free in the manufacture of sugar from sorghum, are prepared from reports in the division of assessments. The statements relative to assessments are to be found on this page and the page following; statements relative to operations in distillery warehouses commence on page 77 (see also special index on page 76); to operations in special bonded warehouses, on page 159; to exportations in bond free of tax as to spirits, on page 133; as to fermented liquors, on page 170; as to tobacco, snuff, cigars, and cigarettes, on page 168; to exportations with benefit of drawback, on page 169, and to the use of brandy in fortifying wines, on page 167. No case has yet arisen under the act of March 3, 1891, above referred to.

ASSESSMENTS.

1. By States and Territories, 1893.

The following statement shows the amount of assessments in each of the several States and Territories of the United States, except where two or more are comprised in one district, during the fiscal year ended June 30, 1893:

States and Territories.	Amount.	States and Territories.	Amount.
Alabama Arkansas California and Nevada Colorado and Wyoming Connecticut and Rhode Island Florida Georgia Illinois Indiana Iowa Kansas, Indian Territory, and Oklahoma Kentucky Louisiana and Mississippi Maryland, Delaware, and District of Columbia Massachusetts Michigan Minnesota Missouri	4, 302, 14 48, 261, 64 3, 790, 46 14, 275, 73 1, 784, 41 17, 394, 20 84, 280, 95 184, 099, 04 14, 014, 43 4, 513, 70 8, 421, 648, 34 6, 255, 42 737, 544, 90 16, 793, 10 8, 060, 95 2, 248, 45	Montana, Idaho, and Utah Nebraska, Northand South Dakota. New Hampshire, Maine, and Vermont. New Jersey New Mexico and Arizona. New York North Carolina Ohio Oregon, Washington, and Alaska Pennsylvania. South Carolina Tennessee Toxas. Virginia West Virginia. Wisconsin	12, 853. 96 3, 474. 05 34, 510. 66 1, 999. 40 82, 749. 01 45, 897. 04 277, 134. 79 32, 071. 43 1, 493, 869. 45 5, 945. 70 233, 124. 68 4, 526. 45

Taxes on deficiencies in the production of distilled spirits and on excess of materials used by distillers abated before assessment during the fiscal year ended June 30, 1893, are as follows:

, , ,	
Eighty-six claims received from grain-distillers, amount of tax abate On excess of material used	d— \$1.675.85
On deficiencies in production of distilled spirits	38, 538. 67
Total	40, 214. 52
Claims received from fruit-distillers, amount of tax abated— On deficiencies in production of distilled spirits	1, 583. 02
Total grain and fruit	41, 797. 54

2. By ARTICLES AND OCCUPATIONS, 1892 AND 1893.

The following table shows the assessments made by the Commissioner of Internal Revenue during the fiscal years ended June 30, 1892, and June 30, 1893, respectively, and the increase or decrease on each article or occupation:

e e	Assessed of year e	luring fiscal nded—	Fiscal year ended June 30, 1893.		
Description of tax by article or occupation.	June 30, 1892.	June 30, 1893.	Increase over 1892.	Decrease from 1892.	
Tax on deficiencies in production of distilled spirits	\$74 , 806. 52	\$74, 378. 37		\$428.15	
Tax on excess of materials used in the produc- tion of distilled spirits	4, 430. 15	1, 510. 99		2, 919. 16	
Tax on distilled spirits fraudulently removed or seized, also taxes overdue	5, 356, 190. 50	11, 566, 080. 90	\$6, 209, 890. 40		
ery unstamped	7, 547. 49	1, 946. 18		5, 601: 31	
from factory unstamped	11, 666. 32	1			
of tax Assessed penalties Unassessed and unassessable penalties, inter-	51. 86 91, 804. 96	116. 32 83, 243. 28		11, 556. 68	
est, deficiencies in bonded accounts which have been collected, taxes previously abated, conscience money, also fines, penalties, and					
forfeitures and costs paid to collectors by order of court or by order of Secretary, and					
unassessable taxes recovered; also amount of penalties and interest received for vali- dating unstamped instruments (Form 58)	246, 133. 11	180, 470. 76		65, 662, 35	
Special taxes (licenses)	44, 580. 29	56, 949. 96	12, 369. 67		
Total	5, 840, 211. 14	11, 979, 773. 66	6, 225, 730.,17	86, 167. 65	

STATEMENT AS TO STAMP TAXES ASSESSED.

All taxes payable by stamps not paid at the time and in the manner required by law have been assessed and accounted for separately from those not payable by stamps. The amount of stamp taxes so assessed and accounted for is as follows:

Balance as per last report	\$644, 324. 12
Additional amount not heretofore reported	47.87
Stamp-tax spirits assessed	10, 877, 049.00
Special taxes assessed	56, 384. 18
Amount transferred from one district to another	435.92
	
Total	
11 4 7 7	0.050.05
Amount collected during year	9, 950, 708. 97
Amount abated during year	148, 762. 44
Amount transferred from one district to another	435. 92
Balance on hand June 30, 1893	1, 478, 333. 76
Total	11 578 241 09

The increase in the balance at the end of the year over that at the beginning of the year is due to the heavy assessments made on the lists for June, 1893.

DETAILS OF OPERATIONS IN DISTILLERY WAREHOUSES.

The following tables furnish detailed statements in taxable gallons as to operations in distillery warehouses during the year and the months of July, August, and September, 1893, also as to spirits in the hands of wholesale liquor dealers and rectifiers, etc., viz:

^{*}Note.—The term "taxable gallon," as used in these tables, signifies the gallon subject to tax at 90 cents. In the case of whisky, rum, and gin, this gallon is about equal by measure to the wine gallon of 231 cubic inches, which is the United States standard in measuring liquids. This is also true of most distilled spirits used as beverages, and is owing to the fact that such spirits are mixtures of alcohol and water, of about equal parts by volume, a wine gallon of such a mixture being substantially defined by the law to be the taxable gallon. If the liquor is more than half water, the full gallon measure is still a taxable gallon; but if the liquor is more than half alcohol, the taxable gallon does not fill the wine gallon measure, and if the liquor is all pure alcohol, the taxable gallon fills the measure just half full. For an exact definition of the gallon on which the tax is collected, see sections 3249 and 3251, Revised Statutes, as amended.

INCREASED PRODUCTION OF SPIRITS.

The quantity of spirits (128,651,782 gallons) produced and deposited in distillery warehouses during the fiscal year ended June 30, 1893, is more than the production (114,769,041 gallons) of the year 1892 by 13,882,741 gallons. The difference is distributed among the different kinds as known to the trade as follows:

Increase in the production of— Bourbon whisky Rye whisky Rum Gin Miscellaneous		3, 361, 800 150, 447 85, 873
Total increase		16, 517, 399
Decrease in production of— Alcohol	Gallons. 2, 240, 607 184, 381 209, 670	
Total decrease	•••••	2, 634, 658

INCREASED WITHDRAWAL OF TAX-PAID SPIRITS.

The quantity of tax-paid spirits (97,424,825 gallons) withdrawn from distillery warehouses during the fiscal year ended June 30, 1893, is more than the quantity (92,985,265 gallons) withdrawn from distillery warehouses during the fiscal year ended June 30, 1892, by 4,439,560 gallons, the increase being distributed among the different kinds known to the trade as follows:

Increase in withdrawals of— Bourbon whisky	Gallons.
Rye whisky	1,427,463
Alcohol	361, 827
Rum	86,591 $47,046$
Total increase	6 768 174
Total increase Decrease in withdrawals of— Gallons.	
High wines 185, 077 Pure neutral or cologne spifits 1, 722, 095	,
Pure neutral or cologne spifits 1, 722, 095 Miscellaneous 421, 442	1.
Total decrease	2, 328, 614
Not increase	4 490 500

If the quantity, 744,442 gallons (as stated by the Chief of the Bureau of Statistics), of exported domestic spirits reimported during the year upon payment of a customs duty equal to the internal revenue tax be added, the quantity virtually withdrawn from distillery warehouses during the year ended June 30, 1893, is found to be 98,169,267 gallons, or 4,157,724 gallons more than during the year 1892, including the 1,026,278 gallons reimported and tax-paid during that year.

WITHDRAWAL OF PRODUCTS BY MONTHS.

The quantity of each month's product of spirits in warehouses July 1, 1892, which was withdrawn during the year ended June 30, 1893, is shown in the following statement:

DISTILLED SPIRITS ALLOWED FOR LOSS BY LEAKAGE OR EVAPORATION IN WAREHOUSE.

The quantity of spirits (5,072,164 gallons) reported in the preceding table as lost by leakage or evaporation in warehouse is that portion of actual leakage in warehouse from packages withdrawn during the year which has been allowed in accordance with the provisions of section 17 of the act of May 28, 1880.

The following statement shows the quantity of spirits, as per original gauge, withdrawn from warehouse for all purposes during the stated period, and the amount and percentage of leakage allowed thereon under the provisions of the act named:

Year.	Total quantity withdrawn.	Leakage allowed.	Percentage of withdrawals.
86	84, 335, 900 80, 281, 611 83, 291, 190 92, 022, 593 490, 925, 782 b78, 566, 767 70, 782, 951 74, 391, 751 81, 879, 458 88, 066, 945	Gallone. 75, 834 811, 466 1, 231, 336 2, 291, 013 8, 858, 494 4, 424, 314 1, 806, 868 1, 833, 681 2, 209, 327 1, 932, 240 2, 420, 256 3, 532, 510	. 962 1. 533 2. 750 4. 193 4. 866 2. 299 2. 591 2. 969 3. 841 3. 329

a Includes 7,750,696 gallons stamped for export not actually withdrawn. b includes 2,494,091 gallons stamped for export not actually withdrawn.

FI 93----39

The increase of leakage allowed as compared with the year 1892, is 1,539,354 gallons, and is distributed among the different kinds of spirits known to the trade as follows:

Increase of leakage allowed for— Bourbon whisky	Gallons.
Bourbon whisky	983, 012
Rve whisky	391, 525
Alcohol	
Rumo	
Gin	225
High wines	514
Pure, neutral or cologne spirits	72,483
Miscellaneous	58, 645
Total increase	1, 539, 354

EXPORTATION OF DISTILLED SPIRITS.

The following statements show the quantities of spirits of different kinds withdrawn for export during the last two fiscal years:

1. BY DISTRICTS WITHDRAWN IN 1892.

SPIRITS LOST BY FIRE IN WAREHOUSES FOR THE LAST TWENTY-ONE YEARS.

The following statement shows the quantity of spirits lost in distillery warehouses by fire during each of the last twenty-one calendar years. As it shows also the stock of spirits in warehouse at the close of each of the fiscal years 1872 to 1893, both inclusive, the percentage of loss on stock held may be readily computed:

[Quantities in taxable gallons.]

Years.	In bond June 30.	Total loss.	Years.	In bond June 30.	Total loss.
1872 1873 1874 1875 1876 1877 1877 1878 1879 1880 1881 1882	10, 103, 392 12, 917, 462 15, 817, 709 13, 367, 253 12, 984, 896 13, 258, 794 14, 088, 773 19, 212, 470 31, 363, 869 64, 648, 111 89, 862, 645	28, 399 9, 901 124, 602 81, 493- 99, 102 7, 487 29, 913 2, 465 14, 620 198, 251 175, 216	1883 1884 1885 1886 1987 1888 1889 1890 1891 1892	58, 096, 620 65, 145, 269	396, 299 416, 609 109, 030 181, 198 112, 722 18, 925 32, 252 1, 160, 769 50, 431 48, 944 3, 298, 628

[Average loss, $\frac{3}{10}$ of 1 per cent.]

The loss during the six months ended June 30, 1893, was 1,899,310 gallons, the stock on hand June 30, 1893, being 147,894,694 gallons.

DISTILLED SPIRITS IN THE UNITED STATES OCTOBER 1, 1893.

The quantity of distilled spirits in the United States, except what may be in customs bonded warehouses, on the 1st day of October, 1893, was 188,525,773 gallons, this quantity being distributed as follows:

				Gallons.
In distillery warehouses				134, 288, 665
In special bonded warehouses.				2, 263, 057
In hands of wholesale liquor d	ealers			18, 994, 601
In hands of retail liquor dealer		· · · · · · · · · · · · · ·		32, 979, 450
			-	
* Total				199 595 779

In making the above computation the average stock of each retail liquor dealer in the United States is estimated at 150 gallons.

The following table shows the quantity of distilled spirits in taxable gallons, at 90 cents tax, placed in distillery warehouses during the fiscal year ended June 30, 1893, the quantity withdrawn therefrom during the year, and the quantity remaining therein or remaining unaccounted for at the beginning and close of the year:

Summary of Operations at Distillery Warehouses during the Year ended June 30, 1893.

Distilled spirits.	Gallons.	Gallons.
Actually remaining in warehouse July 1, 1892 Not actually in warehouse, claimed to have been lost by casualty, etc Withdrawn for exportation, proofs of landing not received. Withdrawn for transfer to mannfacturing warehouse, not yet received at warehouse.	127, 596, 339 195, 265 2, 470, 762 19, 587	100 901 053
Produced from July 1, 1892, to June 30, 1893		130, 281, 953 128, 651, 782
Total		258, 933, 735
Withdrawn from warehouse, tax-paid. Allowed for loss by leakage or evaporation in warchouse. Exported, proof of landing received. Allowed for loss by casualty Withdrawn for scientific purposes and for the use of the United States Tax-paid on deficiencies in export bonds and casualties disallowed Allowed for loss by leakage in transportation for export, etc. Withdrawn for transfer to manufacturing warchouse and received at warehouse.	5, 072, 164 3, 658, 090 51, 444 69, 698	100 492 407
Withdrawn for exportation, proof of landing not received	2, 560, 670 763	106, 423, 407
Not actually in warehouse, claimed to have been lost by casualty, etc Spirits remaining in warehouse June 30, 1893.	2, 054, 201 147, 894, 694	152, 510, 328

EXPORTATION OF MANUFACTURED TOBACCO AND SNUFF IN BOND.

The quantity of manufactured tobacco removed from the place of manufacture in bond free of tax, now at the rate of 6 cents per pound, during the year, also the quantity actually exported during the year and the quantity unaccounted for at the beginning and at the end of the year, are shown in the subjoined statement:

Quantity unaccounted for July 1, 1892 Quantity removed during 1892, not heretofore reported	Pounds 1, 044, 371 200, 261	Pounds.
2. Quantity removed during 192, not heretotore reported 3. Quantity removed during the year ended June 30, 1893		1, 244, 632 15, 413, 449§
Total		16, 658, 0818
4. Quantity actually exported during year 5. Quantity exported in 1892, not before reported 6. Quantity deficient on which tax was paid.	142, 014	
7. Quantity unaccounted for June 30, 1893, including 58,747 pounds of removals in 1892.	973, 7391	
Total		16, 658, 081

EXPORTATION OF CIGARS AND CIGARETTES IN BOND.

	Cigars at \$3 per M.	Cigarettes at 50 cents per M.
Removed and unaccounted for July 1, 1892, as per last report. Removed prior to July 1, 1892, not heretofore reported. Removed during the year ended June 30, 1893.	23, 350 607, 100 2, 247, 055	21, 366, 740 1, 064, 000 397, 827, 260
Total	2, 877, 505	420, 258, 000
4. Exported and accounted for during the year ended June 30, 1893 5. Exported during the year 1892, not heretofore reported	2, 233, 405 524, 100	398, 533, 000 851, 000
Total	2, 757, 505	399, 384, 000 43, 000
7. Remaining unaccounted for at the close of the fiscal year ended June 30, 1893, including 83,000 cigars and 213,000 cigarettes removed in 1892	120,000	20, 831, 000
Total	2, 877, 505	420, 258, 000

It appears that upon adding to the quantities reported as withdrawn for export last year (1892) the quantities omitted as above stated the increase as to tobacco and cigarettes and the decrease as to cigars is as follows:

	•		Increase.	Decrease.
Tobacco		pounds uumberdo	76, 477	245 004
Cigarettes	• • • • • • • • • • • • • • • • • • • •	do	75, 918, 240	340,034

The increase as to cigarettes continues to be the prominent feature of this class of exportations. The business of exporting cigarettes has grown during the past twelve years as follows:

OLEOMARGARINE.

The following statements, showing operations under the act of August 2, 1886, defining butter and imposing a tax upon and regulating the manufacture, sale, importation, and exportation of oleomargarine, comprise—

First. A summary of operations at oleomargarine manufactories during the fiscal year ended June 30, 1893; also a summary of operations during the past two fiscal years, and by months covering the period

from November 1, 1886, to June 30, 1893.

Second. A statement of the receipts from all classes of taxes im-

posed by the eleomargarine law for the year ended June 30, 1893.

Third. A statement by States and Territories showing the number of establishments for which special tax was paid to carry on during the fiscal year ended June 30, 1893, the business of manufacturing and dealing in oleomargarine; also in aggregate of all persons who paid oleomargarine special taxes for the twelve months ended June 30, 1892.

Fourth. A statement of the total production and of total receipts from all oleomargarine sources for each fiscal year since the oleomargarine law took effect.

It appears from the subjoined table that the average monthly production of oleomargarine under the operations of the law has been as follows:

·	Pounds.
During the eight months ended June 30, 1887	2, 711, 828
During the fiscal year ended June 30, 1888	2, 860, 460
During the fiscal year ended June 30, 1889	2, 972, 002
During the fiscal year ended June 30, 1890	2, 693, 669
During the fiscal year ended June 30, 1891	3, 699, 367
During the fiscal year ended June 30, 1892	4, 030, 346
During the fiscal year ended June 30, 1893	5, 602, 024

It also appears that the average monthly quantity withdrawn from factories on payment of the tax was as follows:

	Pounds.
During the eight months ended June 30, 1887	2,592,946
During the fiscal year ended June 30, 1888	2, 707, 430
During the fiscal year ended June 30, 1889	
During the fiscal year ended June 30, 1890	
During the fiscal year ended June 30, 1891	3,601,292
During the fiscal year ended June 30, 1892	3, 909, 625
During the fiscal year ended June 30, 1893	5, 371, 989

The average quantity withdrawn monthly for exportation during the same time is shown to have been as follows:

	Pounds,
During the eight months ended June 30, 1887	90.566
During the fiscal year ended June 30, 1888	140, 516
During the fiscal year ended June 30, 1889.	145, 746
During the fiscal year ended June 30, 1890	134, 866
During the fiscal year ended June 30, 1891	102, 426
During the fiscal year ended June 30, 1892	
During the fiscal year ended June 30, 1893	232, 124
,	. ,

In the fiscal years 1887 and 1888 the largest production month was March; in the fiscal year 1889, December; in the fiscal year 1890, October; in the fiscal year 1891, March; in the fiscal year 1892, March; while the greatest production during the fiscal year ended June 30, 1893, occurred in January. The quantity produced during these months was as follows:

	•	Pounds.
In March, 1887		3, 568, 254
In March, 1888		3, 940, 727
In December, 1888		
In October, 1889		4, 072, 333
In March, 1891		6, 723, 224
In March, 1892		
In January, 1893	,	7, 824, 657

The months in which the production fell below 2,000,000 pounds were as follows:

During the fiscal year ended June 30, 1887:	
May, 1887, produced	1,885,027
May, 1887, produced June, 1887, produced	1, 375, 423
During the fiscal year ended June 30, 1888:	
July, 1887, produced	1, 208, 638
During the fiscal year ended June 30, 1889:	
June, 1889, produced	1, 575, 362
During the fiscal year ended June 30, 1890:	
July, 1889, produced August, 1889, produced May, 1890, produced June, 1890, produced	1, 404, 749
August, 1889, produced	1, 975, 773
May, 1890, produced	1, 864, 746
Juné. 1890, produced	1, 364, 826
During the fiscal year ended June 30, 1891:	
July, 1890, produced	1, 723, 966
June, 1891, produced	1, 988, 633
	, -,

There was an increase in the number of persons engaged in the sale of oleomargarine during the fiscal year ended June 30, 1893, as well as an increase in the production of the article.

The following table shows the quantity of oleomargarine, in pounds, at 2 cents tax, produced at manufactories during the fiscal year ended June 30, 1893, the quantity withdrawn therefrom during the year, and the stock of oleomargarine remaining in factories June 30, 1893:

SUMMARY OF OPERATIONS AT OLEOMARGARINE MANUFACTORIES DURING THE FISCAL YEAR ENDED JUNE 30, 1893.

^{*} The number of wholesale establishments that actually carried on business after paying the special

tax was 281.

† The number of wholesale establishments that actually carried on business after paying the special tax for the fiscal year ended June 30, 1892, was 249.

The following table of production and total receipts from all oleomargarine sources for each fiscal year since November 1, 1886, the date the oleomargarine law took effect, is interesting as showing the extent of operations in the country:

	Produced.	Received.
On hand November 1, 1886. During the fiscal year ended June 50, 1887 (from November 1, 1886). During the fiscal year ended June 30, 1888. During the fiscal year ended June 30, 1889. During the fiscal year ended June 30, 1890. During the fiscal year ended June 30, 1891. During the fiscal year ended June 30, 1892. During the fiscal year ended June 30, 1893. AMENDMENTS SUGGESTED TO PRESENT LAW.

Section 3 of the act of August 2, 1886, defines a retail dealer in oleomargarine to be "every person who sells oleomargarine in less quantities than 10 pounds at one time," whereas section 6 of this act provides that "retail dealers in oleomargarine must sell only from original stamped packages in quantities not exceeding 10 pounds."

To reconcile the two sections, section 6 should be amended by striking out the words "not exceeding," and inserting in lieu thereof the

words "less than."

As a wholesale dealer in oleomargarine is defined to be a person who sells it "in the original manufacturer's packages" (section 3, act August 2, 1886); and it is further provided that "all sales made * * * by wholesale dealers in oleomargarine shall be in original stamped packages;" persons who sell more than 10 pounds, not in the original stamped packages, can not, as the law stands, be required to pay special tax as wholesale dealers; nor is there any criminal provision of the statutes directly reaching such cases.

If it be deemed unadvisable to change the law which confines a wholesale dealer in oleomargarine to selling only "original stamped packages," then the sale of 10 pounds or more, not in such packages, should be made a criminal offense by an amendment to section 6 of the act.

Section 41, act-of October 1, 1890, requires wholesale dealers in oleomargarine to keep books and render returns in compliance with the regulations, but no penalty for violation of this section is provided for therein; and in view of recent decisions of the courts, it would seem that a penalty clause, directly accompanying the provisions of a statute requiring certain acts to be done, is essential to an effective enforcement of the law.

It is suggested that the last sentence of section 6, act of August 2,

1886, be stricken out and the following inserted:

"Évery person who knowingly sells, or offers for sale, or delivers or offers to deliver, any oleomargarine, in quantities exceeding 10 pounds at one time, otherwise than in the original stamped packages, and every retail dealer in oleomargarine who sells or offers for sale, oleomargarine otherwise than as herein required, or delivers or offers to deliver oleomargarine in any other form than in new wooden or paper packages as above described, and every manufacturer, dealer, or other person, who packs in any package any oleomargarine in any manner contrary to law, or who falsely brands any package, or affixes a stamp on any pack-

FI 93-41

age denoting a less amount of tax than that required by law, shall be fined for each offense not more than \$1,000 and be imprisoned not more than two years."

The third clause of section 3 should be amended by applying the provisions of that clause of section 3244 of the Revised Statutes relieving from liability to special tax persons selling oleomargarine as execu-

tors, administrators, or in any other fiduciary capacity.

Section 5 should require every manufacturer of oleomargarine to file with the collector of the district a description of the premises constituting his manufactory, and that no business shall be carried on on those premises except the manufacture of oleomargarine or of other substances necessary for and to be used exclusively in the manufacture of the oleomargarine produced thereon.

Section 6 should be amended by requiring that all oleomargarine intended for consumption or sale in this country should be packed as required by that section. The same section should provide that all oleomargarine intended for exportation to a foreign country should be packed in wooden or metallic tubs or other vessels, as prescribed by the Commissioner of Internal Revenue with the approval of the Secretary of the Treasury.

Section 16 should be amended by striking out the clause in the third and fourth lines "without affixing stamps thereto," thus giving the Commissioner, with the approval of the Secretary of the Treasury, authority to prescribe export stamps to be affixed to packages intended

for exportation.

The last clause of the same section should be amended by substituting for the words "export oleomargarine" the words "remove from the place of manufacture oleomargarine for exportation," so as to require the package intended for export to be branded by the manufacturer before or at the time of removal.

I think there should be a penalty denounced in section 16 for failure to brand packages of oleomargarine intended for export as required in

that section.

It will be observed that the increase in the production of oleomargarine during the last fiscal year over that of the preceding year was 16,860,143 pounds. The increase in special taxpayers during the last year over those of the previous year has been, manufacturers, 4; wholesale dealers, 26; retail dealers, 609. The increase in receipts for tax paid upon oleomargarine manufactured during the last fiscal year and for special taxes paid during that period over that of the year previous was \$404,317.50. During the year ended June 30, 1888, there were produced 34,325,527 pounds of oleomargarine. During the fiscal year ended June 30, 1893, there were produced 67,224,298 pounds, the production of this article having nearly doubled within the period of five years.

This product has become a recognized article of food, and its manufacture one of the established industries of the country. There is in nearly all the States an increasing demand for it under its proper name and by persons fully informed as to the nature of the substance. While it is used as a substitute for butter, for which it is intended, and comes into competition with the lower grades of that article, its production and sale have not, as shown by commercial reports and statistics, reduced the price of the higher grades of butter. The most reliable writers in this country on food products, and those who have given the subject careful study, state that oleomargarine, carefully and properly prepared, is a healthful article of diet and a wholesome substitute

for butter and can be furnished at less cost. To prevent its sale as butter, which in appearance it so closely resembles, and to compel its exposure for sale as oleomargarine, the laws enacted for the control of the manufacture of and traffic in it should be rigidly enforced. This is no less due to the producers than to the consumers of butter, and

to the public.

It is believed that very little of the oleomargarine manufactured in the country is placed upon the market without the payment of the tax. There are, however, many evasions of the laws by wholesale and retail dealers who have paid special taxes as such, and in some parts of the country produce dealers who sell oleomargarine seek to evade the payment of the special tax. Both authorized and unauthorized dealers sell and offer it for sale as butter, resorting to various methods to deceive the purchasers or to avoid the penalties imposed by State laws prohibiting its sale. It is sold in unstamped packages, or in packages on which the marks and brands are illegible, or which are carefully concealed from the purchaser and can only be discovered by very close inspection. The laws and regulations governing the traffic in this article are not unreasonable or oppressive. Their requirements are only such as it is believed are necessary to compel the dealers to sell the article for what it really is and under its proper name. The demand for it as a food product has become so universal that, in my opinion, opportunity should be offered for its legitimate sale in any community. where it is wanted by consumers.

The special taxes imposed upon wholesale dealers (\$480), and retail dealers (\$48), are exorbitant compared with the special taxes imposed upon other occupations, and I respectfully submit for your consideration the propriety of a reduction of the special tax imposed upon wholesale dealers in oleomargarine to \$120, and the tax imposed upon retail dealers to \$12 per year. I am satisfied that the reduction of the taxes to the

sums above named would not result in a loss of revenue.

The existing laws imposing the tax and regulating the manufacture, sale, and exportation of oleomargarine are deficient in many respects. A reënactment of the laws would, no doubt, be the wisest and most effective way of correcting the existing defects; but, if that is not practicable, I recommend that the amendments which are regarded as of most importance and which were suggested by my predecessor in his annual report for the year ended June 30, 1892, be enacted.

BOUNTY ON SUGAR.

The bounty on sugar is authorized by the tariff act of October 1, 1890, commonly known as the McKinley Bill. The law provides—

That on and after July first, eighteen hundred and ninety-one, and until July first, nineteen hundred and five, there shall be paid from any moneys in the Treasury not otherwise appropriated, under the provisions of section three thousand six hundred and eighty-nine of the Revised Statutes, to the producer of sugar, testing not less than ninety degrees by the polariscope, from beets, sorglum, or sugar cane grown within the United States, or from maple sap produced within the United States, a bounty of two-cents per pound; and upon such sugar testing less than ninety degrees by the polariscope, and not less than eighty degrees, a bounty of one and three-fourths cents per pound, under such rules and regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall prescribe.

The first requirement necessary to be taken by a sugar producer who intends to apply for the bounty is to file, prior to July 1 of each year, with the Commissioner of Internal Revenue, a notice of the place of production, with a general description of the machinery and methods to be employed by him, with an estimate of the amount of sugar proposed to be produced in the current or next ensuing year, including the number of maple trees to be tapped, and make an application for a license, which notice and application must be accompanied by a bond in the prescribed amount. Upon receiving the papers, if the same are satisfactory and approved, a license is issued by the Commissioner.

After the sugar has been produced and placed in the required packages it is weighed by deputy collectors appointed by the collectors of the respective districts, either at the place of production or at designated central stations, and samples are taken for the inspection of the

officer whose duty it is to determine the classification.

It is necessary under the law to classify the sugar for payment of the bounty according to the polariscopic test. The utmost care is required in the use of the polariscope and other apparatus connected with it to secure accuracy.

All weights, flasks, polariscope tubes, and quartz control plates used in the work of testing sugar by the polariscope are standardized and their accuracy tested by the Office of Weights and Measures, U. S.

Coast and Geodetic Survey.

The law had been in operation two years July 1, 1893, and during that time the sum of \$16,717,208.67 has been distributed, most of which has gone to the producers of cane sugar, mainly in Louisiana. The distribution of such a large amount of money has devolved upon this office much work, requiring thoroughness and system for its successful performance.

There were 6,753 sugar producers licensed to manufacture sugar during the fiscal year ended June 30, 1893, and the sum of \$9,375,130.88

was paid as bounty upon 482,125,081 pounds of sugar.

The work of weighing, sampling, and testing so large a quantity of sugar, examining the books and returns of weighers and sugar producers, inspecting the factories, and performing the duties necessary to carry out the law and regulations requires a large number of employés during the sugar making season.

The number of deputy collectors, clerks, messengers, and laborers employed last year in the different collection districts was, besides the

12 inspectors appointed by the Commissioner, as follows:

First district California	10
Florida	3
Kansas	
Lonisiana	241
Maryland (includes District of Columbia)	4
Third district Massachusetts	. î
Montana	
Nebraska	1
New Hampshire (includes Maine and Vermont)	115
Fourteenth district New Nork	9
Twenty-first district New York.	23
Twenty-eighth district New York	
Twenty-eight district New Fork	10
Tenth district Ohio	
Eighteenth district Ohio	24
Twenty-third district Pennsylvania	
Third district Texas	
Fourth district Michigan	6
Total employed	458

Most of these were temporary appointments.

The expense of paying the bounty last year was, as nearly as can be estimated, as follows:

Additional deputies, clerks, and employés	\$97, 890, 33
Laboratory supplies, etc	1, 265. 01
Sugar inspectors	30, 260, 93
Salaries of clerks, etc., in office of Commissioner of Internal Revenue	9, 170.00

being \$9,245.34 less than the previous year.

Certain expenses can not always be exactly proportioned between the sugar-bounty work and the general work of the Internal Revenue Service.

NUMBER OF SUGAR PRODUCERS LICENSED 1891-'92.

The number of producers of sugar licensed during the fiscal year ended June 30, 1892, was as follows:

Producers of sugar from sugar cane		7 27
Producers of sugar from beets		7
Producers of sugar from sorghum	· · · · · ·	_ 6
Producers of sugar from sorghum Producers of sugar from maple sap	4	4,240

The amount of cane sugar which tested below 80° was 363,428 pounds. No beet nor sorghum sugar that was weighed tested below 80°.

The following statement shows the quantity of each grade of cane sugar upon which bounty was allowed by this office and the State in which produced:

a VACUUM-PAN SUGAR.

- State.	No. of pro- ducers.	Testing 90° and over.	Testing 80° to 90°.	Total.
Louisiana. Texas. Florida	345 8 1	Pounds. 335, 867, 670 7, 409, 943 55, 515	Pounds. 32, 866, 588 369, 300 133, 939	Pounds. 368, 734, 258 7, 779, 243 189, 454
Total	354	343, 333, 128	33, 369, 827	376, 702, 955

b OPEN-KETTLE SUGAR.

Louisiana. Texas. Florida Mississippi	6 11	8, 389, 551 1, 743 3, 043		74, 942, 489 1, 158, 988 23, 877 3, 043
Total	301	8, 394, 337	67, 734, 060	76, 128, 397
Total in United States	655	351, 727, 465	101, 103, 887	452, 831, 352

The quantity of cane sugar included in bounty claims allowed but not paid July 1, 1893, exceeded by 2,197,437 pounds the quantity of cane sugar covered by bounty claims allowed but not paid July 1, 1892. This accounts for the excess in the quantity of sugar upon which bounty was allowed over the quantity upon which bounty was paid.

SUGAR PRODUCTION 1892-'93.

The production for the year 1892-'93 of sugar of all kinds was, according to reports and estimates, as follows:

Cane sugar:			Pounds.	
Louisiana			445, 854, 797	
Mississippi			3,043	
Texas			9, 068, 077	
Florida		· · · · · · · · · · · · · · · · · · ·	215, 464	Pounds.
· .		. "		455, 141, 381
Beet sugar:				
California			21, 801, 288	
Nebraska			3, 808, 500	
Utah			1, 473, 500	
•				27, 083, 288
Sorghum sugar:	*			
Kansas				1,026,100
Kansas		• • • • • • • • • • • • • • • • • • • •	• • • • • • • • • • • • • • • • • • • •	32, 000, 000
Total production in the U	nited States		· · · · · · · · · · · · · · · · · · ·	515, 250, 769

The estimate of the maple-sugar production is based on the census returns of 1890.

The quantity of sugar reported as produced during the year does not correspond with that upon which bounty was paid. Some of the sugar produced tested below 80°, as stated; bounty was also paid upon some sugar produced during the previous year, and a considerable number of claims for bounty on sugar produced last year were not received prior to July 1 and will be included in the accounts for the current fiscal year.

No bounty at all was paid during the last fiscal year on maple sugar produced during that year, the payments reported covering exclusively the production of 1891–'92.

The quantity of sugar in process of manufacture July 1, 1893, according to estimates, was as follows:

State or Territory.	Material.	Estimated number of pounds.
LouisianaTexas	do	16,500
Florida Kansas California	Sorghum	. 10,000 3,946,355
Utah Nebraska		
Total		8, 602, 918

SUGAR FROM SUGAR CANE.

There were 618 producers of sugar from cane licensed in the district of Louisiana (including 1 in the State of Mississippi) during the past year, 16 in Florida, and 16 in Texas; total, 650.

The total quantity of acres of cane ground and made into sugar, according to figures furnished this office, was as follows:

District of Louisiana	180 645
District of Louisiana Third district of Texas	4,652
District of Florida	68
Total	105 965
Quantity reserved for seed	44, 287
Quantity under cultivation	220 652

The acreage of cane under cultivation for the coming crop, as reported by applicants for license, is as follows:

District of Louisiana Third district of Texas Florida	281, 667½ 7, 060 1, 213
TotalQuantity to be reserved for seed	

take out no license to produce sugar but sell cane or sirup produced therefrom to licensed sugar producers not included in the above statement, making probably 10,000 acres additional.

The operation of the law in relation to the bounty on sugar has had the effect so far as cane sugar is concerned to increase the production and to lessen the number of sugar factories or licensed producers.

In the district of Louisiana, where cane sugar is principally made, there were during the first season in which the law was in operation, that of 1891–'92, 697 producers licensed to manufacture sugar, and the product of that period aggregated 357,875,557 pounds.

The number of producers licensed during the season of 1892–'93 was 618, and the amount of sugar produced aggregated 445,857,840 pounds, an increase of 87,982,283 pounds, notwithstanding a reduction of over 11 per cent in the number of licensed producers.

The number licensed to manufacture sugar in that district during the present fiscal year is 552. There will undoubtedly be a large increase in production over that of last year, probably 20 per cent, unless some

unusual accident, such as an early frost, should supervene.

The average price paid for cane purchased for sugar manufacture in Louisiana is said to be \$4 per ton delivered at the nearest railroad station as against \$2.50 and \$3 per ton in former years delivered at the factory. In some instances contracts are made on the basis of the amount of sugar that the cane will produce, one half the product in sugar being allotted to the factory and one-half to the cane cultivator. In some localities it is the custom, in addition to a specific price per ton, to allow a certain per cent increase in the event that the extraction exceeds a certain limit.

It is estimated that \$2,000,000 have been invested in Louisiana in improved machinery for making sugar since the beginning of the present year, the full effect of which will not be seen and appreciated until the conclusion of the coming season. These changes in the machinery of sugar factories result in a more economical manufacture of sugar and indicate a gradual departure from the primitive and more wasteful methods formerly in use.

Although there were 618 licensed sugar producers in the district of Louisiana during the season of 1892–'93, only 569 made sugar, of which 295 used the vacuum pan process of manufacture, 272 the open kettle

process, and 2 used both methods.

Of the 552 sugar producers licensed in the district of Louisiana for the current year 299 gave notice that they intend to use the vacuum-pan process of manufacture either at the home factories or at factories not owned or operated by themselves, and 250 intend to use the opeukettle process or open steam train. Three intend to use both methods, making part of their sugar by open-kettle process and part by the vacuum pan and centrifugals.

The methods of evaporation are as follows: First, by the use of open kettles, over a direct fire, from two to six kettles being used. Starting from the mill the juice is carried from the first kettle into a second, and then into a third kettle as it increases in density through evaporation until it becomes sirup of about 25° Beaumé before it reaches the last kettle or strike pan, where it is further boiled until it shows signs of crystallization, when it is removed to cooling troughs for granulation and afterward to hogsheads with purging holes for When sufficiently purged of molasses the product enters the market as open-kettle sugar. Second, with the process of steam train, open metal tanks with steam coils are used instead of kettles and direct heat (seldom more than three tanks are used with separate strike pans). The juice leaving the clarifiers enters the first evaporator and as it increases in density is carried into the second, and then into the third evaporator, from which it is pumped into the strike pan at about 25° Beaumé and boiled by further use of the coils until it shows signs of crystallization, when it is removed to coolers and treated as openkettle sugars. Many producers using steam trains granulate their sugar by vacuum pans and centrifugals and make first and second instead of open-kettle sugar; again, many open-kettle producers have separate strike pans with steam coils, and certain others boil to sirup of 250 Beaumé and granulate by vacuum pan and centrifugals.

The third and last method of evaporation by vacuum, single, double, and triple effect, is alike in some respects to the steam train except that the receptacles or evaporators are covered and air-tight with vacuum produced through pumps, causing the juice to boil and evaporation to take place at a lower temperature, 140° to 170° F. against 212° F. or over in open pans. Steam coils are also used here. The vapor of the first effect becomes the heating power of the second and so continues through the several evaporators. This method also brings sirup to the density of 25° or 26° Beaumè when it enters the vacuum pan for granulation.

In the classification of the sugar producers, for office purposes, there are two kinds of vacuum pan and open-kettle sugar producers, namely, those who make their sugar at factories owned and operated by themselves and those who have their sugar made at factories not owned or operated by themselves. Some producers make sirup at one factory which they own and have it granulated at another factory, often a central factory.

(2) Per 1,000 pounds of open kettle sugardo	

22,986 samples of sugar were received at the classification room at New Orleans during the year ended September 30, 1893, of which number, including those forwarded to the laboratory at this office after the closing of the laboratory at New Orleans, June 1, 1893, 8,364 samples were subjected to polariscopic test.

There were weighed in the district of Louisiana last season 22,987

lots of sugar, averaging 50 packages to the lot.

SUMMARY.

Number of licensed producers who had sugar made by open-kettle	
process	294
Number of licensed producers who had sugar made by vacuum pan and	
centrifugals	303
Number of licensed producers who made no sugar	53
Total number of licensed producers	650
Number of persons employed at factories	21, 507
Number of persons who sold cane or sirup to licensed producers	1, 888
Cane raised by persons who sold the cane or sirup produced there-	
from to licensed producers:

BEET-SUGAR FACTORIES.

The sugar-producing season of 1892-'93 commenced July 31 with beets. The Chino Valley Beet Sugar Company, Chino, Cal., commenced on that

Six beet-sugar factories were in operation during the past year, as follows: The Utah Sugar Company, Lehi, Utah; Alameda Sugar Company, Alvarado, Cal.; Western Beet Sugar Company, Watsonville, Cal.; Chino Valley Beet Sugar Company, Chino, Cal.; Oxnard Beet Sugar Company, Grand Island, Neb., and Norfolk Beet Sugar Company, Norfolk, Neb.

The same companies have been licensed for the year 1893-94, and

also the firm of O. K. Lapham & Co., Staunton, Va.

The amount of beet sugar produced in the United States during the season of 1892–'93 was 27,083,288 pounds.

Sugar produced testing 90° or over by the polariscopepounds Sugar produced testing 80° to 90°do	22, 962, 516 4, 120, 772
Totaldo	27, 083, 288
Total bounty paid	\$531, 363. 81

A comparison of the production with that of the previous year by localities shows that the greatest increase in production was in California, as follows:

777	Production.	
Place of production.	1891–'92.	1892–'93.
Utah	Pounds. 1, 094, 900	Pounds. 1 '473, 500
California Nebraska	8, 175, 438 2, 734, 500	21, 801, 288 3, 808, 500
Total Increase of production of 1892 over 1891.	.12, 004, 838	27, 083, 288 15, 078, 450

The three beet-sugar factories in California consumed 9,070 acres of

beets, making 2,403.7 pounds of sugar per acre of beets.

The two Nebraska factories consumed 2,968 acres of beets, making

1,283.2 pounds of sugar per acre.

The Utah factory consumed 1,090 acres of beets, making 1,351.8 pounds of sugar per acre.

The tons of beets consumed in the production of sugar was as fol-

lows:

California	· · · · · · · · · · · · · · · · · · ·	95 703 9
	. ' ,	

The beet-sugar factories reported 24,793 acres of beets under cultivation for this year's crop and estimated the amount of sugar to be produced at 57,200,000 pounds.

The following is a statement of the acres under cultivation in each State and the estimated production:

BEET SUGAR, 1893-'94.

			•	· ·	Acres of beets under cultivation.	Sugar pro- posed to be produced.
Utah California		• • • • • • • • • • • • • • • • • • •			3,500 15,993 4,900 400	Pounds. 6, 000, 000 43, 500, 000 7, 000, 000 700, 000
Total	· · · · · · · · · · · · · · · · · · ·	•••••		••••••	24, 793	57, 200, 000

The estimate of production made by the producers at the date of application for license is always in excess of the actual result. It is what they hope to make if all conditions are favorable. The quantity of beets consumed in manufacture does not equal that under cultivation. There is a loss on account of improper cultivation, from insects or the elements—frost, excessive rains, winds, etc.—so that all the beets cultivated will not be used for making sugar. There were 17,314 acres cultivated last year and the factories proposed to make 48,500,000 pounds of sugar. The result showed 13,128 acres consumed and 27,083,288 pounds of sugar produced. The per cent of sugar contained in the beets can not be determined in advance. The condition of the beets now being harvested for this year's crop is for the most part good. The actual production of sugar will probably reach 40,000,000 or 45,000,000 pounds judging from the present outlook.

SUMMARY OF OPERATIONS OF BEET-SUGAR FACTORIES, 1892-'93.

Total number of factories	6
Average number of days in operation

SUGAR MADE FROM SORGHUM.

There were only two sorghum-sugar factories in operation during the past year: the Medicine Lodge Sugar Company, Limited, Medicine Lodge, Kan., and the Parkinson Sugar Company, Fort Scott, Kan. They were in operation an average of forty-nine and one-half days, produced 1,026,100 pounds of sugar, and received \$19,798 as bounty.*

They have been licensed for the current year and report 3,953 acres of cane under cultivation.

FI 93-42

Digitized for FRASER http://fraser.stlouisfed.org/ Federal Reserve Bank of St. Louis

^{*}Besides this the sum of \$19 was paid to a producer in Minnesota, liceused last year.

The following is a summary of their operations last year:

SUMMARY STATEMENT OF OPERATIONS OF LICENSED SORGHUM-SUGAR FACTOR-IES DURING THE YEAR ENDED JUNE 30, 1893.

Total sorghum cane ground: Acres	4.8
Sugar produced: Testing 90° and over	
Quantity of sugar produced per acre	474. 8 99. 4 141, 918 49. 5

The production of sugar for the current year will not be as large as last year on account of the unfavorable season. The dry weather operated adversely and the cane was damaged by "chinch bugs."

Period of Operations and Number of Employés at the Beet and Sorghum Sugar Factories during the Fiscal Year ended June 30, 1893.

			Operating period. a

VI.—QUANTITIES OF CAME SUGAR PRODUCED IN THE UNITED STATES DURING THE PAST TEN YEARS, FROM 1884 TO 1893, INCLUSIVE.

[From Statistical Abstract of the United States, 1892, p. 221, except for the year 1892-'93. The figures for that year are from reports made to the Commissioner of Internal Revenue.]

Year.	Pounds.	Tons of 2,240 pounds.
1883-'84 1884-'85 1885-'86 1886-'87 1887-'88 1888-'89 1889-'90 1890-'91 1891-'92 1892-'93	225, 962, 963 302, 754, 486 191, 282, 272 375, 904, 197 344, 756, 221 305, 766, 271 497, 169, 856 370, 579, 307	135, 245 100, 876 135, 158 85, 394 167, 814 153, 906 136, 505 221, 95 165, 487 203, 188

The year 1890-'91 was an exceptional year, if not altogether unprecedented, in its phenomenal yield of sugar per acre. The aggregate of the crop was the largest ever made except in 1861 (Bouchereau's report).

The shortness of the crop of 1891-'92 was due to inferiority of seed, unfavorable weather, and extra quantity of seed put down for the next

year's crop (Bouchereau's report). The figures for that year as given in the Statistical Abstract are somewhat larger than those reported to the Commissioner of Internal Revenue. The Commissioner's report (1892) stated the reported production as 367,752,306 pounds. Bounty was paid on 364,829,411 pounds.

DIVISION OF CHEMISTRY.

The chemical work in connection with internal revenue laws and regulations, was carried out essentially in the same way as in the preceding fiscal year. The testing of sugar was performed mainly at laboratories located in the sugar-producing districts under the control of the collectors of such districts, and partly at the central laboratory in Washington. All the samples of maple sugar produced outside of the New England States were tested this year at Washington, the laboratory at Syracuse, N. Y., having been discontinued.

SUGAR WORK.

The following table shows the number of samples of sugar tested, and the number of tests made in the different laboratories:

	Samples tested.	Tests made.
Lebi, Utah Norfolk, Nebr Fort Scott, Kans St. Cloud, Fla	43 86 32 11	86 172 73 20
Austin, Tex Montpelier, Vt San Francisco, Cal New Orleans, La	7,852 914 8,107	11, 844 13, 039
Washington, D. C. Total Increase over last fiscal year	24, 338	11, 452 36, 686 12, 719

In the San Francisco laboratory there were analyzed in addition to the sugar work—

Samples of fortified sweet wines	707
Samples butter	10
Sample oleomargarine	1
Samples of distillery wash	17

I have the honor to be, very respectfully,

Jos. S. MILLER, Commissioner.

Hon. J. G. CARLISLE, Secretary of the Treasury.

REPORT OF THE CHIEF OF THE BUREAU OF ENGRAVING AND PRINTING.

TREASURY DEPARTMENT,
BUREAU OF ENGRAVING AND PRINTING,
October 2, 1893.

SIR: I have the honor to submit herewith tables showing the results of the operation of this Bureau for the fiscal year ended June 30, 1893. During the period covered by this report Mr. William M. Meredith was Chief of the Bureau.

Very respectfully,

CLAUDE M. JOHNSON,
Chief of Bureau.

Hon. JOHN G. CARLISLE, Secretary of the Treasury.

REPORT OF THE REGISTER.

TREASURY DEPARTMENT,
OFFICE OF THE REGISTER,
Washington, D. C., October 31, 1893.

Sin: I have the honor to submit the annual report of the business

of this office for the fiscal year ending June 30, 1893.

My connection with the office dates from July 1, 1893. This entire report, therefore, covers the work of this office under the efficient management of my predecessor, Gen. W. S. Rosecrans.

The business of the office has been conducted with a force of 108

persons, at a cost of \$139,750.

The work is distributed between four divisions, with a chief at the head of each. The following is a report in detail of the work of each division:

RECEIPTS AND EXPENDITURES DIVISION.

CONDITION OF THE UNITED STATES TREASURY FOR THE FISCAL YEAR ENDING JUNE 30, 1893, AS SHOWN BY THE BOOKS OF THE RECEIPTS AND EXPENDITURES DIVISION.

Balance in the Treasury June 30, 1892 (including \$28,101,644.91 on deposit with the States, under act of June 23, 1836) \$778, 604, 339.28.

NET RECEIPTS.

Digitized for FRASER

During the year \$400,000 have been added to the amount outstanding on the new District of Columbia 3½ per cent loan, issued under the act of March 3, 1891. These bonds were issued to provide funds for the redemption of the twenty-year funding loan of the District of Columbia and 7 per cent market stock, payable in July, 1892, and completes the amount which it is proposed to issue under the act of March 3, 1891.

The following bonds, issued by the District of Columbia when under a Territorial government and redeemed by the Treasurer of the United States, were recorded in the books of the division during the year:

	Loans.		Number of bonds.	Amounts.

SPANISH INDEMNITY CERTIFICATES.

The original issue of Spanish indemnity certificates occurred during the years 1834 to 1842. When a dividend of interest was received from the Government of Spain and paid to the holders of the certificates, a stamp showing the fact was placed upon each certificate. the lapse of nearly half a century since the original issue, the stamps accumulated upon the back and in many cases upon the face of the certificates, until there was but little or no space left for additional entries. Many of the certificates also had become badly worn and defaced. Under these circumstances it was deemed best to call in the whole issue This has been done except in the case of six and substitute new bonds. certificates which as yet have not been reached on account of inability to trace the ownership. The installment of interest upon these six certificates has been for many years returned unclaimed. The method of paying interest has also been changed, and checks for the amounts due each owner will in future be forwarded to each holder of a certificate as often as the funds are received from the Spanish Government.

The amount of new certificates issued is shown in Table C. As compared with previous years, the amounts are as follows:

Year.	Amounts.	Year.	Amounts.
	165, 404. 58	1890-'91	10, 189, 70
	13, 770. 26	1891-'92	61, 565, 77

The only new bonds which were received (from the printer) during the year were 840 impressions of the District of Columbia issues, amounting to \$2,025,750.

No surplus bonds were delivered to the committee for destruction of

United States securities.

The following table shows the number and amount of blank bonds on hand, received and issued during the year (see also Statement D):

	Number of bonds.	Amounts.
Blank bonds on hand July 1, 1892	99, 312 840	\$441, 015, 300 2, 0 25, 750
Total	100, 152	443, 041, 050
Bonds issued during year. Blank bonds on hand June 30, 1833.	15, 796 84, 356	59, 396, 050 383, 645, 000
Total	100, 152	443, 041, 050

The number of unissued bonds on hand June 30, 1893, was 14,956 less than one year earlier, and the amount represented by such bonds was \$57,370,300 less than at the beginning of the fiscal year.

was \$57,370,300 less than at the beginning of the fiscal year.

The following table gives a summary of blank bonds on hand and received since July 1, 1885, with the manner of their disposition. Spanish indemnity bonds are excluded, but District of Columbia bonds, issued under the direction of Treasury Department, are included:

The following table gives a classification under three principal heads of the outstanding registered bonds in each of the latest loans, as shown in connection with the dividends due July 1 and September 1, 1893; the amounts are twelve months later than those given in the last report:

Loan and date.		Foreign.	Treasurer United States in trust for national banks.	Domestic.	Total.
4 per cent, July 1; 1893		43, 200	\$153, 150, 500 13, 548, 000 23, 921, 850	\$329, 194, 000 51, 075, 512 264, 000 1, 442, 650	\$486, 739, 500 64, 623, 512 307, 200 25, 364, 500
Total	••••••	4, 438, 200	190, 620, 350	381, 976, 162	577, 034, 712

The changes in these items during the last twelve months have been as follows:

(Increase, +; decrease, -.)

Loan.	Foreign.	Treasurer United States in trust for national banks.	Domestic.	Total.
4 per cent	_ 20,000	+\$10, 094, 300 + 960, 000 + 206, 000 + 11, 260, 300	-\$7,778,250 - 960,000 - 284,000 - 206,000 - 9,228,250	+\$1,832,500

FOREIGN HOLDERS OF UNITED STATES BONDS.

The term "foreign" is applied to the ledgers upon which are posted the names of owners who desire their interest checks sent to some foreign country. In a few cases the owners are American citizens, living abroad for a more or less extended period, but the larger portion is the property of foreigners. Various inquiries have been received in the office asking for statements showing the amount of United States bonds owned by citizens of other countries, but from the nature of the case it has been impossible to furnish more than very rough approximations. From such examinations as it is possible to make it is evident that a large proportion of the registered bonds owned abroad are controlled by agents resident in this country. As a rule, the home of the owner does not appear upon the bond itself, nor is its location furnished to the Department, except when it becomes necessary to assign the bond. The only person with whom the Department deals until the necessity arises for some change in the investment is the American agent. Names which from their form are generally called "foreign," have become so common in this country as to afford almost no test of the residence of their owners.

In October, 1892, the names of holders of registered bonds, who for various reasons were supposed to be of foreign nationality, were compiled and found to amount to about \$18,800,000, out of which only \$4,830,300 appeared upon the foreign ledgers. The total amount (foreign and domestic) appearing upon the dividends which were examined was \$575,121,012. Although no claim for accuracy can be made for this amount held by foreign owners, it must necessarily be far nearer the actual facts than the extravagant guesses which have oftentimes been made and printed. No attempt was made to estimate the amount of United States coupon bonds held abroad.

It may be noted that the increase of \$11,260,300 in amount held by the Treasurer of the United States for national banks does not include the large amounts issued on the same account during the financial stringency in July and August, 1893.

The foregoing tables do not show the same changes as are exhibited in tables A and B, as coupon bonds are included in the latter. Neither are the dates in the two sets of tables the same.

The total number of open accounts in connection with the four United States loans included in the foregoing tables were, at the dates given, as shown below. The three District of Columbia and the Spanish indemnity loans are also given at the last dividend periods, together with a comparative statement for the last seven years.

COMPARATIVE NUMBER OF OPEN ACCOUNTS FOR LAST SEVEN YEARS.

Such time as could be spared from the other work of the division by two clerks has been devoted to continuing the preparation of a general and consolidated index to all registered bonds upon the loan of 1848 and subsequent loans. At the close of the year it had been brought down to include the loan of 1864, 10.40.

The plan adopted is that of the card index, which is believed to afford the readiest form to ascertain the facts required, and to render it possible to more fully cover every contingency. The number of cards prepared was 31,864, of which 30,681 were examined. The total number of references on the consolidated index to different accounts upon the ledgers of the various loans on July 1 was 128,342.

Table E herewith gives the usual summary of work performed by the division, although a large part of it does not admit of of any statement in tabular form.

NOTE, COUPON, CURRENCY, AND FILES DIVISION.

The following is a synopsis of the tables covering in detail the various branches of the work performed by this division during the year:

Table 1. Redemption of gold certificates of deposit, act of July 12, 1882, series of 1888, and payable to order. There were registered of these certificates 4,533, amounting to \$33,770,000, showing a slight increase in number and amount on the work of the last fiscal year. A summary is added to the table giving the total number and amount received and on file in this division to June 30, 1893, aggregating in number 16,426, and in amount \$126,275,000.

Table 2. Currency certificates of deposit, act of July 8, 1872, with places of issue and payment. There were received and registered during the year 6,099 certificates, amounting to \$60,980,000, showing an increase on the work of last year. The summary attached gives the total number and amount on file to June 30, 1893; in num-

ber 113,405, and amount \$1,031,895,000.

Table 3. Interest checks of various loans on hand at the beginning, and received, counted, and registered during the fiscal year. There were counted and tied in packages 102,111; registered, examined, labeled, and filed, 108,229, amounting to the sum of \$19,975,335.18, leaving on hand July 1, 1893, to register, examine, label, and file, 7,762, amounting to \$693,173.50, which were received too late in June to finish.

Probably due to the purchase of registered bonds by the Department during the year, and the light receipts of the outstanding checks of the retired 4½ per cent loan there was a decrease of 44,284 checks in receipts, which will account for the corresponding decrease in the amount of work during the year.

Table 4 gives the total number and amount of interest checks of all the loans on

file to June 30, 1893. In number 3,310,079, and in amount \$608,741,404.65.

Table 5 shows the number of redeemed detached coupons on hand from the preceding year, and number received, counted, arranged, registered, examined, labeled, and boxed during the year.

There were received 639,408 coupous, an increase of 11,404 on the receipts of the The various branches of the work, however, show a decrease in the last fiscal year. amount of labor performed, which is directly chargeable to the frequent temporary transfers from the regular coupon force to the currency section of this division, where at times the work was both heavy and pressing, besides urgent calls for copying of accounts in the file rooms, and occasional details to other bureaus of the Department. The clerk in charge of the coupon work reports the time taken from the coupon force during the year as follows: Counting currency, 209½ days; copying accounts, 83; miscellaneous work, 183; details to other bureaus, 64; in the aggregate,

Table 6 gives the total number and amount of redeemed (detached) coupons

received during the fiscal year; also the total number and amount received and filed in this division to June 30, 1893; in number 98,372,861, in amount \$1,204,367,472.92.

Table 7. Coupon-bond work, the receipts in number of bonds being 19,615, with 237,839 coupons attached, and amounting to \$12,202,650, a slight increase on the receipts of last year.

At the close of the year all were registered, examined, and filed, leaving none on

hand at the opening of the current fiscal year.

Table 8. Coupon bonds of all the various loans of the Government received and registered in this division to June 30, 1893, including those destroyed and those now on file, in number 4,261,937, with 131,133,091 coupons, and in amount \$2,514,585,800. Prior to May 10, 1881, all coupon bonds were destroyed after registration in this division, at which time the order was revoked and since that date they have been placed on file for reference in cases of disputes as to the payment of principal or interest, the whole number of coupon bonds destroyed being 2,363,085, with 76,842,128 coupons attached, and amounting to \$1,421,687,450, which, deducted from the table including the whole number and amount, leave on hand and on file to June 30, 1893, 1,898,852 bonds, with 54,290,963 coupons attached, amounting to \$1,092,898,350. Table 9. Coupon bonds entered in the numerical registers of this division and

returned to the loan division for further examination and not included in the preceding table. During the current fiscal year these bonds will be returned and placed

on file

Table 10. Coupon bonds received and retired before issue and entered in the

numerical registers as statistical matter and destroyed.

Table 11 contains the work of the currency section of this division, which is located in room 23, and shows the receipts, count, cancellation, and destructions of various issues of currency, consisting of United States notes, gold and silver certificates, fractional currency, and refunding certificates.

The total number of pieces of all issues received during the year being 47,529,403, amounting to \$289,575,218, an increase of 9,346,668 in pieces and \$85,311,810.02 in

amount on the receipts of last year. This marked increase was occasioned by the heavy receipts during the months of January and February, and alleged to have been caused by the supposition that the old and worn outstanding notes contained

the germs of cholera.

The redeemed currency is received daily, and being pressing current work and closely connected with the corresponding work in the offices of the Secretary and Treasurer, additional force was required to complete the count and examination of each day's receipts; therefore an average number of twenty-five counters for an average number of twenty-six days each were appointed, payable from the appropriation of July 14, 1890, and detailed from the office of the Secretary, to assist the regular force of this division. At intervals of delay during the progress of the work the additional employes were engaged in restrapping coupons with copper wire, a necessary measure for the preservation of the coupon files, and a matter long delayed on account of more pressing business. During the time so employed 35,774,963 coupons were restrapped and the whole work completed. After their services were no longer required, all were dismissed or transferred to other bureaus of the Department. excepting four counters, who are at present employed in the currency section. Owing to the large increase in the receipts of currency, I would strongly urge that an effort be made to retain the additional four counters to meet the currency requirements.

Table 12 contains the total number and amount of United States notes, gold and silver certificates, and fractional currency of each issue, series, and denomination redeemed during the fiscal year, and total redemptions of the same since first issue. The total footings of each class of issues aggregated amount to the sum of \$3,525,502,128, received since the division was organized.

Table 13 gives the dates of issue of various issues of United States currency and

dates when each issue ceased.

Table 14 gives, by issue and denomination, the number and amount of United States interest-bearing notes and certificates issued, redeemed, and outstanding to June 30, 1893, a recapitulation of which shows that, according to the books of this division, there are still outstanding the following amounts of each class of these securities: Seven-thirty notes, issued under various acts, \$138,850; one-year 5 per cent Treasury notes, \$33,475; two-year 5 per cent Treasury notes, \$23,150; three-year 6 per cent compound interest notes, \$179,250; gold certificates, act March 3, 1863, \$260,320; certificates of indebtedness of 1862 and 1863, \$3,000; 3 per cent certificates of indebtedness of 1862 and 1863, \$3,000; 3 per cent certificates of indebtedness of 1862 and 1863, \$3,000; 3 per cent certificates of indebtedness of 1862 and 1863, \$3,000; 3 per cent certificates of indebtedness of 1862 and 1863, \$3,000; 3 per cent certificates of indebtedness of 1862 and 1863, \$3,000; 3 per cent certificates of indebtedness of 1862 and 1863, \$3,000; 3 per cent certificates of indebtedness of indebtedness of indebtedness of 1862 and 1863, \$3,000; 3 per cent certificates of indebtedness of indebt tificates of 1867 and 1868, \$5,000, and 4 per cent refunding certificates of 1879, \$72,710. These amounts appear as outstanding on the records of this office at the close of the year. They may not be actually outstanding, as this Bureau is the last to receive the redeemed securities of the Government; consequently the amounts reported as redeemed will be less than the actual redemptions of the Treasurer of the United States by the amounts in transitu in the offices of the First Auditor and First Comptroller, and the amounts reported as outstanding correspondingly increased.

Table 15 gives the amount and character of work performed in the files, located in rooms 10 and 41, basement, and 15, fourth story, of the building. There is an apparent increase of work in all the leading branches of the current files for the year, which will necessarily continue in a corresponding degree with the increasing business of the Department, and in a short time more space will be required for the proper filing

of accounts.

Note.—Until February, 1867, no Comptroller's schedules were received with these coupons, and recent references to those received prior to that date indicate that they were not accurately classified under their respective loans, but it is believed that in aggregate number and face value this statement is in the main correct.

VII.—Number and Amount of Exchanged, Redeemed, and Exchange Extended United States Coupon Bonds and Number of Attached Coupons Examined, Counted, Entered in Blotters, Transferred to the Numerical Registers, and Scheduled in Duplicate During the Fiscal Year Ended June 30, 1893.

[E.—Exchanges, i. e., conversions into registered bonds. R.—Redemptions, i. e., paid at maturity or under "call." E. E.—Exchange extensions, i. e., conversions into registered bonds at a lower rate of interest.]

NUMBER OF INDEX RECORD CARDS WRITTEN AND DISTRIBUTED.	
NUMBER OF INDEX RECORD OARDS WRITTEN AND DISTRIBUTED.	
Index record cards written 93.072	
Index record cards examined and classified under their appropriate heads, alphabet-	
ically arranged under subjects and catch-words, and placed in the file cases 90, 322	

In the last report of the progress made in ascertaining the interest paid by loans, under this head, the following statement was made: "It

will take at least another year to complete this branch of the work with the present force employed."

It is gratifying to be able to now state that, under many disadvantages, the labor of analysis has since been carried to almost perfect completion, and it is hoped that within the next month a satisfactory tabulated statement of the result will be ready for submission. When the work under this branch is completed, the force engaged on it will begin the work of ascertaining the premiums and discounts on the loans, as contemplated by the order of the Secretary dated January 4, 1886.

It is also desirable that the mass of data on which is based the analysis of the interest paid, by accounts and vouchers, should be preserved by properly entering it in classified form in books suitable for that purpose, which would forever after afford a ready and reliable source of reference. This work was begun at one time and suspended for want of sufficient force to carry it on. The continuance of it may be deferred till the premium and discount work is finished.

The work of the index record-card system has progressed very satisfactorily during the past year, with the small force employed, fifteen additional years having been completed, making twenty-five years of the expenditures of the Government finished since the beginning of the

work in November, 1891.

J. FOUNT. TILLMAN, Register.

The Hon. Secretary of the Treasury.

adgments of the Court of Claims and of circuit and district courts examined and certified	
onsular drafts registered	1.

In the above table, relating to the accounts settled during the past year, amounting to \$5,946,287,524.98, the figures are stated as "the amount involved in footings." It has been the practice to report the amounts in this way. The figures are of course very much larger than the aggregate involved in the accounts themselves, as they include balances of former accounts, which form the first item in subsequent accounts; and in the case of the accounts of the Treasurer of the United States these balances are necessarily large. It would be very difficult and take considerable time of the clerks to so keep the account of the current work as to show only the exact amount of the accounts independently of these balances, and it is not believed to be of sufficient importance to justify the labor that would be required.

In addition to the work stated in the foregoing tables, there is much done in this office that is not capable of classification and report. This work consists principally in that which is done by the Comptroller and the Deputy Comptroller personally; it consists of the decisions upon the legal questions involved in the accounts which are adjusted and in the investigations of the law for the purpose of rendering these decisions; and also in investigations and decisions upon the sufficiency of the evidence furnished in claims for the issuing of duplicate bonds and other securities of the United States which have been lost or destroyed. Questions also arise upon the sufficiency of powers of attorney to transfer registered bonds and to collect money due from the United States, and, in the case of the death of claimants, to the legality of the appointments of their executors or administrators. Many demands for information are received from Congress, the Departments and persons interested in matters within the jurisdiction of the Comptroller; and there is also a large amount of miscellaneous work hardly susceptible of enumeration.

Since the passage of the act to provide for the bringing of suits against the Government of the United States, which conferred upon district and circuit courts of the United States the same jurisdiction as was granted to the Court of Claims, very considerable difficulty has arisen in the matter of the accounts of officers of the United States courts. Prior to the passage of that act these claimants, if dissatisfied with the rulings of the Comptroller, were compelled to bring their actions in the Court of Claims. The accounting officers were enabled to con-

FI 93----59

sult directly with the attorneys of the Department of Justice having charge of the cases and could, therefore, fully explain the state of the

claimants' accounts and the position of the Government.

When suits are brought in the district and circuit courts, these explanations have to be made by correspondence which has proved very unsatisfactory, the district attorneys often failing to understand the exact position taken by the accounting officers of the Treasury. In this way many cases are lost which, if personal explanations could be made to the attorneys of the United States, would probably be won. This fact was recently quite clearly shown in an important case in Minnesota. After repeated attempts to explain the Government's position by correspondence, it was deemed wise to send an experienced clerk from the division of judiciary accounts to St. Paul to explain the account to the district attorney in person. The result was that the claimant immediately abandoned a large portion of his claim, and the United States obtained a decision in its favor on everything it claimed except some trifling amounts, which were not deemed of sufficient importance to justify an appeal.

The accounts of all the officers of the court must first be approved by the court before being transmitted to the accounting officers of the Treasury for adjustment. If suit is subsequently brought against the United States before the same judge who approved the account in an executive capacity, he is required to pass upon the same claim in a judicial capacity, while the Government has to be defended by district attorneys whose own claims, under substantially similar laws, will be affected by the outcome of the suit they are compelled to defend.

Another evil of the power to sue in the district and circuit courts, as well as in the Court of Claims, is that there is produced thereby a great variety of decisions upon the same act, and a Comptroller whose decision has been overruled by a court having jurisdiction over accounts passed upon by him, is in many cases compelled to disregard the decision of such court. If the jurisdiction of the Court of Claims were exclusive, the decision of that court, unless appealed from, would be binding upon the Comptroller in all future cases. At present, one court having decided against the ruling of the Comptroller and another court having sustained the same ruling, cases exactly similar may afterward be brought before the court whose decision the Comptroller has refused to follow and which of course will be decided in the same way. This tends to weaken the authority of the Comptroller's decisions and seems disrespectful to the court, whose decisions, if unappealed from, he ought to follow.

This evil has been greatly emphasized since the passage of the act creating the circuit courts of appeals which took away from the Government the right to appeal to the Supreme Court from the decisions of the district and circuit courts in all cases, and placed the Government upon the same plane with other litigants, so that now, unless a claim exceeds \$1,000, the decision of the circuit court of appeals is final. Most of these claims are for comparatively small amounts and it would be easy for the claimants to keep them within the limit of While the claims are small, as a rule they involve questions which affect a large class of officers and establish precedents covering very large amounts. Cases brought against the United States by officers of the court, because dissatisfied with the rulings of the Comptroller in the settlement of their accounts, are in the nature of test cases. The uniformity sought to be obtained by reference under section 1063, Revised Statutes, of a case to the Court of Claims where the

decision will affect a class of cases, has been entirely lost, for the same kind of cases may be brought before the district and circuit courts, who are not bound by the opinion of the Court of Claims. Besides, the judges and district attorneys as a rule do not have the reports of the Court of Claims, which are out of print, and therefore do not know the decisions of that tribunal.

In order to establish uniformity and fixity in the settlement of these accounts, the determination of the highest court should be obtained. This is essential where, in different jurisdictions, the same question has been differently decided. The matter is of more importance than would casually seem to appear. It is therefore respectfully recommended that Congress be requested to take away from district and circuit courts the jurisdiction they now have in cases arising on claims of officers of the courts of the United States in the settlement of their accounts, and that the jurisdiction of the Court of Claims be made exclusive in such cases. If that is not deemed possible, it is respectfully urged that at least there be given to the United States the right of appeal to the Supreme Court without restriction as to the amount involved.

There are improvements in the methods of conducting the business of this office that could be introduced; some of them would probably require legislation by Congress. The Comptroller has talked with the experts of the Commission, now investigating the Departments, in regard to them; as the Commission will probably make some report on the Comptroller's office before very long, no recommendations or suggestions are are desirable are report.

gestions are made in this report.

R. B. Bowler, Comptroller.

REPORT OF THE SECOND COMPTROLLER.

TREASURY DEPARTMENT, SECOND COMPTROLLER'S OFFICE, Washington, D. C., September 8, 1893.

Sin: I have the honor to submit the following report for the fiscal year concluded June 30, 1893:

TOTAL NUMBER OF ACCOUNTS, CLAIMS, AND CASES SETTLED.

It will be observed by a comparison of the work of this office for the past three fiscal years that while the number of claims have fallen off very largely, notably 19;231, during the last fiscal year, yet the amount of business done in that period has increased \$29,218,152, and within the last fiscal year \$20,382,913. It is thus perceived that while the volume of business has increased in two years 17 per cent, the number of claims have fallen off over 30 per cent. This decrease in the number of claims examined and allowed is mainly the result of legislation enacted in the bill making appropriations for the legislative, executive and judicial expenses of the Government for the fiscal year ending June 30, 1893, approved July 16, 1892, wherein it is provided—

That hereafter nothing in section two hundred and seventy-seven of the Revised Statutes shall be so construed as to prevent the Second Auditor of the Treasury from disallowing claims for arrears of pay and bounty in cases where it appears from the records and files of his office that payment in full has already been made to the soldier himself or to his widow or legal heirs: *Provided*, That if any person whose claim may be disallowed be disatisfied with the action of the Auditor he may, within six months, appeal to the Second Comptroller, otherwise the Auditor's action shall be deemed final and conclusive, and be subject to revision only by Congress or the proper courts.

The increase in the volume of claims audited and allowed is largely traceable to the increase in pensions under the act of June, 1890, the increase of the Navy from time to time, requiring largely increased ex-

penditures, and also from increased duties and disbursements made

by the War Department.

It gives me pleasure to say that the clerks of this office, in the aggregate, are faithful and quite efficient, yet there is a demand for an increased force of clerks to keep up with the current volume of business.

By reference below to the statistics of the Army Back-pay and Bounty Division, it will be seen that no substantial progress has been made by this division in catching up with its current work, the estimate being that this division is seventy-five days behind for the entire force of seven clerks, being five hundred and twenty-five days, or nearly two years' work for one clerk; while the Army Pension Division is rapidly falling behind, there being, at the date of this report 1,000,000 single vouchers on hand for examination, which would require the entire force of the division (ten clerks), four working months to dispose of.

There is imperative necessity that this division be increased by not less than two clerks. There is also a perceptible increase of work in the Army Paymasters' Division, the Indian Division, and the Quartermasters' Division. I therefore have the honor to suggest that there should be at least an increase of four clerks in this Bureau, for which the Committee on Appropriations should be asked to make provision

for the coming fiscal year.

At the end of the fiscal year 1892 the entire force of the Second Comptroller's Office consisted of 69, including 56 clerks. This was cut down by Congress during the last fiscal year to 67, to wit: the Comptroller, Deputy Comptroller, 7 chiefs of division, 54 clerks, 1 messenger,

and 3 laborers.

The jurisdiction of this Bureau is over claims and accounts coming from the Second, Third, and Fourth Auditor's offices of the Treasury, which are finally settled by the Second Comptroller. The office is composed of seven divisions, known as the Navy Division, 5 clerks; Army Back-pay and Bounty Division, 7 clerks; Army Paymasters' Division, 7 clerks; Indian Division, 5 clerks; Quartermasters' Division, 9 clerks; Army Pension Division, 12 clerks, and the Miscellaneous Claims Division.

sion, 7 clerks. Each division has a chief.

The character of work done in the office of Second Comptroller is to verify the work coming from the Second, Third, and Fourth Auditors, correct their mistakes, and determine the law governing the allowance of the myriads of claims pending for allowance. The decisions of this office are final. If a mistake be made against the Government there is no remedy for that mistake. Hence, the necessity for the greatest caution and exactness in the investigation and revision of every claim coming to this Bureau. It becomes apparent that the clerks in this office should be of the highest grade, possess more training and skill, a larger degree of legal learning, combined with trained habits that inculcate aptitude and accuracy for the work devolved upon them, than that possessed by the clerks whose work they revise. I am persuaded that in the office of the Second Comptroller, where the work is of a revisory character and final, a system of civil service that compels this office to take new and inexperienced clerks and commit to them a work of revision already done by clerks, many of whom are trained and have large experience, is wrong, unsatisfactory in character, and not productive of good results.

I, therefore, have the honor to recommend, for your consideration, that the Second Comptroller ought to have, by virtue of law, the power to select, take and transfer to his Bureau from time to time such skilled

and trained clerks from the various Auditors' offices who prepare work for his revision, and not to compel him by civil service rules, to sup-

ply vacancies in his force with inexperienced and untried clerks.

It is an anomaly (and yet it occurs frequently, in this office as well as in others) that a \$900 clerk will be employed to investigate and revise for affirmation or for overruling, the work of an \$1,800 clerk in the offices of the several Auditors. I believe, sir, that it would be in the line of genuine civil service to make transfers from time to time from the offices of the several Auditors, as suggested, to the office of the Second Comptroller, and that this office ought not to have any clerk other than copyists and typewriters, of a grade less than that of a second class clerk at \$1,400 a year, with promotions from time to time as their ability is made apparent to third class and fourth class clerkships.

Such a policy inaugurated and established, in my opinion, would lead the capable and sprightly clerks in all the Auditors' offices to aspire to a position in this Bureau, and would give them a rank and standing in the accounting forces of the Government that would carry with it honor

and dignity that the present system can not give.

I suggest for your consideration, that such a policy might be wise if applied also to the offices of the First Comptroller and Commissioner of Customs.

I have the honor to further submit, that the character of legal questions submitted from day to day to the Comptroller for his decision are of the most diverse and complex nature. They must be decided in many instances with a rapidity unknown to the courts of the land. To enable him to dispose of the volume of business before him and to do justice by the Government and the several claimants, he ought to have a good working library, especially of text-books, where he can quickly consult the garnered lore of knowledge upon any one topic that may be before him for investigation. He can not leave his office to hunt for books. Its duties are too exacting. He needs them at hand where he can at once seize upon them.

I have the honor, therefore, to submit and recommend that a reasonable allowance to enable a good text library to be purchased for this office should be asked for and obtained from Congress. I am informed that for a period of eight years prior to this fiscal year not a dollar's worth of law books, other than the publications of governmental reports, has been purchased for this office. A good library of text-books would enable the Comptroller upon important matters to examine and consult the reports of all the States to be found in the law library of the Treasury Department. I, therefore, commend to your judgment the necessity for an increased allowance to this office for the purchase of law books.

A detailed statement of claims and accounts disposed of during the year in each division, including a general statement of their character, is as follows:

The attention of the Department from time to time has been called to the cumbrous and unequal manner in which the law deals with the compensation of collectors of customs, or surveyors of customs acting as collectors, and this appears to me to be a matter of such moment that I again refer to it in the hope that Congressional action may be

taken to remedy some of the present defects.

The original plan appears to have been that collectors should each have a small salary, all official fees earned and a commission on all Customs money collected, at a rate fixed by law for each port and based on the business of each customs district, and the collector was to furnish clerk hire, office room, stationery, light, and fuel. other expenses were to be paid from the revenue collected. arrangement the collector's gains were without limit. On April 30, 1802, the law (2d S. 172) limited the earnings of any collector to \$5,000 a year; à further limitation to \$3,000 a year, which is still in force, is provided by the act of May 7, 1822 (3d S. 694). The receipts of customs officers from salary, fees, and commissions, technically termed "emoluments," were, as time went on, found inadequate to the burden of expenses laid upon them by law, and general and specific acts of Congress were passed to lighten the burden; not indeed, induced by any general plan, but by individual cases until at the present time these sources of emoluments are liable only for the compensation of the officers.

Congress provided buildings for customs purposes and then found it necessary to repair, furnish, heat, and light them by general yearly appropriations. Stationery is furnished from the Treasury Department. Clerk hire and contingencies are provided for out of the general appropriation for the expenses of collecting the revenue from customs.

On the other hand, the changes in commerce and the action of Congress have largely decreased the fees. The operation of these various conflicting forces can best be shown by an analysis of the emolument statement of one year. The last that is complete is for the year ending June 30, 1892.

The sources of emolument are: Salary, fees, commissions, storage.

This condition can only be remedied by the action of Congress, and a reform could best be accomplished by a law redistricting the customs collection districts, abolishing all fees, and giving fixed salaries to the

several collectors.

Acting disbursing agent.

Clerk and cigar inspector. Clerk and messenger.

There is no doubt but that the United States should be redistricted for customs purposes, and the number of customs districts greatly lessened by consolidation. The absurdity of three collection districts in a small corner of Maine, viz, Saco, Kennebunk, and York, with collections of \$27.50, \$3.85, and nothing, respectively, is palpable.

A general plan should be determined upon for regulating the salaries of subordinate officers of customs. I am quite sure a close scrutiny would show many discrepancies arising from the fact that these salaries are adjusted on the representations of the collector of the port interested, without reference to what may be paid in other collection It would probably be advantageous to drop the present designations of subcustoms officers, and have them all appointed as customs officers, with power to the collector, or other principal officer of the customs under whom they serve, to employ them as may seem to him best in the furtherance of the collection of the revenue. of these designations have been recognized by law, legislation would be needed to accomplish this change. Some of the numerous titles now in use are as follows:

Night inspector.

Coastwise inspector.

Collector. Appraiser. Opener and packer. Comptroller. Paymaster of drawbacks. Assistant appraiser. Assistant bookkeeper. Confidential clerk and act- Paymaster and acting Assistant bookbinder. ing collector. deputy collector. Assistant cashier to col-Copyist. Private secretary. lector. Clerk and verifier. Porter. Chief clerk and acting dep-Superintendent of laborers. Inspector. Inspector and measurer of Superintendent of supplies. uty collector. Chief clerk and superin-Superintendent of barge tendent of warehouse. Inspector and acting deputy office. Chief bookkeeper. Surveyor. collector. Clerk. Teller. Inspector and surveyor's staff officer. Clerk and acting naval Usher. Janitor. officer. Watchm**an.** Clerk and acting deputy Laborer. Weigher. collector. Law clerk. Weigher's janitor.

The proviso in the act of March 3, 1893 (27 S. 577), allowing collectors of customs, or their deputies, to administer certain oaths to revenue-cutter officers, should be extended to cover the whole Customs Service, as a measure of justice and of economy to the numerous employés who are taxed the price of an oath on each pay day.

Messenger.

Naval officer: .

The requirement that inspectors of customs should receive pay when "actually employed" now found in the law should be repealed or strictly applied. The practice has been for years to pay permanent inspectors for every day in the year, and in order to do so various styles of duty have been invented to cover the discrepancy between the fact and the law. "On district duty" or "waiting orders" may easily cover unemployed time.

During the present administration the following changes have been made in the offices of collectors of customs, and surveyors acting as

collectors:

District.	Present officer.	Late officer.	Term of new officer begun

Every effort is made to close up the accounts of each officer as he goes out, and this has been accomplished with reasonable dispatch and without friction.

The labor accomplished by this office is shown by the total of receipts and disbursements for the period from 1880 to 1893, as follows:

RECAPITULATION—RECEIPTS AND EXPENDITURES, AS SHOWN BY ACCOUNTS SETTLED IN THE OFFICE OF THE COMMISSIONER OF CUSTOMS, 1880 TO 1893.

[Compiled from the annual reports of the Commissioners.]

Year.	Receipts.	Expenditures.	Ү еаг.	Receipts.	Expenditures.
1880	222, 469, 350, 84 217, 066, 830, 69 197, 001, 702, 75 183, 207, 907, 79	\$17, 063, 995. 87 18, 499, 412. 09 19, 159, 109. 79 20, 680, 986. 07 22, 786, 286. 08 27, 125, 972. 67 24, 165, 246. 36 23, 795, 933. 12	1888	\$220, 507, 693. 19 225, 202, 411. 85 231, 228, 961. 67 220, 804, 951. 10 178, 713, 244. 87 204, 462, 337. 41 2, 902, 147, 900. 67	\$20, 359, 455, 15 20, 153, 992, 08 19, 734, 371, 91 24, 977, 131, 13 19, 982, 290, 67 19, 398, 233, 00 297, 888, 415, 99

The amount of unadjusted indebtedness standing on the books of the Treasury arising from accounts, the settlement of which pertains to this office, is very small. Of the collections only \$870.17 is apparently uncollectible, and of the disbursements \$111,469.54, and of this latter sum, \$5,317.63 was incurred under circumstances that would seem to justify relief by law; \$6,117.16 has been expended for the benefit of the United States but under a misapprehension as to the appropriation chargeable. Deducting this, there is left \$100,034.75, which, with the \$870.17 on account of collections, makes a total of \$100,904.92 of loss in transactions aggregating more than \$3,000,000,000, a record of which any government may well be proud.

In those districts where a large number of customs cases originate for violation of customs, revenue and navigation laws, there are almost always a number the disposition of which is apparently unreasonably delayed—cases being stationary, continued from term to term of court

for years.

It has seemed to me that a clerk, or clerks, from the Attorney-General's Office, assisted by one or more from the Treasury Department, might be detailed to examine the docket of each court and the records of each district attorney, report the condition of each case, with recommendations for such action as would, so far as possible, dispose of stale cases and prosecute those of value. There are 180 of such cases on the books of this office from the New York district and 80 from that of San Francisco.

I inclose herewith the statements (A) of transactions in bonded goods, as shown by the adjusted accounts; (B) statement of transactions in transportation; (C) statement of transactions in exportation; (D) merchandise transported without appraisement, under act of June 10, 1880; (E) approximate statement of merchandise for immediate transportation without appraisement, imported under consular seal pursuant to Department circular No. 100, July 2, 1891; (F) merchandise imported for exhibition at the World's Columbian Exposition, at Chicago, Ill.

Respectfully, yours,

WM. H. PUGH, Commissioner of Customs.

The SECRETARY OF THE TREASURY.

The foregoing exhibit shows that the volume of business done in this office during the fiscal year 1893 was greater than that of any year since the establishment of this office, and that the work of the office is nearer

up to date than for many years past.

At the beginning of the fiscal year 1893 there were on hand in this office 4,418 accounts, and at the beginning of the last quarter of the fiscal year (April 1, 1893) there were on hand 4,737 accounts. This report, as submitted, shows that the current work of the office has been translacted and the number of accounts on hand reduced from 4,418 July 1, 1892, and 4,737 April 1, 1893, to 3,647, and this reduction still continues, and it will be observed that the work of the office is now nearly current. My efforts to dispose of the work in the order of its receipt in the office have been most heartily aided by the deputy auditor, chiefs of division and clerks, and I am pleased to report that it will be but a short time until all delayed accounts are audited, and then it will be possible to dispatch the business received in the office without delay.

When I assumed this office I found it necessary to abolish the practice of making accounts special and auditing them out of the order of their receipt. Accounts are now made special only in very rare and extraordinary cases, and then only by the personal direction of the head of the office. This order has resulted in benefit to those claimants and officers who have not attorneys or other persons to represent them, and has not prejudiced any. It may be added that, under the rule requiring accounts to be adjusted in the order of their receipt in the office, officers and claimants are more prompt in rendering their accounts and in having them in correct form, they knowing that if the accounts are returned for correction they will lose their first order of

adjustment.

I respectfully call your attention to the fact that the business of this office is rapidly increasing year by year, and that since the last increase in the clerical force, July 1, 1880, the work of the office has increased 35 per cent. Without criticising the recommendations of my predecessors, from time to time made, for an increase in said force, I am of the opinion that the number of employés at present provided is sufficient for the present demands of the public business, but submit that, as there is now no work for copyists in this office, and that as all clerks are auditing accounts, the salary of the four copyists at \$900 per annum and of the three clerks at \$1,000 per annum, as now provided, should be increased to \$1,200 per annum, respectively. These clerks do exactly the same character of work that is done by clerks receiving \$1,800 per year. In my judgment, no clerk unable to audit accounts should be employed in this office, and any clerk performing such service as is now rendered should receive at least \$1,200 per annum, as recommended in my estimates submitted for the fiscal year 1895.

I take pleasure in commending to your favorable consideration the officers and clerks in this office, who have aided so cheerfully and faithfully in making possible the submission of so favorable a report as is

herewith presented.

ERNEST P. BALDWIN, First Auditor.

The SECRETARY OF THE TREASURY.

(No. 11.)

REPORT OF THE SECOND AUDITOR.

TREASURY DEPARTMENT,
SECOND AUDITOR'S OFFICE,
Washington, D. C., October 14, 1893.

SIR: I have the honor to submit the following annual report, showing the details of the work performed in this office during the fiscal year ending June 30, 1893.

A brief statement of the duties of each division is given with a detailed report of the work performed by each division.

BOOKKEEPER'S DIVISION.

This division keeps a journal and ledger record of all disbursing officers' accounts and of all claims (except claims for arrears of pay and bounty) which come within the jurisdiction of the Second Auditor and Second Comptroller; also ledger accounts of the various appropriations involved in said accounts and claims. All requisitions issued by the Secretary of the Interior on Indian account, and such requisitions of the Secretary of War as are chargeable to appropriations on the book of this office, are registered, indexed, and posted under their proper heads. Claims of heirs of deceased payees of paymasters' checks are adjusted in this division and a record is kept of valuable effects of deceased soldiers. Certificates are issued as to the indebtedness or nonindebtedness of claimants, and claims for pay, etc., in cases where the claimants are charged on the books of this office, or on the Third Auditor's books, are referred to the bookkeeper for settlement. A proper record is kept of snits pending against the United States in the Court of Claims and in the circuit and district courts of the United States, in cases where notice is received that such suits have been entered, and all information, copies of documents, etc., required by the courts or the Attorney-General in army cases are furnished by this division. (Calls for information, etc., in Indian cases are attended to by the Indian division.)

A record is also kept of the data contained in the annual report of the Auditor, annual and other estimates, and such reports or information as this office may be required to furnish to Congress or any of the Departments.

APPLICATION OF APPROPRIATIONS.

The application of moneys appropriated for the Indian service, the Medical Department, Pay Department, Ordnance Department, expenses of the Commanding General's Office, contingencies of the Adjutant-

General's Office, the Soldiers' Home, the National Home for Disabled Volunteer Soldiers, the Artillery School at Fortress Monroe, publication of Official Records of the War of the Rebellion, contingencies of the military establishment, etc., is indicated by the subjoined tabular statements of amounts drawn from the Treasury on requisitions of the Secretary of War and Secretary of the Interior, repayments of unexpended balances, and aggregate balances remaining in the Treasury on June 30, 1893.

The miscellaneous work of the bookkeeper's division consisted of-

Requisitions registered, indexed, journalized, and posted 7,085 Settlements journalized and posted 5,223
Settlements made in the division, chiefly to adjust appropriations and close accounts
Certificates of deposit listed and indexed
Repay requisitions prepared for the War and Interior Departments 571
Appropriation warrants recorded and posted
Certificates of nonindebtedness issued in cases of officers and enlisted men 3,124
Claims of legal representatives of deceased payees of checks examined and adjusted
Letters written 2,287
Bonds of disbursing officers recorded65

The amount drawn from the Treasury on settlements was, \$253,835.59, including the following sums on Soldiers' Home account:

74, 198.06

PAYMASTERS' DIVISION.

The duties of this division are to audit and adjust the accounts of army paymasters; to state accounts in favor of the Soldiers' Home for the monthly contributions of 12½ cents by enlisted men of the Army, court-martial fines, forfeitures by desertion, etc.; to keep a record of deposits by and repayments to enlisted men; to determine the longevity status of officers of the Army; to raise charges against officers for overpayments, erroneous musters, etc.; to transfer to the Third Auditor's books such amounts collected by paymasters as have not already been deposited and passed to the credit of the proper appropriations on books of the Second and Third Auditors, and to make such settlements of a miscellaneous character as are incidental to the general work of the division.

The work performed during the year is shown by the following figures:

Number on hand July 1, 1892	108
Number received from Paymaster-General, U. S. Army, during the year ending	: 1
June 30, 1893	370
0 420 00, 2000	
Number to be accounted for	470
Number examined, reported, and transmitted to the Second Comptroller during	;
the year	380
· · · · · · · · · · · · · · · · · · ·	

Amount disbursed in the 380 accounts to the Second Comptroller during the year, \$14,223,501.83.

On the 30th of June, 1893, the accounts of army paymasters were rendered to this office to include March, 1893, audited to include December, 1892, and confirmed to include August, 1892. Thirty-two paymasters were on duty and rendering accounts, so that the 99 accounts on hand represent a period of about three months.

Deposits.—The record of deposits by enlisted men under the act of May 15, 1872, shows that 5,441 deposits were made since last report, amounting to \$274,026.60, and that 5,640 deposits, amounting to \$292,879.44, have been withdrawn, upon which the depositors received inter-

est amounting to \$27,536.55.

Miscellaneous settlements.—Amount involved in 55 settlements crediting the Soldiers' Home with sums ascertained to be due in auditing paymasters' accounts, \$121,279.41; in 5 settlements charging officers with sums overdrawn, \$101.68; in 2 settlements crediting amounts refunded on account of overpayment, \$6; in 5 settlements crediting amounts erroneously charged, \$3,883.44; in 2 settlements paying owners of outstanding checks, \$62.55, and in 71 settlements transferring amounts from appropriation for "Pay, etc., of the Army" to the credit of sundry appropriations on the books of the Second and Third Auditor on account of ordnance, transportation, etc., \$93,577.87, making a total of 140 settlements and involving the sum of \$218,911.05.

Longevity.—Number of cases in which dates have been revised and established showing the time from which increase is due officers of the

Army for length of service, 126.

Deserters.—Number of cases settled during the year, 2,605.

Correspondence.—Number of letters received, 1,331; number of letters written, 1,166.

Number of vouchers in the 380 paymasters' accounts examined and reported, 70,641.

ORDNANCE, MEDICAL, AND MISCELLANEOUS DIVISION.

With the exception of paymasters' accounts all army disbursing accounts rendered to the second auditor are audited in this division; also the accounts of the National Home for Disabled Volunteer Soldiers and the military accounts of the disbursing clerk of the War Department; also claims of a miscellaneous character, namely, claims under special acts of Congress; claims for material furnished the ordnance department; for refundment of bounty money taken from soldiers under General Orders 305 of 1864; for refundment of money erroneously paid to secure exemption from draft, etc. The book records of payments to officers of the regular and volunteer armies are kept in this division, and transcripts from said records are furnished when required by other divisions. It also has charge of the files of settled ordnance, medical, and miscellaneous accounts from 1817 to date.

The following is a record of work performed during the fiscal year 1893:

Accounts and claims.	Ordnance accounts.	Medical accounts.	Miscella- neous ac- counts.	Claims.	Total.
On hand July 1, 1892	23	42	53	70	188
	530	372	177	256	1,335

INDIAN DIVISION.

The general duties of the Indian division are to audit the money accounts of Indian agents and other disbursing officers of the Indian service and the claims of contractors, employés, etc., for supplies furnished and services rendered; also to examine and finally dispose of the property accounts of Indian disbursing officers and to keep records of contracts for supplies and delivery thereunder, so that any article can be readily traced from the place of purchase to its destination. This division has charge of the files of settled accounts and claims pertaining to the Indian service and furnishes to the Attorney General and to the proper courts such information and documentary evidence as may be found in said files touching suits against the United States. It also makes transcripts of the accounts of Indian disbursing officers in cases where it is necessary to bring suit for balances found due the Government.

The following table exhibits the work for the year upon accounts and claims:

	Cash accounts.	Property accounts.	Claims.
On hand July 1, 1892	360	316	5, 28°
Received during the year	958	664	
Total	1,318	980	5, 301
Audited during the year	782	586	5, 245
On hand July 1, 1893	536	394	50

Disbursements allowed on examined accounts \$4,058,395.96

Amount allowed on claims 8,611,189.34

As the term "accounts" covers not only the regular quarterly returns of officers but also the sets of explanations, the following analysis is added to show the condition of each of these species of accounts at this date:

	Ca	sh.	Property.		•
	Quarterly accounts.	Explana- tions.	Quarterly accounts.	Explana- tions.	Total.
In process of examination	61 236	34 205	48 207	22 117	165 765
Total	297	239	255	139	930

There are in the Indian service, at present, the following disbursing officers: 57 agents, 5 special agents, 5 inspectors, 1 superintendent of FI 93—62

schools, 32 school superintendents, 6 supervisors of education, 1 secretary of the Board of Indian Commissioners, 1 superintendent New York warehouse, 2 receiving and shipping clerks, 21 allotment agents, 20 disbursing officers of special commissions, and 25 others of miscellaneous character; in all 176 officers, a large portion of whom render accounts not only for cash but for property entrusted to their charge.

There are on hand less than an average of one and three-quarters quarterly cash accounts and one and one-half property accounts for each of the one hundred and seventy-six disbursing officers. It is scarcely practicable, however, with a view to the completeness and accuracy that should be studied to bring the settlement of accounts of Indian agents and school superintendents to within less than two-quarters of those held by the administrative office.

There have also been prepared and transmitted to the proper officers, transcripts for use in 14 cases, namely, for the Court of Claims, 6; for the Attorney-General, 1; for the Solicitor, 5; for the Senate, 1; for defendant's attorney, under special act, 1. Some of these cases necessitated long and laborious investigation (in particular one involving the rights of the Shawnee tribe, which required the work of one of the best clerks in the division for several months, as the inquiry covered

transactions extending as far back as 1826).

In this connection it is proper to notice the fact that in view of the policy pursued of late years by Congress, in permitting the tribes to carry their claims into court for a determination of the balances due them from each other and from the United States, the value of the old files of this division increases year by year; more especially, as it is well known that the older records of the Indian Office are confused and defective. A special force will be needed to make a thorough examination of the accounts, especially those prior to 1875, in order to place them in proper condition for reference and transcript when needed by the courts.

During the fiscal year just ended there have been 5,467 letters written, 7,637 pages copied, and 543 contracts filed.

PAY AND BOUNTY DIVISION.

This division is subdivided into six branches or sections, namely:

(1) The registering branch, by which all claims for arrears of pay and bounty that have accrued since April 13, 1861, are received, registered according to regiments or other independent organizations, and sent to the files of claims awaiting examination. After being certified by the Second Auditor and Second Comptroller, the claims again pass through this branch in order that the number of the certificates may be entered on the claims' register, thus completing the record. Letters of inquiry concerning claims, either settled or pending, are necessarily referred to this branch for information as to date of filing, number of certificate, etc.

(2) The examining branch, by which such evidence as may be necessary to complete claims is collected and scrutinized. When completed, if there appears to be anything due from the United States, the cases, after passing the board of review, go to the settling branch for adjustment. In cases where formal settlements have not previously been made, and it is evident that nothing is due the claimants, settlements disallowing the claims are made in this branch and reported to the Comptroller for his action thereon as required by law. In future, cases of this kind will be disallowed by the Second Auditor under the provisions of the act of July 16, 1892. In cases where formal settlements

have already been made and it is apparent that nothing further is due, claimants are so notified and the papers are filed with said settlements.

(3) The settling branch, by which all claims passed by the examining branch and reported correct by the board of review are formally adjusted by certificate settlements and reported to the Second Comptroller.

(4) The correspondence branch, in which inquiries relating to settled claims, and all letters from members of Congress in regard to claims, whether open or settled, are answered, and the miscellaneous correspondence attended to, including the writing of letters to claimants and attorneys, notifying them of the settlement of their claims. This branch also transmits certificates to the Paymaster-General for payment, and keeps the necessary records showing under what heads of appropriations balances have been certified.

(5) Branch in charge of open and disallowed files.—These files consist of claims awaiting evidence to be furnished by claimants and attorneys, claims awaiting action by the examining and settling branches, claims summarily disallowed by the Auditor prior to January 1, 1882, and not since called up, and claims which have not been completed by

the parties in interest and are regarded as abandoned.

(6) Branch in charge of files of settled claims.—These files consist of claims for arrears of pay and bounty which have been formally certified by the Second Auditor and Second Comptroller since 1832.

The following is a record of last year's work:

EXAMINING BRANCH.

Classes of claims.	Claims pending July 1, 1892.	New claims re- ceived.	Old claims revived.	Sent to settling branch.	Disal- lowed.	Referred elsewhere.	Claims pending June 30, 1893.
White soldiers.

Number of letters written and mailed during the year	155, 053
Total number of vouchers used and consulted	379, 188
Amount involved in claims settled and allowed	\$681, 254. 90

DIVISION FOR INVESTIGATION OF FRAUD.

It is the duty of this division to examine and investigate all cases in which fraud, forgery, unlawful personation of claimants and witnesses, disputed questions of heirship and identity, irregular practices of attorneys, etc., are involved, and to take the necessary steps, through the officers of the Department of Justice and otherwise, to recover any moneys that may have been improperly drawn from the Treasury and to punish the offenders.

Cases on hand June 30, 1892....

Cases received since.....

	, ,
Cases under investigation during the year	2, 478 773
Cases on hand June 30, 1893	1,705

Cases prepared for secret service division Abstracts of testimony prepared	60 418
Letters written Pages copied on typewriter	5, 632 1, 257
Amount of money recovered and returned to United States Treasury	\$697.27

PROPERTY DIVISION.

This division examines and settles all accounts of clothing, camp and garrison equipage, and has charge of the files of such accounts, both settled and unsettled. Said accounts are not reported to the Second Comptroller; therefore the action of the property division is final. On the call of the pay and bounty division and the Third Auditor, and on the request of the officer concerned or his representative, this division issues certificates as to the indebtedness or nonindebtedness of officers who served in the armies of the United States, both regular and volunteer, since the organization of this office in 1s17. These certificates cover all accountability for ordnance, ordnance stores, etc., up to 1871, and all responsibility for clothing, camp and garrison equipage. It is a part of the duty of this division to see that officers of the Army who fail to satisfactorily account for any article embraced in their returns of clothing, etc., promptly pay the value thereof. The following is a

record of the work performed during the fiscal year ending June 30, 1893:

<u> </u>

	,

DIVISION OF INQUIRIES AND REPLIES.

The following are the duties assigned to this division: To answer calls for information in regard to officers and enlisted men who served in the armies of the United States since the war of 1812, from the Adjutant-General, Quartermaster-General, Commissary-General of Subsistence, the Commissioner of Pensions, the Third and Fourth Auditors of the Treasury, and the various divisions of this office; to furnish the pay and bounty division with statements of payments to officers and enlisted men on detached service, absent, sick, etc., who are not paid on the regular muster and pay rolls of their commands; to copy or repair worn and defaced rolls and vouchers; to compare and verify the signatures of claimants and their witnesses who have cases before the Pension and Third Auditor's offices with their signatures on the original rolls and vouchers on file in this office, and to furnish copies of such affidavits, final statements, certificates of disability, etc., as may be required by the Adjutant-General and other officers.

The record of work performed during the fiscal year ending June 30,

1893, is as follows:

CARD INDEXING.

Since my last report the work of card indexing has made satisfactory progress, and the feasibility of the scheme becomes more apparent as the cards are made accessible for reference.

In carding payments to enlisted men on detached service in hospitals, etc., 6,852 pay vouchers have been handled, from which 288,116 cards were written.

The card indexing of the single vouchers in the current accounts of the army paymasters has been done nearly as rapidly as the accounts have reached this division; 61,372 cards have been written, embracing payments to officers and enlisted men.

In October last the card indexing of the old war books of payments (prior to 1861), then being done in the old army division, was investigated. As a result of said examination that work, with 80,772 cards

already written, was turned over to this division November 1.

But a small proportion of these cards had been compared with the original records, and many weeks were consumed in making the comparison. Since November 1 there have been 84,707 cards written from said records, nearly all of which have been assorted on the first three letters of the surnames and are in partial use, but it has been thought best not to finally assort them until all the books have been carded. The following is a résumé of card indexing:

Number of cards from paymaster's accounts	. 61, 372	,
Total for year	434, 195 1, 066, 233

CURRENT WORK

During the first half of the fiscal year there were 4,535 calls received from the Pension Bureau and during latter half 7,793 from the same source. There was an increase of 6,299 inquiries from that Bureau over the previous year.

MAIL DIVISION.

The general duties of the mail division are to carefully examine, stamp, assort, and distribute the entire incoming mail of the office, including all papers received from the Second Comptroller's office, the Indian Office, the War Department, etc.; to inspect the outgoing mail and see that errors and irregularities are corrected; to answer all letters not relating to claims on file, and to dispose of or properly refer all letters, claims, etc., which do not pertain to this office.

The following is a summary of the work done in this division during

the fiscal year ending June 30, 1893:

Incoming mail: General	76, 174	
Departmental	118,564	194, 738
Outgoing mail: General		194, 190
Departmental	79, 394	
Claims received, briefed, registered, etc		15, 885
Additional evidenced, briefed, registered, etc Letters written		14, 831
Letters referred		1,040
Letters returned uncalled for		3 , 133

ARCHIVES DIVISION.

This division has charge of all accounts of Army paymasters which have ever been settled by the Second Auditor and Second Comptroller; also of the book records of payments to regiments, batteries, and other independent organizations, detachments, hospitals, paroled prisoners of war, recruiting parties, and all other separate commands. It withdraws from the files such vouchers as are required by the settling clerks in other divisions, and returns them to their proper places when no longer required. The duties of the division incidental to the care of the files are sufficiently indicated in the following report of the work performed during the last fiscal year:

Paymasters' accounts received from the Paymaster-General	370
Confirmed paymasters' accounts received from the Second Comptroller	427
Miscellaneous acounts received and filed	293
Miscellaneous vouchers received and filed	12,475
Retained paymasters' vouchers received, arranged, and filed	8,000

Vouchers received from settling, counted, sorted, and arranged for filing Vouchers returned to the files Vouchers sent to the Record and Pension Division (War Department) Vouchers received from the Record and Pension Division Vouchers briefed Vouchers briefed and rearranged Vouchers examined, briefed, and rearranged Vouchers examined and stamped Vouchers renumbered Pages of Register copied Pages of Register indexed Pages of Abstract compared Pages of Abstract compared Pages of Abstract marked with box number Mutilated rolls briefed and indexed for copy	161, 939 7, 495 7, 984 251, 653 115, 352 22, 465 157, 690 4, 653 43, 818 1, 912 200 668 668 56, 280 576

Total number of letters written

Having taken charge of the office on April 8, 1893, the principal portion of the work, an account of which is contained in this annual report, was done under the direction of my predecessor. The clerical force of the office had been divided into eleven divisions until the "old army division" was abolished by my predecessor, during the last fiscal year, leaving ten divisions in operation when I took charge of the office. As the acts of Congress making appropriations for the expenses of this office have never provided pay for chiefs of more than six divisions the other four divisions were necessarily under the charge of four clerks of the classified service, designated as acting chiefs of divisions, which seemed to lack legal sanction. I have therefore consolidated several divisions, reducing the number to six divisions, and placed the whole of the clerical force under the charge of the six chiefs of divisions provided

for by law. The six divisions thus formed are as follows: Bookkeeper's Division, Paymaster, Ordnance and Medical Division, Pay and Bounty Division, Mail and Property Division, Archives Division, and Indiau Division.

It will be observed from the data contained in this report that the work in arrears has been diminished, and it is hoped that the reorganization as indicated above will expedite the dispatch of business and that the work will in a few years be brought up to date.

Very respectfully,

T. STOBO FARROW, Auditor.

The SECRETARY OF THE TREASURY.

REPORT OF THE THIRD AUDITOR.

TREASURY DEPARTMENT,
THIRD AUDITOR'S OFFICE,

September 30, 1893.

Sin: 1 have the honor to transmit herewith report of the operations of this office for the fiscal year ending June 30, 1893. The following statement shows, in tabular form, the number and amount of accounts and claims on hand July 1, 1892, received and audited during the fiscal year, and remaining on hand unsettled June 30, 1893.

ARMY PENSION DIVISION.

The duties of this division embrace the auditing and settling of the accounts of the several agents for paying Army pensions, and the adjustment of all matters relating to payments from the Army pension appropriations. These necessitate the keeping of an account with each pensioner from the time when his name is inscribed upon the rolls until the pension ceases by death, limitation, or otherwise. The rollbooks of this office are prepared with great care from data furnished in each case by the Commissioner of Pensions. They correspond in every important particular with those of the several pension agents, and cover the period from 1798 to the present time. They show the dates of commencement and rates of all pensions, and the amounts of all payments made or due in each case, so that any error in payment made by an agent whose accounts are under consideration can at once be detected.

The increasing magnitude of the pension disbursements, and correspondingly the increasing work of this division, is shown by the following tables. The number of vouchers paid by pension agents has increased year by year—from 1,226,119, involving \$59,906,501.69, in 1883, to 3,669,009, involving \$155,071,506.98, in 1893—200 per cent in ten years; while the the clerical force of the division has increased

from 49 to 64—30 per cent only in the same period.

When it is considered that each of these payments requires careful scrutiny as to the identification of the pensioner, the validity of the voucher, the correctness of the amount, and the proper entry of the payment upon the rolls, it will be seen that the clerks of this division are taxed to their full capacity in their in endeavor to keep abreast of the work.

At the close of the fiscal year there were in the office, unexamined, 1,284,310 pension vouchers, representing about four month's work.

The tables in the appendix show in detail the work of the Pension and Bookkeeper's Divisions.

MILITARY DIVISION.

The military division examines and adjusts the money accounts and property returns pertaining to the Quartermaster Department, Subsistence Department, Corps of Engineers, Military Academy, Military Prison, Mackinac National Park, Chicamauga and Chattanooga National Park, surveys of battle fields, and such other accounts of the War Department as are required by law to be settled in this office. The accounts of the Quartermaster Department cover a wider and more varied range of disbursements than any other branch of the War Department, embracing disbursements on account of barracks, quarters, hospitals, storehouses, offices, stables, storage, transportation for all army supplies, army clothing, camp and garrison equipage, cavalry and artillery horses, fuel, forage, straw, materials for bedding, stationery, printing, hired men, per diem to extra duty men, pursuit and apprehension of deserters, the expenses of hired escorts, of expresses, veterinary surgeons, medicines for horses, of supplying posts with water, and, generally, whatever is necessary for the support and comfort of the Army in quarters, in camp, and during operations in the field, as well as the authorized expenses for the burial of the dead, the maintenance and preservation of national cemeteries, and the construction of authorized roads. The accounts of the Subsistence Department embrace all expenditures necessary for supplying the Army with provisions and the care and proper distribution of the same. The accounts of the Corps of Engineers settled in this division, embrace expenditures for sites and materials for and repairs of the various fortifications throughout the United States; the purchase of sites and materials for seacoast defences; the examination and survey of the Northern and Westernlakes and rivers; construction and repair of breakwaters, and the improvement of the rivers and harbors of the United States. The accounts of the Signal Service embrace all expenditures for army signalling and the maintenance and repair of military telegraph lines. The accounts of the Military Academy and Military Prison, embrace all expenditures necessary for the support of those institutions.

As all these accounts are critically examined and tested in connection with the various laws, regulations, and orders, both general and special, governing the respective cases—for the same laws, etc., are not applicable to all—it is apparent that the proper settlement of accounts of such varied character and range requires not only natural ability, but a familiarity with law and usage.

Report of the Operations of the Military Division for Fiscal Year ending. June 30, 1893.

CLAIMS DIVISION.

To this division is assigned the examination of all claims within the jurisdiction of this office, except claims payable from pension funds. They include claims for supplies purchased or appropriated for the Army; for the transportation and telegraphic service of the Army; for the purchase, hire, or appropriation of boats, cars, engines, horses, mules, wagons, or other means of army transportation; for the value of property of citizens, or officers and soldiers, lost in the military service; for mileage, traveling expenses, commutations, and other allowances to officers or soldiers of the Army; claims of States for reimbursement, under various acts, of the expenses incurred in raising and furnishing volunteers or militia for United States service; claims growing out of various Indian wars; claims under special acts of Congress; also, the preparation of evidence called for in cases in the Court of Claims or before Congress.

The nature of the duties requires great familiarity with the statutes, skill in methods of investigation, judgment in weighing evidence, and renders the division one of the most important and responsible in

the Treasury.

THE FILES.

Attention has repeatedly been called to the overcrowded condition of the files of this office, and I urgently request that some adequate provision be made for the preservation of the many millions of vouchers and other valuable records now in the custody of this office, and to which constant additions are being made. The pension files alone receive a yearly addition of nearly four million vouchers. Every available foot of space is already occupied, and as the Auditor is charged by law with the preservation of these accounts and vouchers, I can not too strongly urge the serious importance of some immediate action in the premises. I can not now see how this office can, without additional files room, preserve the records as the law requires.

I desire to testify as to the very efficient help and hearty cooperation of the Deputy Auditor, chiefs of division, and clerks in the discharge

of the duties of the office.

SAMUEL BLACKWELL, Third Auditor.

The SECRETARY OF THE TREASURY.

PAY OF THE NAVY, "DEPOSIT FUND."

The act of Congress approved February 9, 1889, permits enlisted men and appointed petty officers of the Navy to deposit their savings in sums not less than \$5 with paymasters upon whose books their accounts are borne, bearing interest at the rate of 4 per cent per annum. Since the passage of the act, up to June 30, 1893, there has been deposited \$500,707.39; repayments, \$305,449.82; standing to the credit of the men, \$195,257.57; interest paid during the same period, \$13,099.10. This action of Congress has had a very beneficial effect in encouraging the men to save their earnings, and undoubtedly has prevented many desertions, as the men are not permitted to withdraw their deposits until their final discharge.

EXCHANGE.

Bills of exchange were sold by the pay officers of the Navy Department during the year to the amount of \$1,176,172.39. Of this sum \$910,189.80 was drawn on the Navy agents at London, and \$265,982.59 on the Secretary of the Navy.

These bills were negotiated at varying rates of exchange, the gross loss being \$7,789.48; gross gain \$1,164.18, making the total net loss of \$6,625.30. The following tables show these transactions in detail.

Drafts drawn on the Navy Agents, London, England, for the Fiscal Year ending June 30, 1893.

SPECIAL FISCAL AGENTS AT LONDON.

The contract with Messrs. Seligman Brothers, late special fiscal agents at London, provided as follows: A commission of one-half of 1 per cent to be paid on disbursements made by them on account of the Navy Department.

On daily balances in their hands they paid to the United States the rate of interest paid by the London joint stock banks, and on advances they received the rate charged by the Bank of England. They have received the amount of \$4,719.66 as commissions under the above contract, and \$409.48 as interest on advances. They have paid the United States \$2,581.15 as interest on the daily credit balances.

The account with Messrs. Seligman Brothers terminated about the 1st of June last, and the balance in their hands was transferred to Messrs. August Belmont & Co., the newly appointed fiscal agents.

The provisions of the contract with this house are the same as with the late agents, and commissions paid to them for disbursements during the month of June, 1893, amount to \$90.64.

They have paid \$76.89 to the United States as interest on the daily

credit balances.

There has been a net gain of \$650.10 in the transfer of funds from New York to London during the year.

WORK OF THE OFFICE.

The following tables show a summary of the work performed in the different divisions of the office for the fiscal year:

The sum of \$2,418.32 was expended under section 4718 of the Revised Statutes to reimburse those who bore the expense of last sickness and burial of pensioners.

So brief a period has elapsed since I personally entered upon the duties of the office that I shall not submit any recommendation. I find that the current work of the different divisions appears to be well up to date, so far as practicable. The divisions are in charge of intelligent and competent officials.

C. B. MORTON.

Auditor.

Hon. John G. Carlisle, Secretary of the Treasury.

REPORT OF THE FIFTH AUDITOR.

TREASURY DEPARTMENT, OFFICE OF THE FIFTH AUDITOR, Washington, D. C., October 21, 1893.

SIR: I have the honor to submit the following report of the transactions of this office during the past fiscal year, and the present condition of the public business intrusted to my charge, as requested by your letter of the 9th ultimo.

I should say that during parts of the year included in this report two other Auditors officiated: Mr. L. W. Habercom to July 15, 1892, and Mr. Ernst G. Timme from that date to March 28, 1893, when I assumed the duties of the office.

The amount of work performed does not differ much from that done in the year previous; but I find on examining the annual reports of the office for the last decade a marked increase of accounts and vouchers annually disposed of, and that with the same number of clerks allowed

the office by law for this kind of work.

The clerical force in this office is an experienced one, made up largely of accountants, and I take pleasure in testifying to their skill and efficiency. Owing to the late date at which the returns for the June quarter are received from many consulates, a good deal of extra work by the clerks is necessary in order that the report shall be prepared in time. This has been cheerfully rendered, and I regret that there is no provision of law for compensating them for such necessary extra work.

The following statement will show the amount of the work which has

been performed:

·	
Accounts examined and stated	15, 645
Reports on accounts	7, 535
Vouchers examined	332, 547
Amount involved	
Reports on accounts copied	8, 572
Letters written	2, 705
Coupon books of internal-revenue stamps counted	
Conpon books of internal-revenue stamps scheduled	
Letters copied by hand	
Comptroller's certificates copied	
Invoice and debenture certificate numbers posted from returns of	
collectors of customs (section 4213, Revised Statutes)	429, 168
Consular fee reports proven	
Pages of consular-fee reports tabulated	18, 972
Drafts examined for payment	

The customary tables, lettered from A to K, will appear at the end of the report as an appendix, showing in detail, by legations, consulates, and internal revenue districts, the salaries, expenses, collections, and fees involved in the adjustments made; and the following are résumés of the same as they relate to their respective appropriations,

and also of some additional disbursements on other accounts. They will be presented in the order of the divisions of the office, namely:

DIPLOMATIC AND CONSULAR DIVISION.

Diplomatic service.—The accounts of ministers and other officers of the diplomatic service have been adjusted, showing (Table A of the appendix) expenditures and passport fees for the year, as follows:

Paid for salaries of ministers. Paid for salaries, secretaries of legations	\$302, 424. 98 26, 980. 89
Paid for salary of clerk to legation in Spain. Paid for salaries, diplomatic officers while receiving instructions and in transit.	1, 200. 00 52, 574, 46
Paid for salaries, chargé d'affaires ad interim Paid for salaries, interpreters to legations	26, 418. 99 10, 311. 83
Paid for contingent expenses, foreign missions. Paid for loss by exchange, diplomatic service	111, 169, 65 1, 467, 47
Total salaries and expenses	532, 548. 27 1, 014. 27

The few accounts of legations which have not yet been received are pointed out by figures referring to footnotes in Table A of the Appendix.

The appropriations made for salaries, charges d'affaires ad interim, \$20,000, and contingent expenses foreign missions, \$90,000, were again found to be insufficient to cover the expenditures for the year.

Consular service.—Accounts of consular officers have been adjusted, showing expenses for this service and official fees collected as follows (Tables B, C, D, and E of the appendix):

Paid:	
Salaries, consular service.	\$489,775.19
Salaries while receiving instructions and in transit	28, 269, 13
Salaties white receiving instructions and in transit	
Salaries, consular clerks	14, 365. 76
Loss on bills of exchange	3, 583. 58
Pay of consular officers for services to American vessels	23, 953, 10
Compensation from fees (sections 1703, 1730, and 1733, Revised	
Statutes)	231, 802, 10
Office rent and clerk hire (section 1732, Revised Statutes)	4,025.20
Contingent expenses, United States consulates	187, 230, 60
Allowance for clerks at consulates	88, 300, 69
Expenses of prisons for American convicts	6, 390, 00
Salaries, interpreters to consulates in China, etc	13, 850, 00
Salaries, marshals for consular courts	7, 888. 59
Expenses of interpreters and guards, etc	
Boat and crew at Hongkong and Osaka and Hiogo	

Received:	-				1, 105, 103. 16
	fees received for	official se	rvices	• • • • • • • •	1,009,060.26

An excess of expenditures over receipts is shown of \$96,042.90. This is larger than occurred last year. It then amounted to \$40,526.70.

The amount paid for salaries while receiving instructions and in transit of consular officers to and from their posts exceeds that paid last year by \$20,518.12.

The amount paid for contingent expenses, United States consulates, as adjusted, while in excess of the appropriation in the sum of \$37,230.60, is less than was reported last year by \$30,904.23.

Permit me to add under this head that some inconvenience to this office might be avoided if greater promptitude should be observed by a few consular officers in forwarding their returns after the close of each quarter.

Consular fees.—The consular fees collected for official services are stated in detail as to the character and amount at each consulate in Table H of the appendix, and aggregate in kind and amount as follows:

Invoice certificates	\$929,677.53
Landing certificates	25, 830, 22
Bills of health	23, 621.00
Currency certificates	10, 302, 00
Other fees	19, 629. 51
Total	1 009 060 26

The fees aggregate for the second time a million of dollars and over. In 1890 they exceeded a million. There has been an increase over last

year in all classes of fees.

The new health regulations issued in pursuance of the act of February 15, 1893, caused the increase in the fees for bills of health; and a much larger increase may be expected for the fiscal year ending June 30, 1894, when these regulations shall have been in operation during

the whole of the year.

The fees collected for bills of health and reported above are received entirely from foreign vessels bound for the United States, no fees being collected by law from American vessels; and I would state in connection with this subject that information has been received at this office showing that the opinion exists with some consuls that the fees for bills of health to foreign vessels are notarial and are the perquisites of the officer. It appears that the same view is also had by some consuls with reference to their services in connection with the cargoes of foreign vessels owned by Americans, such as protests, surveys, authentications of copies, signatures, etc.

It is impossible of course, under the present regulations, for this office to ascertain how far the practice prevails under the views referred to of withholding these fees from the official reports; but in my opinion it is sufficiently important to be inquired into, and I would therefore recommend that consuls be required to forward to this office with their returns quarterly reports of their notarial fees. These reports would furnish the information necessary to insure accuracy and uniformity in this matter of accounts which can not be definitely ascertained under

the present system.

COMPARATIVE STATEMENT OF CONSULAR FEES RECEIVED AND EXPENDITURES MADE FROM 1893 BACK TO 1883, INCLUSIVE.

Year.	Consular fees received.	Salary and other expenses.	Excess of expendi- tures.	Excess of receipts.
1893		\$1, 105, 103, 16 1, 097, 585, 55 1, 095, 160, 93	\$96, 042. 90 157, 545. 05 117, 018. 35	
1890	1,039,653.26 979,191.60 999.172.31	1, 032, 048, 08 953, 580, 37 934, 983, 93		7, 605, 18 15, 611, 23 64, 188, 38
1887 1886 1885 1884	950, 690, 64 881, 569, 79 791, 345, 43 895, 780, 27	918, 973, 26 900, 604, 90 870, 183, 10 872, 345, 08		
1883	914, 839. 74	870, 290. 60		44, 549. 14

Relief of seamen.—As shown by Tables F and G of the appendix, accounts for relief of seamen, and wages, were adjusted with the following results:

Board and lodging	\$8, 196. 38 4, 035. 92 4, 034. 08
Loss by exchange 131.92	6, 229, 70
Passage to the United States, paid at the Treasury	10, 000.00
Total	32, 496. 83
Amount of extra wages and arrears collected	193, 852. 27
Amount of extra wages and arrears paid to seamen	182, 940. 26 7, 727. 64 3, 184. 37
Total	
Total relief afforded	32, 496. 83 7, 727. 64
Amount paid by the United States Balance of appropriation unexpended October 20, 1893:	24, 769. 19 25, 230. 81
Total sum appropriated	50, 000. 00

In round numbers, the Government paid for relief and protection of destitute American seamen, for the last five years, the following sums, viz: 1889, \$37,200; 1890, \$38,300; 1891, \$33,900; 1892, \$36,500; 1893, \$24,769,19. It will thus be seen that the expenditure for the fiscal year just ended is less than the average for that period by more than \$10,000; and yet the number of seamen relieved is not greatly different from the average number for the said period, making a net saving of about \$9 on each seaman relieved during the fiscal year 1893, as compared with the other years above set forth.

Other expenses of the foreign service.—Accounts, other than those hereinbefore reported, and in addition to the amounts which are included in the table coming immediately after this, of disbursing clerk's accounts, adjusted during the year, relating to appropriations, are as follows:

2020 110	
International Union of American Republics	\$5, 702. 10
International boundary survey, United States and Mexico	89, 078, 47
International Bureau of Weights and Measures:	3, 300. 88
International Bureau for Publication of Customs Tariffs	2,637.52
Continental Railway Commission	
International Monetary Conference at Brussels	931.41
Publication of consular and commercial reports, 1893	13, 796, 17
Annual expenses Cape Spartel light, 1893	300.00
Refunding penalties or charges erroneously exacted	44.00
Fees and costs in extradition cases, 1893	2, 357. 47
Steam launch for legation at Constantinople	1,081.54
Buildings and grounds for legation in China, 1893	1, 374. 37
Transporting remains of diplomatic officers, consuls, and consular clerks,	_, -, -, -, -,
1893	57.25

INTERNAL-REVENUE DIVISION.

The total collections of internal revenue during the fiscal year 1893, as shown by the adjustment of collectors' accounts, and exhibited in detail in Table I, amounted to \$160,305,751.37, showing an increase for the year of \$6,416,349.67. Of the former sum, however, \$365,048.19 belong to the collections of the previous year.

STATEMENT OF COLLECTIONS OF INTERNAL REVENUE FROM 1893 BACK TO 1883, INCLUSIVE.

1893		 \$160,305,751.37
1892		 153,889,401.70
1>91		
1890		 142,476,584.07
1889		
1888		 124,162,828.93
1887		 118,932,978.91
1886		 116,807,500.09
1885		 112,498,877.51
1884		 121,585,058,35
1883	,	 144,711,626,58

The accounts of collectors of internal revenue, as adjusted for the fiscal year, aggregate \$3,892,603.38, inclusive of amounts allowed store-keepers and gaugers. These expenses in detail are given in Table K,

Of this total expense the sum of \$36,811.72 belongs to prior fiscal year, of which \$1,462.71 are commission on tax paid spirit stamps sold.

The following exhibit shows, by States, for what these expenses were incurred:

REPORT OF THE SIXTH AUDITOR.

TREASURY DEPARTMENT, SIXTH AUDITOR'S OFFICE, Washington, D. C., October 20, 1893.

SIR: I have the honor to submit the following report of the business operations of this office during the fiscal year ended June 30, 1893.

My annual report to the Postmaster-General, exhibiting in detail the financial transactions of the Post Office Department, has been completed and submitted.

The following is a summary of the principal labors performed by the several divisions during the fiscal year, viz:

OFFICE OF DEPUTY AUDITOR.

The duties of the Deputy Auditor are as follows: To assume charge of the Bureau as Acting Auditor during the absence of the Auditor; to sign all official papers designated by the Auditor, which includes post-office warrants and drafts, letters, statements, and miscellaneous papers; so have charge of the property of the Bureau, and to direct the requititions for supplies of furniture, etc.

	
Warrants signed	110, 566
Drafts signed	11, 392
Letters and circulars signed.	50, 000
Reports signed	50, 414
Miscellaneous papers signed (no record kept).	, , ,

The property, in addition to carpets, now on hand is as follows:

Miscellaneous pieces of furniture			1,098
Desks			- 341
Tables			317
Tables			656
Number of rooms occupied:	•		. ,
Number of rooms occupied: For office purposes For files			91
Corridors used for files			18
Also basement of city post-office, Union building.	•	•	

OFFICE OF CHIEF CLERK.

This branch of the Bureau is charged with the following duties, viz: Preparing and submitting to the Department of Justice for suit the accounts of late postmasters and contractors, failing bidders and contractors, and keeping the record thereof; corresponding in relation to cases in suit and those in which judgments have been refindered and upon subjects not directly connected with the business of the several

divisions; opening, reading, and assigning letters received; reading, preparing for signature, and press copying letters sent; examining reports, warrants, and drafts previous to signature; keeping the roll and making reports of attendance and absence of employés; recording orders of the Postmaster General for allowances and disallowances of claims for loss of postal funds, postage stamps, etc., and of moneyorder funds by burglary, fire, etc., making requisitions for and issuing supplies; examining and referring accounts of court officers for fees in post-office cases; certifying copies of official papers, recording decisions upon appeals, etc.; keeping record of attorneys suspended from practice, etc.

Accounts submitted for suit during the fiscal year ended June 30, 1893.

EXAMINING DIVISION.

This division is engaged in the examination and auditing of the quarterly postal accounts of Presidential post-offices, of which there are three classes, as follows:

Quarterly accounts audited.

•	For quarters ended—	First class.	Second class.	Third class.	Total.
Dec. 31, 18 Mar. 31, 18	892 192 393 893	 138 138	657 657 657 656	2, 382 2, 427 2, 523 2, 565	3, 177 3, 222 3, 318 3, 359
Tot	al	 552	2, 627	9, 897	13,076

An increase over the fiscal year ended June 30, 1892, of 861 Presidential accounts.

The auditing of these accounts involves the examination of the vouchers relating thereto, which pertain to the receipts for stamps and stamped envelopes sold and box rents collected, expenditures for salaries, special-delivery letters, clerk hire, rent, light, fuel, miscellaneous expenses, free delivery and railway mail service, and a careful comparison of the same, with the proper authorization from the Post-Office Department. The accounts, when audited, are passed to a review division for revision and reëxamination.

The following tables exhibit the work performed in the free-delivery and railway-mail-service branches of the division, the number of letter-carriers and railway postal clerks employed, and the amounts expended for such services for the fiscal year ended June 30, 1893:

Free-delivery service.

For quarters ended—	Number of free- delivery offices.	Number of letter- carriers.	Amount paid letter-carriers.	Amount paid for incidentals.	Total expen- ditures.
Sept 30, 1892. Dec. 31, 1892. Mar. 31, 1893. June 30, 1893.	600 608	16, 334 14, 308 12, 871 16, 064	\$2, 567, 922, 20 2, 543, 340, 17 2, 535, 995, 80 2, 593, 996, 96	\$106, 949, 47 113, 360, 21 111, 049, 17 115, 308, 90	\$2, 674, 871. 67 2, 656, 700. 38 2, 647, 044. 97 2, 709, 305. 86
TotalFiscal year ended June 30, 1892		59, 577 50, 395	10, 241, 255. 13 9, 525, 845. 27	446, 667, 75 428, 858, 23	10, 687, 922. 88 9, 954, 703. 50
Increase	115	9, 182	715, 409. 86	17, 809. 52	733, 219. 38

Railway mail service.

Quarters ended—	Number of rail- way pos- tal clerks.	Amou nt paid.
Sept. 30, 1892 Dec. 31, 1892 Mar. 31, 1893 June 30, 1893	6, 806 6, 929 7, 012 7, 689	\$1, 629, 359, 54 1, 646, 497, 33 1, 663, 609, 53 1, 683, 950, 21
Total Fiscal year ended June 30, 1892	28, 436 26, 961	6, 623, 416, 61 6, 319, 145, 60
Inorease	1,475	304, 271. 01

In auditing the accounts for the last quarter of the fiscal year, in cases where expense vouchers for clerk hire, rent, fuel, and light for the three previous quarters are in excess of the quarterly allowance, the amounts disallowed are reconsidered and credit is given for the same, provided the total expenditures for the year do not exceed the annual allowance. A large number of daybook entries is, therefore, necessary for the adjustment of such allowances.

Post-offices of the third class are entitled to allowances for clerk hire, reut, fuel, and light only; while of the first and second classes, various miscellaneous, in addition to those relating to printing, advertising, and stationery, are allowed upon statements accompanying proper vouchers, submitted to and approved by the Postmaster General.

Post-offices of the third class receiving allowances for clerk hire, rent, light	0 -0-
and fuel	2,565
Increase during the year	. 81
Post-offices of the first and second classes receiving allowances for clerk	
hire, rent, light, fuel, and miscellaneous expenses	794
Increase during the year	64
Statements of expenditures by postmasters on account of advertising, print-	
ing, stationery, and miscellaneous expenses submitted to the Postmaster-	
General for approval	1,951
Increase during the year	254
Reports for payments of railway postal clerks and transfer drafts thereon	
issued	876
Number of letters sent during the year	3, 042°
Number of circulars sent during the year	2,964
	-,

There is a large amount of miscellaneous work called for by the Post-Office Department, members of both Houses of Congress, and others relating to the accounts of postmasters, which necessitates considerable extra work, but of which no record has been kept.

In all the work appertaining to the Examining Division, in the various features above set forth, there has been and still is a constant increase, which is due to the steady growth and development of the postal service throughout the country.

COLLECTING DIVISION.

This division has charge of the collection of balances due the United States on the postal accounts of postmasters and late postmasters, payment of balances due to postmasters and late postmasters on their postal accounts, the review of quarterly postal accounts of postmasters of the fourth class, the adjustment and final settlement of postal accounts, and general correspondence.

Quarter ended—	Transfer drafts, payments on postal accounts of postmasters and late post- masters.		Collection drafts issued on post-masters and late postmasters.		Collection drafts issued on con- tractors, failing contractors, and failing bidders.		Collection drafts issued for fines imposed for vio- lation of section 327, P. L. and R., 1893.

BOOKKEEPING DIVISION.

This division keeps a ledger account with each postmaster and mail contractor, and has charge of the revenue, appropriations, depository, and other general, special, and miscellaneous accounts of the Post-Office Department. It registers post-office warrants and drafts, receives and audits the certificates of deposit of postal revenues, states the account against the General Treasury, and prepares the quarterly and annual reports of postal receipts and expenditures.

In addition to keeping the ledger accounts, this division receives and audits all fourth-class postmasters' accounts, which was formerly done by the examining division.

REVIEW DIVISION.

The review division is composed of two subdivisions, one being engaged in the review of the postal accounts of all Presidential postmasters and the other in the review of all accounts arising from the transportation of mails and miscellaneous expenditures.

The division receives from the examining division and reviews the quarterly postal accounts of all Presidential postmasters in the United

States.

A reëxamination is made of all vouchers relating to stamps issued, box rents collected, deposits received, drafts issued for collection, transfers from money-order to postal account, expenses of special-delivery service, payments for clerk hire, rent, light and fuel, advertising, printing, stationery, miscellaneous expenses, repairs to mail bags, drafts paid, payments to railway post-office clerks, railway transportation, free-delivery service, transfers to money-order from postal account, and deposits of postal funds.

The number of postal accounts reëxamined and reviewed for the fiscal year ending June 30, 1893, compared with the previous fiscal year,

is as follows:

Fiscal year ending June 30, 1	892.	Fiscal year ending June 30, 1	893.
Period by quarters.	Number of accounts.	Period by quarters.	Number of accounts.
Third quarter, 1891. Fourth quarter, 1891 First quarter, 1892. Second quarter, 1892.	3, 018 3, 121	Third quarter, 1892. Fourth quarter, 1892. First quarter, 1893. Second quarter, 1893.	3, 221 3, 309
Total	12, 265	Total	13, 068

The above table shows an increase of 803 accounts, or nearly 7 per cent, and the amounts involved in their adjustment are exhibited in detail in Table No. 10, prepared by the bookkeeping division, embodied in the report to the Postmaster-General, to which attention is directed.

A statement is inclosed showing the differences between the items in

the account as rendered by the postmaster and as audited.

The division is also charged with the review of all accounts for transportation of the domestic mails by railroad, steamboat, "star," mail messenger, and special mail service; all accounts of post-office inspectors, superintendents of the Railway Mail Service, and employes at postage stamp agencies, and sundry accounts of miscellaneous expenditures for post-office supplies, advertising, etc.

These accounts are reported by the pay division, and are examined, verified, and recorded by this division before payment is made of the

amounts due.

This work involves the examination, verification, and recording of all contracts for mail transportation, mail supplies, etc.; of all orders of the Postmaster General affecting the accounts enumerated; of the fines and deductions imposed for failure to properly perform mail service, and of the distance circulars received by the Post-Office Department from postmasters, showing the distance from point to point upon each mail route.

The tabular statement of the pay division of the accounts reported and the amounts involved, which, in order to avoid repetition, are not republished here, also exhibits the details of the accounts reviewed by

this division.

INSPECTING DIVISION.

This division audits the statements of all money-order and postal-note The work consists in carefully comparing the domestic and international money orders and postal notes paid at each post-office, with the corresponding entries on the statement; checking and allowing the credits, when correct; detecting and correcting errors; verifying the fees charged by postmasters for the issue of international and domestic orders; making complete additions of the debit and credit sides of the statement, and, in the case of international orders issued, comparing the coupons with the statement and checking the entries when correct. Missing vouchers and coupons are called for (when the original coupons can not be produced duplicate forms are furnished); vouchers not properly receipted are returned for perfection; advices are returned to postmasters when received instead of the corresponding orders; and descriptions of orders and notes, issued but not debited, are obtained by circulars and the particulars correctly entered on statements. Incorrect footings are reported to postmasters, with instructions to verify the items and to furnish corrected lists when they can not agree with this office. This, in many instances, prevents the reopening of accounts to make corrections after the quarterly adjustment.

In order that postmasters may not lose credit because of inability to produce orders and notes which may have been lost or inadvertently destroyed after payment, certificates, descriptive of the missing vouchers are prepared, after verifying the particulars with the statement of the issuing office, and, in the case of orders, forwarded for the signature of the paying postmaster and for receipt of payee. As a safeguard against the improper use of blanks, all orders and notes alleged to have

been spoiled or not issued are demanded of postmasters who fail to transmit them to the Department. International paid orders lacking the exchange number or amount in United States money are perfected by correspondence, and all discrepancies between the coupons and statements are adjusted in like manner. Postmasters are directed by special circulars to refund to remitters any excess over the legal fee which appears from the statement to have been collected for the issue of an order. Blank receipts for the purpose are furnished.

There are now in use in this division 48 circulars (20 in postal-card form) for the instruction of postmasters and for the purpose of adjusting discrepancies; thereby, facilitating the work of this and other divisions.

The statements are arranged after the inspection is completed, according to the offices of deposit, and the vouchers according to the States in which the paying offices are located.

The work of the division is up to date.

The following tables exhibit the work performed:

ASSORTING DIVISION.

This division receives from the Inspecting Division the money orders and postal notes in the order of their receipt from the postmasters who

have paid them.

These vouchers are first distributed according to the States in which they were issued, then assorted alphabetically by offices of issue and placed in boxes, each containing 3,000 money orders or 2,500 postal notes. They are afterwards carefully arranged in the exact numerical order of their issue, and, at the close of each week, sent to the checking division.

The following statement shows the progress and condition of the work:

Number of vouchers on hand July 1, 1892 (corrected from the last annual	
report)	32, 486, 417
Number of vouchers received during the fiscal year	21, 062, 945
Number of vouchers disposed of	17, 832, 400
Number of vouchers remaining on hand June 30, 1893	35, 716, 962

CHECKING DIVISION.

The work of this division is to examine paid domestic money orders and postal notes, in connection with the statements of the issuing postmasters, for the purpose of discovering and correcting errors and pre-

venting frauds.

Each voucher, whether money order or postal note, is carefully compared with the corresponding entry in the statement. A money order, to be a good voucher, must have been paid within one year from the date of issue; must agree with the statement in serial number, amount, date of issue, and office of payment, and must bear the written signature of the issuing postmaster, and the written receipt of the payee, indorsee, or remitter. A postal note is a good voucher when paid within three months after the last day of the month of issue, and when

it agrees with the statement in serial number and amount, and bears

the written receipt of the person to whom it was paid.

A money order or postal note that is irregular in either of the foregoing particulars, is not a good voucher, and is referred to the Recording Division for such action as may be necessary to perfect the voucher or correct the error.

Good vouchers are checked by writing their respective dates of payment, as shown by the stamps of the paying postmasters, in the spaces provided in the statements for that purpose, and are passed to the files

for final disposition in the archives by the Recording Division.

Money orders are often, through carelessness, paid to the wrong parties, and errors in entering the amounts are of common occurrence. In too many cases entries have been fraudulently made. Not infrequently, and not always through inadvertence, an order has been issued for \$100, and \$1, or sometimes \$10, charged in the issuing postmaster's statement.

Great care is therefore necessary in comparing and checking each voucher, and the work of the division is very important. It is gratifying to note an increased interest on the part of the checkers, and a very marked improvement in point of accuracy and in the weekly sum-

maries of work done.

This improvement is very largely due to a method of classifying the work, avoiding a certain confusion which has heretofore made it necessary for a checker to go several times over the statements of an office for a given period before the work for that period could be fully checked.

A rearrangement and classification of the books containing the post-

masters' money-order statements has also facilitated the work.

A further and very valuable safeguard has recently been provided by detailing an expert checker to review and critically examine the work from time to time, to correct mistakes and prevent negligence in checking.

A record has been prepared showing at a glance the progress of the checking of each office, so that the work for all the offices in the United

States may hereafter be kept uniform.

The following table shows the number of domestic money orders and of postal notes checked during the fiscal year ending June 30, 1893, and the number of each now in the office and not checked:

		,		Checked.	On hand, to be checked.
Money orders Postal notes	 		 •••••	13, 680, 000 6, 840, 000	39, 716, 962
Total				20, 520, 000	

The following table shows the condition of the checking for each State and Territory, June 30, 1893. It is being made uniform as rapidly as practicable, and will be continued so hereafter:

RECORDING DIVISION.

This division audits and adjusts money-order and postal-note accounts,

and has charge of the correspondence relating thereto.

The weekly statements of postmasters are received from the inspecting division, the footings entered in registers, and entries of deposits, drafts, and transfers verified by comparison with journal records of the original vouchers. Accounts are adjusted quarterly and postmasters instructed to take credit for accrued commissions. Differences between accounts as rendered and as audited are indicated by error circulars, and postmasters directed to correct their accounts accordingly.

Credits claimed upon defective vouchers are disallowed and the

vouchers returned for perfection.

Statements as received are filed by States alphabetically in guard books and monitors.

A jacket is kept for each postmaster, and all correspondence and special vouchers pertaining to his accounts filed therein.

Accounts of late postmasters are adjusted by payment, transfer, or

collection, as indicated by the balance.

Detailed statements of accounts are prepared and submitted for suit when balances due the United States are not paid after demand has

been made on late postmasters and their sureties. Vouchers are assorted, filed, and preserved.

Quarterly and annual statements of the money-order and postal-note transactions of the United States, both domestic and international, with the revenue derived therefrom, are prepared for the information of the Secretary of the Treasury and the Postmaster-General.

The following table shows the principal transactions of this division

for the fiscal year ended June 30, 1893:

FOREIGN DIVISION.

This division has charge of the international postal and money-order accounts with foreign administrations; the sea post-office accounts and the accounts with steamship companies for the ocean transportation of foreign mails; also keeps a record of foreign exchange purchased and received in settlement of balances due to and owing by the United States; assorts, numbers, examines, and checks all coupons of international money orders issued and all international orders paid.

The principal transactions of the division during the fiscal year end-

ing June 30, 1893, were as follows:

Statement of weights of the United States and foreign closed mails received, examined, verified and registered	7, 030
Reports made to the Postmaster-General for the payment of the ocean trans-	272
portation of United States and foreign closed mails	48

Notifications of changes in the international money-order lists received,	3, 765
examined, and enteredLetters written	1,243
Circulars prepared and addressed	649

I am pleased to be able to state that the business of the several divisions of this office is in satisfactory condition, with two exceptions, namely, the assorting division and the checking division, which were in arrears when I took charge of the office and still have an accumulation of unassorted and unchecked vouchers on hand.

The work of assorting vouchers pertaining to the money-order business, by offices of issue, has progressed up to the date of January 1, 1892, and the work of assorting, by States, vouchers issued in the third quarter of 1892, is now being performed. In other words, the work of assorting into offices of issue is in arrears about one year and nine months, and that of assorting by States about one year.

The work of checking paid money orders with the statements of issuing postmasters is in arrears about two years, which is stated more in

detail in the report of the chief of that division.

It is my earnest desire and expectation that within the unexpired portion of the present fiscal year a considerable advance may be made in these several branches of business. It is highly desirable that this arrearage be disposed of at the earliest practicable date. With this end in view, I have asked in the estimate for the support of this office for the next fiscal year, recently submitted to you, for an increase of twenty (20) in the number of money-order assorters, at the rate of \$720 per annum. In the meantime, and until the anticipated force shall become available, the best possible efforts will be made to reduce the arrearage. It will, however, be impracticable to bring the work up to date without the increase for which estimate has been submitted.

About the close of the last fiscal year money order records and files to the extent of about 200 tons in weight were transferred, under your

direction and that of the Postmaster General, from the Busch building, as a measure of precaution for the safety of that building and to the employés therein engaged, and were placed in the basement of the Union building, occupied in part by the city post-office, and located on G street, between Sixth and Seventh streets, N.W. These records and files were hastily removed in mail sacks and stored in the basement named without order or arrangement. They continue, up to this time, in the condition in which they were deposited there, for want of the proper casing and shelving for their accommodation and arrangement. Frequent reference to a portion of these files is necessary in the conduct of the business of this office, and it is highly important that provision be made at the earliest date for the erection of suitable cases in which such records and files as it may hereafter be decided to retain, may be properly arranged.

I am indebted to the officers and employés of this office for their hearty and earnest support and cooperation in the discharge of my official duties, and I desire to express my appreciation of their earnest and intelligent efforts in behalf of the public interests committed to

the charge of this Bureau. Respectfully submitted,

JNO. B. BRAWLEY,

Auditor.

Hon. J. G. CARLISLE, Secretary of the Treasury.

Digitized for FRASER

REPORT OF THE SUPERVISING SPECIAL AGENT.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D. C., October 25, 1893.

SIR: I have the honor to invite your attention to the following summary of the work of the special agents of this Department during the fiscal year ended June 30, 1893:

Reports and letters written	7.084
Suits brought	
Arrests for smuggling	7 8
Arrests for violations of the Chinese exclusion acts	61
Customs districts examined	47
Seizures	318
Value of seizures	\$63, 106. 63
Reduction in expenses recommended	30, 043, 05
Amount recovered on account of seizures, fines, and penalties, and increased duties on account of undervaluations or false classifications discovered.	
duties on account of undervaluations or false classifications discovered.	353, 748, 13
Salaries and expenses of special agents	

The sum of \$353,748.13, above stated, was collected on a variety of imported, smuggled, undervalued, or falsely classified merchandise, as follows: Furs, curios, smoking opium, Japanese screens, costumes, parasols, household goods, dogs, woolen goods, silk goods, ribbons, hosiery, kid skins, laces, cow and calf hair, ivory, hat braids, horses, wool, manufactures of wool and leather, whisky, musical instruments, cutlery, Swiss underwear, artificial flowers, desiccated cocoanut, perfumery, toilet preparations, tennis balls, wool on the skin, and clothing. One schooner was also seized and forfeited for smuggling.

Excellent work was accomplished by the officers assigned to investigate frauds at Portland, Oregon, and on Puget Sound, Wash., in the illegal landing of Chinese laborers and the smuggling of opium. This investigation resulted in the seizure of a steamship and the indictment for conspiracy and smuggling of 16 persons, 8 of whom were officers or ex-officers of the customs, including one collector of customs and a special agent of the Treasury. Although the smuggling of opium and the clandestine introduction of Chinese has long been prevalent in the region of Puget Sound, this is the first instance known where a steamship company has apparently had for its chief and most profitable business an illegal trade. Usually smuggling by vessels is the work of members of the crew and is not participated in by the owners or officers of the vessels, but in this case the owners and officers seem to have been the principals in the business, as is shown by the reports of the

FI 93----68.

officials who made the investigation. The developments in this case strongly emphasize the need of an improved revenue-cutter service on the Pacific coast, and especially on Puget Sound. The scaports of British Columbia thrive upon profits gained by violations of our laws. Our feeble efforts to enforce these laws are laughed at and our customs officers, unable on account of their inferiority in numbers and want of suitable vessels, to enforce the law, have too frequently yielded to the corrupt influences of the smugglers and have thus brought shame and contempt upon the public service. The remedy for this disgraceful condition of affairs lies in a vigorous and houest enforcement of the customs laws. But there can not be vigorous administration unless suitable vessels are provided to meet on an equality the swift craft employed by the smugglers. With modern built, speedy vessels and determined work by the collector and his subordinates the customs service of the United States on Puget Sound, now held in contempt by the freebooters, would command respect and the law would be vindi-But smuggling, as a means of putting upon our market the product of the opium factories in British Columbia, will continue so long as a premium is virtually offered by the United States for illegal importations by the imposition of a duty of \$12 per pound upon this This is a constant incentive to smuggling, and while thousands of pounds are brought in annually from British Columbia none of it has ever been entered for duty. One of two courses should be adopted by the Government with respect to prepared opium. Either (1) prohibit its importation altogether, and provide that whenever and wherever the drug may be f und within the limits of the United States it shall be seized and destroyed; that the officer making the seizure shall receive an award equal to at least one fourth of the value of the opium seized, and that persons giving information leading to the seizure of such opium shall be paid a compensation for such information equal to one-fourth of the value of the article seized; or (2) reduce the duty to not more than \$4 per pound. This latter course would destroy the profits of the smugglers and tend to bring the trade into legitimate channels, besides affording a large revenue, and would perhaps be the more feasible remedy, inasmuch as a prohibitory law would not prevent clandestine importations to supply the large demand for opium. The present high rate of \$12 per pound discourages legitimate importations and furnishes such large profits to smugglers that the business is eagerly and almost openly carried on. Uustoms officers are corrupted and communities demoralized by this infamous business. The Government can not be held blameless for these shameful facts so long as it holds out an inducement to violate the law by the imposition of so high a rate of duty and fails to furnish efficient means to enforce its collection.

Many seizures of clothing smuggled from Canada have been made by special officers detailed to duty upon the frontier. Certain Canadian tailors send agents to the United States to canvass for business in our cities, and agree to deliver custom made clothing by express free of duty. The packages containing such clothing are smuggled across the boundary line and shipped from some convenient express office to destination. Sleeping car porters, conductors, and baggage men have been employed in this work, and it was discovered in a recent investigation that mail bags were used to conceal valuable furs shipped by a large dealer in Quebec, who has for years sold his goods to American tourists, to be delivered through his agents, who smuggle them in the manner described. It is stated that during the past few years hundreds of

thousands of dollars worth of furs have been brought into the United States from this man's establishment without payment of duty.

Shopkeepers in Canadian towns within easy reach of American summer resorts upon the lakes and the St. Lawrence derive large profits from the patronage of guests stopping at the numerous hotels in that region. Excursion boats make frequent daily trips, touching at all places of importance on both sides of the river, in the vicinity of the Thousand Islands, and there is much petty smuggling by women as well as by men, who go from the summer hotels to Canada for a few hours for the express purpose of shopping. Officers who have visited these Canadian stores report that they are largely supported by this class of trade. The smugglers possess such great natural advantages over the customs officers on the frontier that the latter, however alert and efficient, are apt to come off second best in the contest. This illicit trade is not confined to articles of large value and small bulk like opium, but horses, cattle, eggs, and fish by the boat load, are smuggled with little fear of detection.

The officers under the direction of the collectors in the several customs districts are usually assigned to regular duties in connection with legitimate importations, and find little time to look after smugglers whose operations are as a rule carried on under cover of night. The number of special officers whose duty it is to prevent and detect frauds is too small to cope successfully with the smugglers. Some of these officers, who have had large experience, make many seizures and arrests, but the goods so seized represent but a small fraction of the merchandise successfully smuggled. In view of these facts the suggestion made last year is renewed, that a strong preventive and detective force should be organized for duty on the frontier under direction of the special agents in charge of districts, to cooperate with the local customs officers and to be subject to change from point to point as the exigencies of the service may require. The men appointed to this duty should be possessed of suitable physical and mental qualifications and should not be retained in the service unless their efficiency is proven by substan-Such a corps of well-disciplined officers could, it is tial results. believed, break up the illegal trade described.

I also desire to renew the suggestion in my last report concerning awards to customs officers who detect and seize smuggled goods. The law providing for such awards is intended as a stimulus to activity and vigilance by customs officers; but it also contains a provision that no award shall be made to the seizing officer exceeding 50 per cent of the net proceeds after-deducting the lawful duty upon the merchandise Opium and cigars which are smuggled in large quantities are seized. subject to high duties exceeding the amounts realized from the sale of the goods so that the seizing officer, no matter how active and meritorious, or how important the case, or how valuable the goods seized, is precluded from the benefit of any award. Then, too, the words "detect and seize" have been so construed as to deprive an officer of an award in any case where his action has resulted from information furnished to him, by a person not an officer although that information was only a clue enabling him to make an investigation which resulted in the In other words, it has been decided by the Department that as the law also provides for the payment of awards to informers not officers, there can not be an informer and seizor in the same case. principle underlying the law providing for awards to seizing officers is a good one, it should be relieved of the features which now render it nugatory in certain cases, and officers who make seizures should receive

suitable awards without regard to the retention of duties or the fact that they acted upon information furnished them by outside parties. The practice of paying informers and excluding officers from benefits in these cases, leads to corrupt arrangements between the officers and so-called informers whereby the informer agrees to divide his award with the officer whose testimony is necessary to secure favorable action of the court on the claim of the informer. Actual proof of a case of this kind has come to light where \$5,000 was awarded to informers in an opium seizure and was divided with certain officials under a secret agreement previously made. In other cases where informers have been named by officers there is good ground for suspicion of similar arrangements.

As legislation by the present Congress upon the tariff appears to be quite certain, I beg leave to suggest the elimination from the schedules, of provisions wherein the imposition or nonimposition of duties depends upon certain conditions, making the same article dutiable under one state of facts and nondutiable under another. Such provisions in the tariff cause much trouble in administration and afford convenient opportunity for fraud. For instance, fish caught in fresh waters with nets or other devices owned by citizens of the United States are free. This provision is applicable to fish caught in the waters of the Great Lakes and rivers within the jurisdiction of the Dominion of Canada. By Canadian law, however, a license is required to fish in such waters, and no license can be granted to a person not a citizen of Canada. This would seem to exclude citizens of the United States and render paragraph 571 nugatory so far as it refers to fresh fish caught in nets owned by American citizens. And yet fish are constantly imported and entered free of duty under said provision. It is claimed by the importers that they really own the nets that are used in taking the fish, and that it is the Canadian law, not ours, that is evaded. That such a provision intended for the benefit of our own citizens, but which they can not make available except by an evasion of the laws of a friendly foreign country, is unwise and should be repealed, admits of no question. A great deal of difficulty has been experienced by customs officers in connection with the entries of fish under this law, and doubtless much fraud has been practiced in connection with such entries. Fresh fish should, therefore, be made either free or dutiable under all condi-Another instance is found in paragraph 493 of the existing tariff, which provides for the free entry of bags of American manufacture when exported filled with American products. Under this provision large quantities of bags have been admitted to free entry in excess of the product of the American bag factories. It has been ascertained that persons in Liverpool, and perhaps in other Euro pean ports, have done a profitable business by gathering up secondhand bags made in all parts of the world and shipping them to the United States as bags of American origin. The only proof offered that these bags are of American manufacture is a certificate from the collector of customs in San Francisco, or some other port on the Pacific coast, that a certain number of bags manufactured in San Francisco were exported as coverings for grain. But since there are no especial characteristics of American bags to distinguish them from bags of foreign make, customs officers can not determine by inspection whether bags presented for entry are or are not of American manufacture. consequence many millions of secondhand bags have been admitted free of duty which were really of foreign origin. This is one of the porvisions of the tariff law which can not be easily and safely administered,

and which affords an opportunity for the unscrupulous to make money at the expense of the United States and to the injury of houest traders. The remedy in this case would seem to be to make all secondhand

bags either free or dutiable.

Theatrical costumes, properties, and scenery, which would be otherwise dutiable, are admitted free as "tools of trade" of theatrical managers when arriving upon the same vessel with such managers. This is done in accordance with decisions of the courts. Managers who desire to produce a spectacular play in which the gorgeous and expensive costumes of the ballet are a special feature may effect a large saving in duties by going to London for such costumes and bringing them in as tools of trade. When large quantities of valuable merchandise may be thus imported free of duty under a paragraph intended to apply to the kit of tools brought by a mechanic emigrating to this country it would

seem that said paragraph should be revised.

In my report of last year I referred to abuses connected with the free entry of wearing apparel and the demoralizing practices incident to the examination of passengers' baggage arriving by ocean steamers, which abuses have long been a subject of public comment. Although the tariff act of 1890 contains a modification of the previous law, intended to limit the free introduction of wearing apparel to such articles as were in actual use and were necessary and appropriate for the comfort and convenience of the passenger on his journey, this provision has been so construed by competent authority as to recognize the right of home returning tourists to the free entry of all the foreign clothing they may choose to bring with them. There is practically no limit, so long as the articles thus brought in are the personal wardrobe of the passenger, are suitable and appropriate for present or future use, and are not intended for sale. Thus some of our citizens escape taxation upon high-class wearing apparel, properly designated as luxuries, while those who remain at home must pay the tariff tax upon their necessary clothing. Prior to the decision of the Supreme Court in the case of Astor vs. Merritt the customs officers endeavored to confine the free entry to clothing which had been worn, and large amounts of duties were collected on new clothing. But since that decision, wherein it is held that clothing is in actual use when it is intended for the season immediately approaching, and especially since the board of general appraisers have decided that this decision still prescribes the governing rule as to what should be exempted from duty as wearing apparel in actual use, little can be done by customs officers to limit the volume of such free importations. As no record is made of the value of clothing admitted free there is no way of estimating the loss of revenue from this cause, but it must be large, and it increases year by year. The merchant tailor who pays high duties upon the cloths and trimmings used by him has good reason to complain of the operation of a law which admits the same goods free, when made up into garments by a London tailor and imported in the baggage of a wealthy American. So too, our dressmakers may well object to the constant free introduction of foreign silks and dress goods, dutiable at high rates when imported in the piece, but free, when made into costumes by the Paris modiste for ladies of wealth, who thus save enough in duties on their season's wardrobe to pay the expenses of their summer outing. Certainly a provision in the tariff which, as practically administered, results in discrimination in taxation, needs revision. No injustice would be done to Americans returning from abroad, if they were required by law to furnish schedules of

their purchases in foreign countries, and to pay the same duties thereon that are exacted when similar articles are imported as merchandise. Such a law would put an end to excessive free importations of wear-

ing apparel and remove a just cause of complaint.

The extension of the immediate transportation system by the creation of new interior ports at almost every session of Congress is a subject. worthy of serious consideration. When an interior city or town is thus made a port, it is usually done at the instance of one or more merchants for their convenience in the entry of imported merchandise and is not of especial benefit to the people who buy and consume the goods. The customs system differs in this respect from the postal service, which is for the benefit of all the people, and for that reason must be extended to all towns and villages regardless of expense. Economy and good administration would seem to demand that the customs business be confined to the great distributing centers, where the volume of importions justifies the employment of a corps of experienced officers, competent to protect the interests of the revenue in the appraisement of foreign merchandise. The expense of maintaining the smaller customhouses is unnecessary and may result in actual loss of revenue on account of the inexperience of officials therein employed. An illustration of this danger occurred during the past year in a case where unscrupulous persons imported goods at New York, sent them to a smaller port for appraisement, and returned them to New York for sale, the goods being largely undervalued and passed at the low valuation by reason of the ignorance of the officials who appraised them.

The revenue upon imported goods consumed in the country will be collected whether the goods enter the country and are examined and appraised at a dozen or a hundred ports. The fewer the custom houses the smaller will be the aggregate cost of collection. Every custom house added to those already established involves additional expense, without bringing in a dollar of additional revenue, and may result in actual loss

to the Treasury in the way described.

Custom-houses must be maintained on the frontier and seaboard, but those at the interior ports, with the exception of cities like Chicago, St. Louis, and Cincinnati, and other large distributing points are unnecessary from a business point of view, and should be abolished. As it is not desirable or practicable to give a custom-house to every town or city, and thus make the customs system coextensive with the postal service, those now established in the interior, where the collections are less than \$500,000 should be discontinued. Such action would cause inconvenience to comparatively few persons engaged in importing, while it would result in a large saving in public expenditures, and thus be a benefit to all the people.

Hereto appended is a tabulated statement showing the business transacted and the cost of collection in each collection district. An examination of this statement will demonstrate the propriety of abolishing a large number of existing ports which return no revenue to the Gov-

ernment.

Very respectfully,

A. K. TINGLE, Supervising Special Agent.

Hon. John G. Carlisle, Secretary of the Treasury.

APPENDIX.

STATEMENT OF CUSTOMS BUSINESS FOR THE FISCAL YEAR ENDED JUNE 30, 1893.

Federal Reserve Bank of St. Louis

Aggregate receipts and expenses of collection for the fiscal years 1880 to 1893, inclusive.

NOTE.—The accounts of receipts and expenditures published by the Register will vary in some cases from the figures above given, for the reason that his statement is made up from warrants issued during the fiscal year, regardless of balances in the hands of officers at the beginning and end of the year. If the accounts of each collector were closed and balances settled at the end of the fiscal year the two statements would agree.

REPORT OF THE CHIEF OF THE SECRET SERVICE DIVISION.

TREASURY DEPARTMENT, SECRET SERVICE DIVISION, Washington, D. C., November 17, 1893.

1

SIR: I have the honor to submit herewith the twenty-eighth annual report, containing a summary of results of the work accomplished by the Secret Service Division of the United States Treasury Department during the fiscal year ending June 30, 1893.

The arrests by our operatives and other duly qualified officers, the latter receiving gratuities of money from the funds of the division for

meritorious service, number 494.

The offenses alleged were as follows:

Manufacturing and passing counterfeit paper money
Dealing in counterfeit paper money
Having in possession and passing counterfeit paper money
Passing counterfeit paper money
Having in possession and attempting to pass counterfeit paper money
Attempting to pass counterfeit paper money
Having in possession counterfeit paper money
Passing \$5 scrip notes "W. A. Ecker & Co." as United States notes
Attempting to pass \$5 flash note Passing flash note, imitation of \$10.
Passing flash note, imitation of \$10
Attempting to pass college currency note for genuine \$50 note
Passing Confederate States note as a United States note
Manufacturing counterfeit £5 Bank of England notes and counterfeit silver
dollars
Assisting in the manufacture of counterfeit £5 Bank of England notes
Passing \$2 "old State" bank note
Passing \$1 United States silver certificate altered to represent \$10
Attempting to pass \$1 United States silver certificate altered to represent \$5
Raising and having in possession \$1 United States silver certificate altered to
represent \$10
Passing \$1 United States silver certificate altered to represent \$10
Having in possession \$1 United States silver certificate altered to represent \$10.
Raising and having in possession \$2 United States silver certificate altered to
represent \$10
Passing \$2 United States silver certificate altered to represent \$10
Attempting to pass \$2 United States silver certificate altered to represent \$20
Raising and having in possession \$1 United States Treasury note altered to rep-
resent \$10.
Having in possession and attempting to pass \$1 United States Treasury note
altered to represent \$10
Raising and passing \$2 United States Treasury note altered to represent \$10
Raising, passing, and having in possession \$2 United States Treasury notes
altered to represent \$10 and \$20.
Passing \$10 United States Treasury note altered to represent \$20
Having in possession and attempting to pass \$1 United States national-bank
note altered to represent \$50
Having in possession counterfeit \$1,000 United States gold bond
Manufacturing, dealing in. and baying in possession counterfeit coin

Also a large lot of miscellaneous material consisting of files, melt-

ing pots, tools, metals, etc.

The unsigned bonds of the District of Columbia noted in the foregoing tabulated statement, were printed by the Columbian Bank-Note Company, an organization which before the establishment of the Bureau of Engraving and Printing in its present enlarged and comprehensive form, received contracts from the Government and engraved and printed in part or in whole, many of its obligations. The facts of the discovery of these bonds, together with some other things of solittle value as to require no further notice in this report, in an old safe formerly the property of the said bank-note company, were given to you in detail in my special report dated June 3, 1893.

At different times, as directed by you and your predecessor, destruc-

tions of captured property have been made.

For the Second Auditor of the United States Treasury we have investigated seventy five claims made by alleged heirs, or next of kin, of deceased soldiers for pay and bounty. Many were found fraudulent, but the exact amount saved to the Treasury by our careful examination of them can not be stated herein.

For the Third Auditor of the Treasury we have investigated forty-six claims, made under section 4718 of the Revised Statutes, for reimbursement of expenses incurred during the last sickness and burial of deceased pensioners, aggregating \$45,573.86. Of this sum the allowances made by the Auditor upon report of our agents as to the merits of said claims amounted in gross to \$12,015.12; \$33,558.76 was saved to the Government.

For the Fourth Auditor of the Treasury but one investigation was made, which was of the merit of the claim of the administrator of Fran-

cis Mealey, deceased seaman, for balance due him.

By your direction we have also given aid to other bureaus and-divisions of your Department, and are still cooperating with their officers to bring to justice dishonest employés and their abettors. We have also assisted representatives of foreign governments in suppressing counterfeiting of their currency in this country, and the imitation of our coins abroad.

In the foregoing summary of contraband property secured during the year, under the heading "Sundries" are scheduled imitations in whole or in part of the obligations, securities, and coins of the United States painted in oil and water colors, photographed, lithographed, printed on paper, and struck and stamped in metal, and facsimiles of notes—as reported elsewhere—amounting in face value to \$3,836,013.24.

As the later amendments to the laws condemnatory of these things become more generally known, it is believed their issue will decrease.

NEW COUNTERFEITS.

In September, 1892, a new counterfeit \$1 United States silver certificate, series 1891, check letter D, Rosecrans, register, Nebeker, treasurer, made its appearance. It was a very poor effort and not more than one or two have been found in circulation.

In October, 1892, a new counterfeit \$5 United States silver certificate, series 1891, check letter C, Rosecrans, register, Nebeker, treasurer, new back, appeared. The work on this note was fairly well executed with the exception of the portrait of Gen. Grant, which, together with the very poor color of the back, should readily determine the character of the note. But few of these have been seen.

In October, 1892, there also appeared a new issue of the dangerous \$2 United States silver certificate, which first made its appearance in September, 1890. This new issue bears check letter B and large pink seal. The word "two" in the ball of the figure 2 in upper left and lower right corners face of note, which was spelled "owt" in former

issues, has been corrected.

In April, 1893, a photographic counterfeit of a \$5 note on "The Lagonda National Bank," of Springfield, Ohio, series 1875, check letter B, charter number 2098, bank number 2334 appeared in Ohio. The note was first photographed and then the coloring was applied with a brush. At a glance it had a good appearance but would not bear scrutiny. There has been but one seen and that had the back printed upside down.

In May, 1893, appeared a new counterfeit \$5 United States silver certificate, series 1886, check letter B, Rosecrans, Register; Nebeker, Treasurer. The general appearance of this note is fair, but on close examination the engraving is very scratchy. This note is being

handled almost exclusively by Italians.

In June, 1893, a counterfeit \$2 Treasury note, series 1891, check letter B, Rosecrans, Register, Nebeker, Treasurer, appeared in Illinois. This note was so poor that but ten were passed, when the balance (several hundred) were captured together with the maker and his wife. The plates have been destroyed.

In June, 1893, a counterfeit £5 Bank of England note, No. $\frac{5}{10}$ 44188, dated January 4, 1893, appeared in Chicago, Ill. The note was first photographed and then the lines gone over with pen and ink. The entire issue (nine notes) together with the negative and other apparatus for producing them were captured with the makers on June 7 and 8, 1893.

In June, 1893, there also appeared a counterfeit £20 Bank of Enggland note, No. $\frac{U}{10}$ 19434, dated May 20, 1890. This was a pen and ink

production and well executed. But the one has been seen.

In different sections of the country, particularly in the West, many notes—Treasury and national bank issues—have been discovered altered and raised in denomination. One's, five's and ten's were raised to five's, ten's, twenties' and fifty dollar notes, and many people defrauded. These alterations often were clumsily made by pasting over the denominational figures others cut from tobacco or other United States revenue stamps, with no attempt to cover or change the true value of the note as expressed in words. Others more dangerous were evidently altered by an expert hand, the figures and words designating the denomination having been deftly removed by scratching or cutting and larger substituted by insertion or supplied with pen, brush, and ink.

The increased number of these altered notes, some of which bear evidence of considerable circulation before discovery, is largely due to the fact that, under existing circumstances, our notes, so complex in design, printed from plates on which a score of gravers in hands most skillful have traced indelibly each its owners' distinguishing touch, on the distinctive paper—itself an almost sufficient safeguard against fraudulent issues—are no more successfully counterfeited. To alter them is easier, and the credence which the perfect workmanship and imprint, the true colors of the inks in inscriptions, history, signatures, numbers, and seal, and the distinctive paper give them, make the altered notes, if the alterations be made fairly well, very dangerous.

FI 93-----69

Whenever these altered notes are discovered they are redeemed at

their original face value.

The people have not all become familiar with the faces of the new silver coins. The obverse and reverse of the older coins they have known so long and intimately that the draped figure of Liberty and majestic pose of the eagle are fixed in their minds and always recognized, but the newer coins, with changed designs, to which, puzzling them more, were added the Columbian souvenir coins, have not yet established their identity.

The manufacturing counterfeiters, quick to discover and to take advantage of whatever favors deception, almost immediately followed the Government's issue of the coins of new design with their fraudulent issue in likeness of them, and reaped a rich harvest because the origi-

nals were known, but not well known.

The gilders—counterfeiters, too—saw in the new 25-cent coin, if gilded, a presentable, beguiling \$10 gold piece, and pocketed a fine percentage of profit until discovered. The lack of weight should, of course, and does, make known the fraudulent character of the gilded coin. This last, the gilder's scheme to falsify coin, as it requires neither skill nor expensive plant and promises so much for so little, is always a seduc-

tive one to the unprincipled or weak of will.

We have gathered in and destroyed almost all of the plates from which were printed the "flash" (advertising) notes and "college currency" which in former years were circulated with so much freedom and recklessness. A few of the most dangerous of these notes are still extant and occasionally discovered by our agents, usually after long retirement from circulation. Some, as dangerous perhaps as any ever circulated, known as the "cotton-mills" note, issued about 1869, appeared again recently, but they were printed from plates long ago seized and destroyed. We shall congratulate ourselves when the few plates still in existence are safe in our custody.

There continues a disposition, in former reports remarked, to trench as closely as possible and escape punishment, upon the laws which protect our coins from imitation, even for apparently harmless purposes, by circulating advertisements on metal, in form and size, and often in design and inscription like or in similitude to coins of the United

States.

The honorable Solicitor of the Treasury has ably set forth the law in his recent opinions in cases of this sort submitted to him, and strengthened the arms of agents of this service in suppressing coin advertisements and tokens, and could we be sure in all sections of the country of unhesitating and positive support by the United States attorneys when offenders of this sort are brought to their notice, there would soon be no more of them.

Within the year past much time and labor has been spent by this division in putting down another effort to prostitute the coins of the nation by making of them an advertising medium. I refer to what has become known as the "coin sticker," an advertisement printed upon

paper to be pasted on coins.

Protected by our patent laws, the inventors of this great nuisance sold territorial rights to print and use it. Buyers were plentiful and eager, because any question raised as to the legality of such a form of advertisement was promptly met and usually silenced by the very plausible argument that its submission to the authorities at Washington, by whom it was not only recognized as ingenious but worthy of

protection, was a recognition of its propriety and a bar to any subse-

quent interference with its use.

It at once became the most popular of the many schemes to remind the buyer where and of whom he should buy whatever he needed, by suggesting that the coin which bore the advertisement should be taken back to the advertiser. The coins usually so defaced were the 50-cent and \$1 coins. On them were pasted the advertisement with a paste or glue which almost defied removal, covering the inscription on the obverse or reverse of same, deadening the resonance, and making possible the abstraction without discovery of part of the silver and the substitution of base metal therefor. Spurious coin of very common workmanship so covered would pass readily.

As soon as the attention of this office was called to this matter, the honorable Solicitor of the Treasury was asked for an opinion whether or not such advertisements pasted upon coins defaced them within the meaning of section 5459 of the Revised Statutes. His reply was that he believed that they did. The honorable Treasurer of the United States at once instructed the assistant treasurers to refuse to redeem coins so defaced, and the agents of this division were directed to require all persons so advertising, to cease, and to recommend to the United States district attorneys for prosecution all who persisted. Several such recommendations have been made, but up to this time it has not been necessary to carry any cases into court, and I regard the unlawful scheme as practically suppressed.

In this connection I beg leave to suggest that if some method should be instituted by which apparent conflict between authorizations of one branch of the Government and succeeding rulings and actions of another would be avoided, a saving of time and money both to grantees from the Government and to the Government itself, would follow. To the inventor of the aforesaid "coin-sticker," had he not been a "hustler" and quickly disposed of so many territorial rights, loss must have resulted, for, notwithstanding the fact that his scheme was pronounced by the Patent Office officials a proper one, lawful enough to be entitled to protection by payment of the established fees, it was later on suppressed at a very considerable cost in time and money to the Treasury.

Many cases could be cited in which loss to both citizens and the Treasury has followed lack of harmony in opinion and action of different branches of the Government, and if allowed, I would suggest that whenever an application for patent, trade-mark, or other such protection is asked for anything near or remotely connected with the obligations or coins of the Government, the application be submitted to your office for opinion whether or not it asks protection for a thing not in harmony with the laws which govern the issues and circulation of such obligations and coins.

So many and varied efforts to avoid the spirit of the before-mentioned statute—the language of which admits of controversy—have been brought to the notice of this office, that in my report for 1892 I had the honor to suggest an amendment thereto, commended by the honorable Solicitor of the Treasury, which was introduced by Senator Manderson

in the Senate, and is as follows:

[To amend section 5459 of the Revised Statutes of the United States.]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section fifty-four hundred and fifty-nine of the Revised Statutes of the United States, which now reads, "Every person who fraudulently, by any art, way, or means, defaces, mutilates, impairs, diminishes, falsifies, scales,

or lightens the gold and silver coins which have been or which may hereafter be coined at the mints of the United States, or any foreign gold or silver coins, which are by law made current or are in actual use and circulation as money within the United States, shall be imprisoned not more than two years and fined not more than two thousand dollars," be amended so as to read as follows:

SEC. 5459. That every person who, within the United States or any Territory thereof, for any purpose whatsoever, willfully, by any art, way, or means, defaces, mutilates, impairs, diminishes, falsifies, scales, or lightens any of the coins which have been, or which may hereafter be, coined at the mints of the United States, or any foreign gold or silver coins, or who by any process intentionally changes the appearance of any coin so as to make it resemble in color a coin of greater value shall, upon conviction, be punished by imprisonment at hard labor not more than two years or fined not more than two thousand dollars, or both, at the discretion of the court.

If it meets your approval I beg permission to again present it to Con-

gress, and ask for it your support.

Investigations have been carried on the past year by the expert accountants of this division in the following failed banks: Keystone National Bank, Philadelphia, Pa.; Spring Garden National Bank, Philadelphia, Pa.; First National Bank of Muncy, Pa.; Corry National Bank, of Corry, Pa., and West Superior National Bank, of West Superior,

These investigations have resulted in the arrest of one and conviction of two directors (one having been arrested the year previous) of the Spring Garden National Bank, on the charge of aiding and abetting the officers of that bank in embezzlement and misapplying the funds of the bank; also in the arrest and indictment of the president and cashier of the First National Bank of Muncy, Pa., on the charges of making false entries in the books of the bank, and of making false reports to the Comptroller of the Currency; also in the arrest and indictment of the cashier of the Corry National Bank, upon the charges of embezzlement and making false entries in the books of the bank; also in the arrest and indictment of the president of the West Superior National Bank, of West Superior, Wis.

In this case the prisoner fled from justice, thereby forfeiting his

bond (\$10,000).

He was traced by this division to New York City and from there to

Brazil, where we located him in Rio de Janeiro.

There was no extradition treaty with Brazil, but through our efforts proper measures were set on foot by which, through the courtesy of the Brazilian Government, he was delivered to our representative, who brought him to this country, where he was met upon landing at New York by the chief of this division and delivered into the custody of the United States marshal and returned to Wisconsin. He is now in jail awaiting trial.

In the two Spring Garden National Bank cases, one director was sentenced to seven years confinement in the penitentiary, but an appeal was made to the Supreme Court of the United States for a new trial. Pending the decision on this appeal the judge reserved sentence in the second case, the prisoner in the meantime being retained in custody.

The cases against these two directors of the Spring Garden National Bank caused much interest, as I believe they are the first on record where a director of a national bank has been punished for complicity

in wrecking a bank.

The cases in the First National Bank of Muncy, Pa., and Corry National Bank have not yet been tried. They came up for trial at the regular terms of their respective courts, and at the request of the defendants a continuance was granted.

The receivers of the banks named have been given the benefit of the results of our investigations, and civil suits to the amount of nearly \$400,000 have been brought by them in consequence thereof.

It may be proper to add that, as a result of one of these suits, a

judgment has been rendered in favor of the receiver for \$50,000.

I desire to call especial attention to section 5209 of the Revised Statutes, which relates to the unlawful acts of officers and clerks of national

banks and their abettors.

The investigations by the expert accountants of this division of such unlawful acts have developed the fact that the above mentioned section is so worded that crimes not specifically characterized by it are committed and can not be reached by law.

For instance, one clause reads "or who makes any false entry in

any book, report, or statement."

It is found that this clause is evaded in several ways, viz: By altering correct entries, as in taking out of the thousands or ten thousands from a correct entry; by failing to make a proper entry, as in a failure to enter in the report of condition to the Comptroller of the Currency any overdrafts, when in reality very large overdrafts exist, and these often in the accounts of officers of the bank; also by mutilation of books and papers.

Another clause reads as follows: "Or to deceive any officer of the association or any agent appointed to examine the affairs of any such

association."

This clause has been the source of much discussion in the courts, some judges having decided that the "agent appointed to examine the affairs of any such association" is the national bank examiner and not the Comptroller of the Currency. Consequently a number of cases have occurred where officers of national banks have made and sworn to false "Reports of condition" to the Comptrollor of the Currency and have been indicted, but, because the wording of this statute does not characterize beyond possibility of mistake the officer or agent who may not be deceived with impunity, have gone scot free.

It has further been found that a large majority of the employes of national banks are absolutely ignorant of the provisions of this section (5209). I therefore suggested and had prepared by Mr. A. R. Barrett, one of our experts in banking matters, a bill as an amendment thereto, which received the approval of ex-Comptroller of the Currency Hon.

A. B. Hepburn. It reads as follows:

A bill to amend section 5209 of the Revised Statutes, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 5209 of the Revised Statutes of the United States be so amended after the third clause of said section, so that the same shall

read as follows; namely:
"SEC. 5209. Every president, director, cashier, teller, clerk, or agent of any association, who embezzles, abstracts, or willfully misapplies any of the moneys, funds, or credits of the association; or who, without authority from the directors, issues or puts in circulation any of the notes of the association; or who, without such authority, issues or puts forth any certificate of deposit, draws any order or bill of exchange, makes any acceptance, assigns any note, bond, draft, bill of exchange, mortgage, judgment, or decree; or who shall willfully falsify any book, exchange, mortgage, judgment, or decree; or who shall willfully laising any book, report, statement, or account of the association, either by making a false entry, omitting a proper entry, or alteration of any entry in any book, report, statement, or account, with intent to injure or defraud the association or any other company, body politic or corporate, or any individual person, or to deceive any officer or director of the association, any officer of the United States, or any agent appointed to examine the affairs of any such association and every person who with like intent, aids or abets any of any such association, and every person who, with like intent, aids or abets any

officer, director, clerk, or agent of the association in any violation of this section shall be deemed guilty of a misdemeanor and shall be imprisoned not less than five

years nor more than ten years."

Sec. 2. That every president or cashier of an association who shall make oath or affirmation to a report to the Comptroller of the Currency, such as prescribed by section 5211 of the Revised Statutes, knowing the said report to be false, shall be guilty of a misdemeanor and shall be imprisoned not less than five years nor more than ten.

SEC. 3. That it shall be the duty of every association to post in a conspicuous place within the body of the bank or the office of such association a copy of section 5209 of the Revised Statutes for the benefit of the officers and employes of the association.

SEC. 4. That the Comptroller of the Currency is authorized and directed to have printed in plain type, upon cardboard of convenient size, a sufficient number of copies of section 5209 of the Revised Statutes, or such part thereof as shall apply to the acts of the officers, directors, clerks, or agents of the association, and to furnish each association with at least one copy.

SEC. 5. That the national-bank examiners, upon their visits to the banks in their respective districts, shall note the presence of the copy of section 5209 in a conspicuous place within the body of the bank or office of the association, and shall so

report it to the Comptroller of the Currency.

This bill was introduced into the House of Representatives in the second session of the Fifty second Congress as H. R. 10118, by the Hon. Henry Bacon, chairman of the Committee on Banking and Currency, and was favorably reported by the committee, but, in consequence of the adjournment of Congress, no vote was taken upon it.

With your permission I will again present the bill, and sincerely

hope it may have your recommendation.

In the course of the investigations of frauds committed by officers and others of national banks it has been further discovered that the "statute of limitations," which now bars prosecution in these cases after three years, operated often to the injury of the Government from the fact that in a number of instances the frauds were found to have been committed many years prior to their discovery, and had been successfully concealed. I therefore earnestly recommend that the period fixed by the "statute of limitations," in the cases of crimes committed by officers or others of national banks or those aiding and abetting in such crimes, be extended from three years to five years. The longer the period the more difficult will it be for a bank officer to continue to conceal his crime.

To enlarge the scope of the law regarding the use of tokens, checks, and tickets, I had presented to the Fifty-second Congress an amendment to section 3583 of the Revised Statutes, which reads as follows:

[To amend section 3583 of the Revised Statutes of the United States, and to prevent and to punish corporations, associations, and individuals for making or using private scrip or metal tokens of denominations less than five dollars in payment for labor or other debts.]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That section thirty-five hundred and eighty-three of the Revised Statutes of the United States, which now reads, "That no person shall make, issue, circulate, or pay out any note, check, memorandum, token, or other obligation for aless sum than one dollar, intended to circulate as money or to be received or used in lieu of lawful money of the United States; and every person so offending shall be fined not more than five hundred dollars or imprisoned not more than six months, or both, at the discretion of the court," be amended so as to read as follows:

SEC. 3583. That every person who, within the United States or any Territory thereof, makes, or who causes to be made, or who aids or in any manner assists in the making of any note, ticket, memorandum, token, or other obligation, of any substance whatsoever, for a less sum than five dollars, intended to be paid out or received in lieu of lawful money of the United States in the payment of any debt, or exchanged for merchandise or anything whatsoever, whether the said note, ticket, memorandum, token, or other obligation has the words "pay in trade," "in goods," or

"in merchandise," upon it, or any other words intended to convey the meaning that the value named in said note, ticket, memorandum, token, or other obligation will be furnished to the holder, or who has in possession with intent to use, or who uses, any such note, ticket, memorandum, token, or other obligation in lieu of lawful money of the United States for the purpose of paying any employe for work done or to be done or in discharging an indebtedness of any kind whatsoever, shall be guilty of a misdemeanor, and upon conviction thereof shall be fined not more than five hundred dollars or imprisoned at hard labor not more than six months, or both, at the discretion of the court;

which was read twice and referred to the Committee on the Judiciary. The stringency in money matters during the latter part of this fiscal year induced many firms to issue tokens, tickets, or checks in sums from 5 cents to \$1, bearing inscriptions, "payable in merchandise," or "at the bar," purporting to be for use between the issuer and his patron or his employe, but in reality illegally used in communities instead of the lawful currency of the United States, and demonstrated the necessity more than ever before, for the enactment of the above, or a similar amendment.

With your approval, I will again ask its passage by Congress, and sincerely hope that you will supplement my efforts with your influence.

In my report for 1892 I called attention to the fact that because no penalty attached to the failure to stamp or brand all counterfeit notes coming into the possession of the officers of national banks, the law is in a measure inoperative. I then prepared the following amendment, which was introduced by Senator Manderson, but was not acted upon further than to be read twice and referred to the proper committee:

[To amend section 5 of "An act authorizing the appointment of receivers of national banks, and for other purposes."]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That section 5 of "An act authorizing the appointment of receivers of national banks, and for other purposes," which now reads "That all United States officers charged with the receipt or disbursement of public moneys and all officers of national banks shall stamp or write in plain letters the words 'counterfeit,' 'altered,' or 'worthless' upon all fraudulent notes issued in the form of and intended to circulate as money which shall be presented at their places of business; and if such officers shall wrongfully stamp any genuine note of the United States or of the national banks they shall, upon presentation, redeem such notes at the face value thereof," be amended so as to read as follows: "That all United States officers charged with the receipt or disbursement of public moneys and all officers of national banks and all receiving and paying tellers of national banks shall brand, stamp, or write with ink, in plain letters, the word 'counterfeit,' 'altered,' or 'worthless' in three or more places upon the face of every fraudulent note issued in the form of and intended to circulate as money which shall be presented and discovered at their places of business; and if such officers or bank tellers shall wrongfully brand or stamp any genuine note of the United States or of the national banks they shall, upon presentation, redeem such note at the face value thereof; and if any of the within-named officers of the United States or national banks or tellers of national banks, willfully or knowingly, after a lapse of six months from the date of this act, fail to brand, stamp, or write the word 'counterfeit,' 'altered,' or 'worthless,' as hereinbefore prescribed, they shall be guilty of a misdemeanor and be punished by a fine not to exceed five hundred dollars."

I trust that you will see the importance of this measure, and will give it the benefit of your influence and support.

I can not refrain from again urging for your consideration a recommendation frequently made to your predecessors, that an appropriation for retiring from circulation and returning to this Department worn and soiled notes, be asked for.

As a sanitary measure physicians will plead its importance and tell you how commonly soiled currency carries from man to his neighbor disease and death; but I, viewing the subject from the place that I

occupy, with mind intent to discover every circumstance favorable to successful depredations upon the integrity of our currency, and twenty-two years' experience in efforts to circumvent counterfeiters, would respectfully submit that grease, grime, stain, dirt, and everything that will give to a note a soiled or worn appearance, is an aid, a confederate of counterfeiters, an important factor in their scheme to make the false pass for the true. Thereby the credence founded upon the appearance of long continued acceptance and circulation is established.

The hand of the dissolute and untidy, the person of the perspiring toiler, the stocking, and the "hole in the ground" of the miserly hoarder, give this appearance to the genuine note, and the counterfeiter simulates it. He never allows his notes to be circulated crisp, new, and clean, but stained with oil, soaked in different decoctions, crumpled or tattered he offers them, and they are received and pass current instead of their originals, very often for no other reason than because so like them in condition and state of preservation.

Whatever expenditure would be necessary to retire from circulation soiled and worn notes and replace them with others fresh and clean appropriation should be made for, to hinder bacilli and fraud from cir-

culating in our currency.

I ask your attention again to the necessity of increasing the clerical force of this office. For years before I administered upon its affairs the lack of sufficiency of such force left undone much of the record work, so that upon my advent into the office I found portions

of the important work many months behind.

To bring up this work I have been compelled temporarily to detail two of our field force to aid in the necessary task, and superadded to this are the results of the enforcement of public act No. 71, the provisions of which were discussed in my annual report of 1891, and the important work arising from the operations of our experts in the investigation of banks under section 5209.

For this necessity I have asked, in my estimate of expenses for the coming fiscal year, a sufficient sum to admit of the employment of one more clerk. For such employment I have asked the sum of \$1,600.

The necessities of the service for a greater field force are more felt than at any time previously. The work lying before the operatives of this division, to be accomplished satisfactorily, requires the addition of twenty men, and the interests given in charge to this branch of the public service will never be properly cared for until a sufficient sum is appropriated by Congress for this increase of our field force.

I trust my presentation of the case is sufficiently explicit and convincing to induce you to recommend the full amount of \$125,000 which

I have estimated.

I here repeat what I had the honor to submit in my last report upon the most crafty, insidious, and successful scheme to defraud ever worked in this country, because although daily in receipt of evidence of its flourishing condition, also of appeals from its victims, we are powerless to move against it.

I refer to what is known as the "green-goods swindle." My purpose in so doing is that I may urge the more forcibly such character of

legislation as shall effectually suppress the fraud.

There have been several attempts to accomplish this result by Congressional legislation, but the shrewd villians by a sudden change of tactics have measurably rendered the efforts of post office inspectors and others under the law ineffective, so that it very seldom happens that one of these plausible rascals is convicted.

The "green-goods swindle" of to-day is composed of many ingenious devices which are manipulated by experts of many years' experience, whose lightning changes, adaptations, and elaborate plans always work out for them successful results (when the dupe visits them prepared to purchase their alleged goods), even though threats of or actual violence may become necessary.

Their professed business is to sell counterfeit United States notes of the denominations of \$1, \$2, \$5, \$10, and \$20, printed, so an alleged "newspaper clipping" states, from plates stolen from the Bureau of Engraving and Printing. According to their prospectus \$6,000 of counterfeit money can be bought for \$500 and \$20,000 for \$1,000.

They inclose a printed slip alleged to have been cut from a newspaper, showing how easy their counterfeit notes are taken as genuine; they send references (bankers) as to their honesty; they "will refund expenses of a visit to New York if a party is not satisfied with purchase;" "he must not reply by letter or the correspondence ends, but by telegraph," and the message he is to send is already prepared on a telegraph blank and accompanies the circular. A variety of these circulars are used by them to suit tastès and conditions from lawyer to stableman, from burned-out merchant to bankrupt manufacturer, show-

ing how each can make a fortune or retrieve one.

The facts are these rascals do not dare to have counterfeit money to show or sell. No plates have ever been stolen from the Bureau of Engraving and Printing, and the printed slip they inclose was not cut from a newspaper, but prepared by them, giving details of an extraordinary trial of a counterfeiter that never occurred, but intended to tole on their correspondent by commending the quality of their alleged counterfeit notes. Their references do not exist except on paper; their promise to refund expenses of trip are delusive, and their insistence on correspondence by telegraph is the only genuine point in their circular, and this because several of their rogues' guild have fallen in consequence of receiving letters by mail.

How they obtain the addresses of persons is no longer a surprise, since it is known that each chief of a gang, and there are many in the city of New York, is a subscriber to the Bradstreet or the Dun Commercial Agency. In addition, postmasters are importuned, on the promise of bribes, to furnish their correspondent with the address of each well-to-do citizen whose mail is received at their respective offices.

Ill-paid preachers have been advised how to improve their temporal condition and bank officers how to become wealthy, railroad ticket agents how well to serve themselves while serving their company, and not a class of agents in any fiduciary capacity with any corporation is neglected by these wholesale, heartless robbers, as the thousands of letters received by this division attest. To read the insidious reasonings and devilish suggestions of these ruin-workers and to know that

the law is impotent to reach them makes one's blood boil.

The man who responds to their invitations by seeking further information receives a quarter or half and sometimes the whole of a \$1 new, crisp, genuine United States Treasury note as a sample of their alleged counterfeit money. Seeing its excellent workmanship and lured by their seductive advice "not to be a slave and toil all your life for nothing;" "a person without the 'universal rudder, the almighty dollar," is thought but little of in this world;" "I prefer to deal face to face, man to man, honest and square; then if my goods are not all I claim for them and are not as fine as the inclosed I will make you a

present of \$1,000 in gold and also cheerfully pay all the expenses of journey. Fair enough, is it not?"

Hundreds of weak persons, embarrassed by debt or desiring to be rich, and not willing to reach the goal by honest endeavor, yearly fall

into the traps set for them by these pretended counterfeiters.

One writes: "Five hundred dollars is the lowest you can invest with me, and don't come unless you have the cash in your pocket or a sight draft on a New York bank." I herewith give two extracts, samples of the many letters received from victims of the green goods swindle, who seek relief at the hands of this division from their own wrongdoing:

JUNIATA, NEB, Apr, 1892.

Mr. A. L. DRUMMOND,

DEAR SIR: Yours recd and I will leave off all preliminaries and tell you all straight and honestly, inclosed you will find a copy of a letter I recd and so I answered it, done just as the instructions say and I went down to N. Y., city and met the agent and he took me to the head man and there I seen the Goods as they call it and I picked out the amount I wanted to buy which was \$25,000. for which I paid \$1,000.00 in New York Drafts and the agent went to the Express office and there I sent or intended to send it to my address but the scoundrels changed boxes on me and when I got home and recd the box it had nothing in but blank paper.

And the following:

EASTON, N. H. June 16, 1892.

Mr. TREASURY:

DEAR SIR: I have been Swindled out of 5 hundred and 70 dollars by those Greengoods mens of New York and I have been there twice and seen them in Broadeday light and I should no them all if I should see them again as I hasint sufficient money now to look them up with I take this course hoping yon will try assist me to hase them taken and punish to the full Extent of the Law, if you could see my papers and hears what I hase been through then you could Judge what best to do I am Strtsting and Hopeing in him who is greater them all that I may here from you soon and that we may bring them to Justice.

Yours in Haiste.

The frequency with which similar cases to the foregoing are brought to the attention of this division, both in person and by letter; leave no doubt on my mind that hundreds of thousands of dollars are thus stolen annually from these misguided persons in the city of New York alone. The devices employed to effect this robbery are of the most original and subtle character, involving all the characteristics of fair dealing and most generous hospitality, and, in many instances, leaving the victim in doubt as to who plundered him, and at what point the robbery was committed; and it has frequently occurred that, by the use of letters expressing sympathy at their loss, and casting suspicion on the express agents as parties to the robbery, and by liberal offers of greater discount and positive assurances of success in the event of a second purchase, that foolish persons have been induced to invest a second and larger sum in the hope of recouping their loss, and the net result has been to leave the victim in a worse condition than at his first effort. The nefarious business finds employment for many persons of both sexes; writers of ability are engaged in the preparation of manuscript, enormous quantities of letters, telegraph blanks, circulars, slips, etc., are printed and written, folded, enveloped, sealed, addressed, and stamped, ready for mailing.

The accidental discovery and seizure recently of 100,000 of such letters in the city of New York while being delivered in one batch at that post-office, emphasizes the truth of the above statement. The carman who brought them, claiming that he loaded them up from the sidewalk in front of a well-known and reputable business house, was thereupon

released from custody. Existing law is quite inadequate for the suppression of the evil, and honest effort wearies by repeated failures, and the victim, who should be an ally in prosecuting the criminals, when he discovers he is subject to like penalties for his criminal attempt to obtain counterfeit money, hides himself, or is dumb. A law to be effective must have provisions which will take hold of the evil in its early stages of development and cut out its roots.

It should be made a misdemeanor to prepare or aid in the preparation of any paper, written or printed, or produced by any process, in which is stated or can be plainly inferred that counterfeit or false

money under any name or title in any manner can be obtained.

Such a law was prepared by the chief of this division and introduced by Mr. Manderson in the United States Senate, and referred to the Committee on the Judiciary. The following is its text:

[In the Senate of the United States, February 24, 1892. Mr. Manderson introduced the following bill, which was read twice and referred to the Committee on the Judiciary:]

A BILL to prevent and punish persons for preparing, or instigating, or in any manner assisting in the preparation of a letter, or circular, or handbill, or pamphlet, or book, or any other thing intended to convey the impression that counterfeit money is being advertised for sale, and so forth.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That every person who, within the United States or any Territory thereof, without authority from the Secretary of the Treasury of the United States, or other proper officer, engages in or offers to engage in the sale of counterfeit money, or who dictates, or who writes, or who prints, or wholithographs, or who engraves, or who in any manner assists in dictating, or in writing, or in printing, or in lithographing, or in engraving, or who causes to be dictated, or written, or printed, or lithographed, or engraved, or who by any other process now known to art or that may hereafter be discovered, produces or assists, or in any manner aids either by capital, labor, or advice in producing any letter, circular, handbill, pamphlet, book, or any other thing whatsoever that advertises for sale, exhibition, exchange, or to be given away, counterfeit money of any kind, whether counterfeits of the coins or obligations of the United States or of any foreign government, or who shall use in such letter, circular, handbill, pamphlet, book, or other thing, the terms "green goods," "green cigars," "green paper," or any other terms to convey the meaning that counterfeit money is being advertised or is for sale, or who has in possession or under control, any such letter, circular, handbill, pamphlet, book, or other thing with intent to use the same unlawfully, shall upon conviction thereof be punished by a fine not to exceed five thousand dollars and by imprisonment at hard abor not less than one year or more than five years at the discretion of the court.

The foregoing confers ample power, but the wrong is so vigorous, extensive, and intrenched by its wealth, that its extermination will involve expensive finesse, but one year's campaign, at an expense of \$50,000, should wipe out this most villanous fraud, and I respectfully urge, with all the force the foregoing explanation of this gigantic swindle suggests, that you recommend to Congress the necessity of an appropriation of the above named sum to be used in the extirpation (under the above amended legislation) of this entire brood of human vultures.

Respectfully submitted.

A. L. DRUMMOND, Chief Secret Service Division.

Hon. John G. Carlisle, Secretary of the Treasury.

INTERNAL-REVENUE TAX ON DISTILLED SPIRITS, MALT LIQUORS, AND TOBACCO.

Letter of Hon. David A. Wells to Hon. J. G. Carlisle, Secretary of the Treasury.

JULY 8, 1893.

SIR: In answer to your request for my opinion as to the expediency, from a strictly revenue point of view, of maintaining or changing the present internal-revenue taxes on distilled spirits, malt liquors, and tobacco, I have the honor to submit the following report:

And first as to distilled spirits.

To help to a thorough comprehension of the subject, it is desirable at the outset to review briefly the tax experiences of the United States in this particular from 1862 to 1870.

TAX EXPERIENCES, 1862-1870.

The product of distilled spirits in the United States for the year 1860, as returned by the census, was about 90,000,000 gallons. It would be an error to assume that all of this immense production of spirits was used for intoxicating purposes, or in the way of stimulants, inasmuch as the extreme cheapness of spirits or alcohol in the United States during the period under consideration occasioned their employment in large quantities for various industrial purposes; which uses were subsequently in a great degree discontinued when the price of spirits was enhanced from 100 to 1,000 per cent and upward by Federal taxation. For 1860–'61, the year preceding the war, the average price of proof spirits in Cincinnati was 14.40 cents per gallon.

From 1822 to 1862 distilled spirits, in common with all other domestic industrial products, were exempt from Federal taxation. In the latter year, under the necessity for revenue occasioned by the war, Congress imposed a tax of 20 cents per proof gallon on all distilled spirits of domestic production. This tax went into effect on the 1st of September. 1862, and continued in force until March, 1864. The total revenue derived from this source, including the receipts from licenses for rectifying, vending, and the like, for the fiscal year 1863, was \$5,176,530. The receipts from the direct tax on the spirit itself was \$3,229,990, indicating a domestic production of only 16,149,954 gallons as compared with a production of 90,000,000 gallons returned under the census of 1860, three years previous. The explanation of this result is to be found in the fact that a large amount of whisky was manufactured in antici-

pation of this low tax, and that there were doubtless some evasions of the tax after it was enacted—conditions that were repeated, as will be presently shown, in a greater degree on every occasion when an advance

in the tax was enacted.

The tax of 20 cents continued in force until March 7, 1864, when the rate was advanced to 60 cents per gallon. The revenue accruing under these two rates for the year ending June 30, 1864, was \$28,431,797, and the number of gallons returned as having been assessed was The striking discrepancy between the number of gallons taxed in 1864 at 20 and 60 cents and the number taxed the previous year (1863) at 20 cents again finds explanation in the fact that, when it became evident to the distillers that the fiscal necessities of the Government would soon compel an advance in the tax upon their product, and that such increase would not be made applicable to stocks on hand on which the lower rates had been assessed and paid, they pushed their production to the uttermost in order that they might take advantage of the great increase in the market price of all spirits after the advanced rates had taken effect; all of which anticipations were fully realized. of the 85,295,393 gallons on which the Internal Revenue Bureau assessed and collected the spirit tax for 1864-69,000,000 in excess of the product of the preceding year—at least, 70,000,000 of gallons were manufactured prior to the 7th of March and were released from Government control by the payment of the 20 cent tax only; and as after the 7th March, 1864, the market price of the greater part of this increased product, which had not been allowed to pass into consumption, was advanced in accordance with the advance in the tax—i. e., 40 cents per gallon—it is clear that \$28,000,000 at least were thus at once legislated into the pockets of the distillers and speculators.

Again, immediately after the imposition of the 60-cent rate in March, 1864, nearly all the distilleries once more suspended operation; the country was acknowledged to be overstocked with tax-paid whisky, and the Government almost ceased to collect taxes upon its manufacture. In May, however, the project for a further increase in the rates began to be again agitated in Congress, and as soon as its realization became probable, all the distilleries speedily resumed operations. How great at that time was the capacity of the loyal States for production may be inferred from the circumstance that the number of distilleries in the country, which according to the census of 1860 was 1,138, had increased

in 1864 to 2,415.

On the 1st of July, 1864, the tax was again advanced from 60 cents to \$1.50 per gallon; and during that month the entire product of the country of which the revenue officials could take cognizance was only 697,099 gallons. How great a "stock on hand," the result of manufacturing under the 20 and 60 cent rates of tax, was carried over the 1st of July and experienced the advance of 90 cents per gallon in market price in consequence of the advance in the tax from 60 cents to \$1.50 can not be accurately known; but 60,000,000 of gallons would certainly be a low estimate; and on this amount the profit that accrued to private interests was at least \$50,000,000.

On the 1st of January, 1865 (the succeeding year), the tax was further advanced to \$2 per proof gallon, when all the operations above described were repeated, with all the benefits to private or speculative interests derived from former experiences, and a consequent very large extension of the sphere of participants in the resulting profits.

In short, all the available evidence indicates that the profits realized by distillers, dealer, and speculators, through Congressional legislation

having reference to the taxation of distilled spirits from July 1, 1862, to January 1, 1865—a period of two and a half years—and exclusive of any gains accruing from evasions of taxes, and with every allowance for

overestimates, must have approximated \$100,000,000.

After the establishment of the \$2 rate on the 1st of January, 1865, there was again a period of inactivity on the part of those interested in The stocks on hand, manufactured the manufacture of distilled spirits. in anticipation of the advances in rates, were very large, and, the markets being oversupplied, there was little legitimate inducement for activity on the part of distillers. The profits realized or made prospectively certain had been, moreover, enormous, and no further advance in the rate of tax could be anticipated. Under such circumstances there was an apparent disposition on the part of manufacturers and speculators to wait and see what developments in legislation and business would follow the termination of the war in favor of the Union, which was then everywhere recognized as approximately certain. These developements were not long in manifesting themselves.

The tax of \$2 per proof gallon (amounting to more than 1,000 per cent on the average cost of production) and the enormous profits contingent upon the evasion of the law, coupled with the abundant opportunity which the law through its imperfections, and the vast territorial area of the country, offered for evasion, created a temptation which it was impossible for human nature as ordinarily constituted to resist. This view was taken by the revenue commission in a report to Congress through the Secretary of the Treasury in February, 1866; and the chairman of the commission, after a thorough investigation of the subject and the collection and presentation of a large amount of evidence, expressed the opinion that the attempt to collect a \$2 tax was utterly impracticable, and that the longer it was retained the less would be the revenue and the greater the corruption. He also coupled this opinion with a recommendation that a tax of 50 cents per proof gallon, with a judicious license system for rectifiers and dealers, be substituted as likely to be most productive of revenue and most efficient for the prevention of illicit distillation and other revenue evasions.

This report, although attracting much attention by reason of the singular revenue experiences of the preceding four years which it detailed (and which the public, with its thought concentrated on the results of the war, had in a great degree overlooked), found little favor in respect to its recommendation of tax abatement; and the general sentiment both in and out of Congress was expressed by a leading member of the House of Representatives, who publicly declared "that he was not ready to admit that the nation which had put down such a great rebellion at the cost of so much blood and treasure could not collect a tax of \$2 a gallon on whisky." The \$2 tax therefore was allowed to remain in force, and the tax experiences of the United States from 1865 to 1869, inclusive, in respect to spirits, viewed from the standpoint of finance, economics, and morals, constitute one of the most interesting, instructive, and disgraceful chapters in its history. Under the strong temptations of large and almost certain gains, men rushed into schemes for defrauding the revenue with the zeal of enthusiasts for new gold fields; and the ingenuity of the American people has never had more striking illustrations than was offered in their devices for evading the tax and providing for security against detection and punishment in so doing. The parties concerned in these transactions also showed throughout more ability than Congress. and more shrewdness than the revenue department of the National Treasury; and at a later period a Secretary of the Treasury was obliged

to resort to the use of a cipher for his telegraphic and written correspondence, in order to prevent the frustration of his plans for the enforcement of the laws by Treasury officials who were specially charged with their administration. The evidence in part confirmatory of these statements is as follows:

The revenue directly collected during the fiscal year 1866 (the first full year under the \$2 tax) from spirits distilled from other materials than fruits * was \$29,198,000, and 1867 \$28,296,000, indicating an annual product respectively of 14,599,000 and 14,148,000 gallons. But during the succeeding year, 1868, with no apparent reason for any diminution in the national production and consumption of spirits, and with no increase, but rather a diminution in the volume of imported spirits, the total direct revenue from the same source was but \$13,419,092, indicating a productions of only 6,709,546 gallons.

As the consumption of distilled spirits in this latter year was probably not less than 50,000,000 gallons, and as out of this the Government collected a tax upon less than 7,000,000, the sale of the difference at the current market rates of the year less the average cost of production (even if estimated as high as 30 cents) must have returned to the credit of corruption a sum approximating \$80,000,000. The number of licensed distillers, which in 1864 was 2,415, had increased, moreover, in 1868 to

4,721, or to nearly double the number in the short space of four years. In view of such experiences Congress finally adopted the recommendations of the special commissioner of the revenue, and in July, 1868, reduced the tax from \$2 to 50 cents per proof gallon. The results of such legislation were most remarkable.

Illicit distillation practically ceased the very hour the new law came into operation. Industry and the arts experienced a large measure of benefit from the reduction in the cost of spirits; while the Government collected during the second year of the continuance of the new rate and system, with comparatively little friction, three dollars for every one that was obtained during the last year of the \$2 tax.

For the first but incomplete fiscal year (1869) under the 50 cent tax the revenue increased to the extent of nearly \$20,000,000, or from \$14,290,000 in 1868 to \$33,735,000 in 1869; or, including all taxes on the manufacture and sale of distilled spirits, licenses, etc., from \$18,655,000 in 1868 to \$45,071,000 in 1869. During the next fiscal year (1870) there was a further increase in total revenue of \$10,534,864, or from \$45,071,000 in 1869 to \$55,606,094 in 1870.

The specific tax on distilled spirits of 50 cents per proof gallon remained in force from July, 1868, to August, 1872, a period of a little more than four years. During this period the tax was assessed and collected on an average production of 67,175,822 proof gallons per annum, yielding an average annual revenue of about \$34,000,000, and indicating an average annual consumption for all purposes of the country of about 1.65 proof gallons per capita. For the period of four years immediately preceding the fiscal year 1869, under a tax of \$2 per proof gallon for three years, and \$1.50 and \$2 for one year (1865), the tax was assessed and collected on an average annual production of only about 13,300,000 proof gallons per aunum, yielding an average annual revenue of about \$21,727,000, and indicating an average annual consumption of only about 0.38 proof gallon per capita.

But, notwithstanding these satisfactory results, the law authorizing the reduction of the tax from \$2 to 50 cents per proof gallon had hardly

^{*}The revenue derived from the taxation of spirits distilled from fruits has always been comparatively small: \$283,499 in 1866; \$868,145 in 1867.

become operative when agitation commenced for its repeal or modifica-Speculators had the idea that the old scheme of increasing the tax after a little lapse of time, without making the increase applicable to stocks on hand, was, with its gainful prospects, again within the range of possibilities; while very many extreme advocates of temperance, untaught by and caring nothing for the record of recent experience, were inclined to regard the new and comparatively low tax as impolitic and in the light of the removal of a barrier against the These and other arguments proved suffispread of intemperance. ciently potent, and in June, 1872, Congress, by an act which took effect in the following August, increased the gallon tax to 70 cents, and subsequently, in March, 1875, further raised the rate to 90 cents per gallon, which tax since this last date has remained unaltered.

It is not necessary to recall that the experiences which were attendant upon every advance of the tax on spirits from its first imposition in 1862 to 1868 were repeated subsequently in 1872 and in 1875, when the increased rates of 70 and 90 cents were respectively enacted; those of the latter date being remarkable from the circumstance that the frauds upon the revenue, which were enormous, were more directly brought home to high officials of the Government than at any former period, and constitute a chapter in the history of government by the people which the

people may well wish to have forgotten.

The above review of the experiences of the United States prior to 1869, in attempting to enforce the collection of an excessively high tax on the production and consumption of distilled spirits, is mainly valuable in this connection from the economic and moral lessons deducible

from it, which may in brief be summarized as follows:

Whenever a government imposes as a tax on any product of industry so high to sufficiently indemnify and reward an illicit or illegal production of the same, then such product will be illicitly or illegally manufactured; and when that point is reached, the losses and penalties consequent upon detection and conviction—no matter how great may be the one or how severe the other-will be counted in by the offenders as a part of the necessary expenses of their business; and the business, if forcibly suppressed in one locality, will inevitably be renewed and continued in some other. It is, therefore, matter of the first importance for every government in framing laws for the assessment and collection of taxes, to endeavor to determine, not only for fiscal, but also for moral purposes, when the maximum revenue point in the case of each tax is reached, and to recognize that in going beyond that point the government "overreaches" or cheats itself.

Obviously those who in the past have shaped the policy of the United States in respect to the taxation of distilled spirits for the purpose of revenue have, for the most part, never studied this aspect of the case, or cared to encourage any one to do so; but on the contrary, as has been somewhat humorously expressed, "they have held out to the citizen, on one hand, a temptation to violate the law too great for human nature as ordinarily constituted to resist, and in the other writs for personal arrest and seizure of property, and, thus equipped, have announced themselves ready for business."

TAX EXPERIENCES, 1870-1893.

With such an unnatural experience in respect to the taxation of distilled spirits prior to 1869, the data for determining the incidence of the present tax (90 cents) are obviously limited to the results which

have followed in subsequent years the imposition of lower rates; and for the purpose of making a clear exhibit of these, attention is asked to the following table (prepared from official data), showing-

18t. The Population of the Country for each Successive Fiscal Year from 1870 to 1893, inclusive. 2d. The Quantity of Gallons of Spirits Annually Taxed. 3d. DISTILLED SPIRITS EXPORTED FROM THE UNITED STATES AND RETURNED, WHICH A DUTY EQUAL TO THE INTERNAL TAX WAS COLLECTED WHEN ON. PORTED.

Year ending June 30—†	Gallons.	Duty collected.
1885. 1886. 1887. 1888. 1889. 1890. 1891.	2, 224, 706 2, 636, 756 1, 933, 812 1, 225, 095	Dollars. 736, 995 876, 779 1, 995, 558 2, 377, 823 1, 755, 014 1, 110, 325 980, 655 971, 219

^{*}This curious movement of spirits of domestic origin finds explanation in the circumstance that the period for which they can remain in bond without payment of tax is limited to three years, and owners who desire to extend this limit, and avoid confiscation of their property, effect it by exportation of it, or, what is the same thing, bonding it abroad. On a return of such spirits to the United States they pay to the customs department of the Treasury a duty equal to the internal-revenue tax to which they would have been subjected had they not been exported.

The quantity and value of domestic spirits exported and brought back was not separately shown in collectors' returns prior to 1885. The duty collected is accounted for as enstoms revenue.

The first point of interest which an examination of the above table reveals is, that the average per capita consumption of tax-paid distilled spirits by the people of the United States during the years 1870, 1871, 1872, and 1873, under the tax of 50 cents per gallon, was greater than it has been at any subsequent period under a 70 and 90 cent rate. Such a result is undoubtedly referable, in the main, to the economic law that a reduction in the price of a commodity encourages its consumption, and in a degree to the fact that a 50-cent tax, with its accompaniment of stringent penalties, greatly diminished the incentive for illicit produc-A wonderfully striking illustration of the strength of temptation for the evasion of the revenue created by the previous high taxation which had little other reason than mere sentiment for its imposition, is also afforded by the fact that while the Government in 1872, under a tax of 50 cents per proof gallon, took cognizance of an average annual tax-paid consumption on the part of the people of the United States of 1.63 gallons per capita, it was only able to recognize in 1868, under a \$2 tax, a similar average annual consumption of about 0.38 per proof gallon.

The second point of interest in connection with the foregoing tabular exhibit is the demonstration it affords of the very curious variations which occurred in the successive years from 1870 to 1893, inclusive, in the quantity of spirits that annually paid taxes to the Government, and which thus made free for use, may be regarded as constituting an approximately accurate measure of the average annual per capita consumption of this commodity by the entire population of the country. The explanation of such changes is not difficult. They are in general unquestionably referable to immediately antecedent or contemporary changes in the business condition of the country, which in turn are determinative in a high degree of the popular ability to consume an article—like distilled spirits—of comparatively high cost and largely a luxury, popular tastes and habits and restrictive moral influences remaining constant. passing by the year 1870, in which there was a great increase (from altogether abnormal causes) in the number of gallons produced and made subject to taxation, the increase in the tax-paid product and in the average per capita consumption during the succeeding fiscal years 1872 and 1873 when the business of the country was fairly prosperous, was regular and not inconsiderable. The commencement of the next fiscal year, 1874, was signalized by one of the most memorable financial panics in American history and a general prostration of business; from which last there was no decided recovery until 1879.

During all this period the domestic production of distilled spirits of which the Government took cognizance continued to decline, and the average per capita of consumption touched the exceedingly low proportions of 1.07 and 1.09 gallons in the fiscal years 1878 and 1879, respectively. With a renewal of active and profitable business throughout the country in 1880, the annual taxed production of spirits went up from 50,701,189 gallons in 1878, to 79,616,901 gallons in 1884; and the per capita consumption from 1.07 gallons to 1.45 gallons in the corresponding years. During the period from 1871 to 1880 there was a decrease both in the quantity of spirits on which the Government was able to collect a tax and in the apparent per capita consumption of the people, and this, too, notwithstanding an increase during this same period of 30 per cent in the population of the country; 1871 showing a tax on 62½ millions (1.58 gallous per capita), while in 1879 the tax was collected on only 53 million gallons (1.09 gallons per capita).

The decade from 1870 to 1879 was further characterized by two periods of disturbance—which ought to be instructive in view of

future legislation—occasioned by an advance in 1873 of the gallon tax from 50 to 70 cents, and again in 1875 from 70 to 90 cents. cases these advances in rates were followed by large annual reductions in the quantity of spirits taxed and in an apparent per capita consumption; which in turn indicated extensive revivals of illicit practices which the reduction of the tax to 50 cents in 1868 had nearly extingnished, and which indications were also made certainties by abundant direct evidence.

The decade of 1880 to 1889 shows, on the other hand, an increase in the aggregate amount paying taxes from 62% million gallons in 1880 (1.23 gallons per capita) to 77½ million gallons in 1889 (1.25 gallons per capita), an aggregate increase approximating a concurrent increase of 22

per cent in the population of the country.

During the fiscal years from 1888 to 1893, inclusive, under a uniform and prospectively stable rate of tax, an apparently good and efficient administration of the law, and a fairly prosperous condition of the country, the results in this department of our national revenues have also been very exceptional and interesting. The continuous increase in production, in per capita consumption, and in revenue, has been remarkable; the average increase of the product paying taxes having been nearly 4,600,000 gallons per annum, or a ratio greater than any concurrent increase in the population of the country; the average per capita consumption nearly one third of a gallon; the average increase in revenue nearly \$5,000,000 (\$4,910,000) per annum; the whole culminating for the last fiscal year (1893) in a product of 99,000,000 gallons; an annual revenue of \$89,000,000, and a per capita consumption of 1.48 gallons of domestic spirits as compared with a per capita consumption in Great Britian in 1890 of all spirits, domestic and foreign, of 1.003 gallons. During these latter years, moreover, the financial troubles and business depressions in Europe and other countries do not appear to have exerted any influence in this particular in the United States.

An influence which has undoubtedly been potent to some extent in recent years in increasing the quantity of spirits which the Government is able to subject to taxation, has been due to the concentration, through the so-called "whisky trust," of the business of distilling in the hands of a comparatively small number of persons operating under conditions most favorable for economic production, and whose interest it is to cooperate with the internal revenue (in preventing illicit distillation) rather than to antagonize it. Such parties also would naturally favor an increase in the existing tax, for the reason that it would advance the

market price of the spirits they have in bond.

Concerning the quantity of domestic spirits paying taxes which are used for industrial purposes in the United States, nothing definite can An investigation made by the Internal Revenue Department be stated. in 1882, in accordance with a resolution of the Senate, indicated an actual consumption for that year for such purposes of 4,209,978 gallons of alcohol, equal to 7,604,000 gallons proof spirits. If these conclusions were approximately correct, a present industrial consumption of the country of 10,000,000 gallons would probably be an over rather than an under estimate.

WHAT SHALL BE THE TAX ON DISTILLED SPIRITS?

The question of next importance is, what, in view of past experiences and present revenue necessities, shall be the policy of the Government in respect to the taxation of distilled spirits? Shall the present rate of 90 cents per proof gallon be retained? Is any immediate change in rate, in the way either of reduction or advance, expedient?

The first or prime cost of spirits depends on the price of grain, especially corn, and is subject to extreme variations. On the average price of the proof gallon in Cincinnati for the year 1889-'90, a tax of 90 cents was at the rate of over 600 per cent. On the average cost in the same market for the year 1891-'92, the same tax was at the rate of over 340 per cent.* Illicit distillation, therefore, as might naturally be expected under the temptations offered by such a rate of taxation, constantly goes on and appears to be on the increase. Thus for the year ending June 30, 1892, the Internal Revenue Department reported a seizure of 852 illicit stills, a number 60 per cent greater than the annual average of the preceding eleven years, or since 1880. Of the 852 stills seized, ten were in the two Northern States of New York and Pennsylvania; one in Michigan, and none reported in Pacific States or any of the Territories; while the remainder, 538 in number, were mainly in the thinly settled and mountainous districts of the States of Kentucky, North Carolina, Alabama, Tennessee, and Virginia. The number of illicit stills that existed during the same year and were successfully operated, doubtless exceeded the number of which the Federal officials were able to take cognizance.

The following statistics in connection with this subject are also sug-In 1860, when there was no Federal taxation of distilled spirits, the whole number of distilleries in the country reported by the census was 1,138. In 1892, with a tax ranging from 340 to 660 per cent on product, the number of distilleries reported as operated was 5,925. For this same year, the Internal Revenue Bureau reports an increase of 2,105 in the number of distilleries operated, as compared with the number operated in 1891. A large majority of this increase was, however, represented by small distilleries producing spirits from fruits. The number of distilleries operated in 1892 in the single State of North Carolina was largely in excess of the number operated during the same time in the whole of Great Britain. The number of distilleries and distillery warehouses under the supervision of the Federal Government in 1892 in the five States of Kentucky, Tennessee, North Carolina, Virginia, and Ohio was also probably greater than are controlled by the Government of Great Britain and by all the leading States of continental Europe.

The conditions under which illicit distillation at the present time is mainly prosecuted in the United States is as follows: In extensive regions of the States above specified, the small farmers, who constitute the bulk of their population, grow little beside corn, and in the absence of railways, and also to a great extent of roads, there is no way for them to bring their surplus grain to any market except in the form of whisky, and, except what may be paid them in cash for the same, handle but very little ready money at any time. The result is that the inhabitants of these sections of the country feel that they have the right (enjoyed by their fathers) to transform their corn into whisky, and that Government acts in a most unjust and tyrannical mauner in seeking to prevent it. Hence the multiplicity of "moonshiners," as illicit distillers are termed, the little rude stills among the mountains, and the murderous assaults on revenue officials who attempt to make arrests and break up the forbidden business.

^{*}These average annual prices represent the extreme variations in the cost of spirits in the Cincinnati market from 1880-'81 to 1890-'91.

Happily all the evidence is to the effect that the territorial area of the United States in which natural conditions may be almost said to render illicit distillation expedient is comparatively limited; while the regular increase in recent years of the tax paying product of distilled spirits in a ratio equal to or in excess of the increase of population is conclusive proof that whatever may be the quantity of illicit product in the entire country it does not materially affect the general aggregate of consumption productive of revenue.

It ought not, however, to require any argument to convince that a minimum tax of 330 per cent on spirits is dangerously near or in excess of the maximum revenue point, and that any increase in the existing rate will favor a recurrence of the disastrous and disgraceful results that characterized the period of experimental taxation in the years immediately succeeding the termination of the war. Certain it is, also, that an anticipation of participation in an increase of the tax would lead to such a production of spirits as to postpone for one or two years any increase of revenue to the Government.* The present stability of conditions is, moreover, a strong argument against any change in the existing tax. For not only is it possible to now tell with approximate accuracy what the revenue from distilled spirits will be in the future, but we may feel sure that it will be more each year than it was the year previous, and this certainty in respect to the productiveness of the one most important source of the national revenue constitutes a great factor of safety in determining what shall be the national expenditure. Thus, taking the per capita consumption of 1892 as the basis for estimate, the revenue that may be anticipated from this source for 1899 with the existing tax will be \$102,000,000, or more than one-half of the present ordinary expenses of the Government.

The following table shows the comparative results of the taxation of the domestic product of distilled spirits in the United States and United

Kingdom:

	•	Population.	Quantity taxed.	Tax per gallon.	Revenue.	Consump- tion per capita.
United States, 1892 United Kingdom, 1892			95, 045, 787 31, 469, 392	\$0.90 2.43	\$85, 541, 209 76, 373, 055	1 ·450 0 ·825

CONCLUSION.

In view of above exhibit of past experiences and the existing situation, can there be a better answer to the question, "Is any change in the present rate of tax on distilled spirits desirable," than that expressed by the old proverb, "Let well enough alone?"

FERMENTED LIQUORS AND TOBACCO.

The following table exhibits in detail the results of the taxation of fermented liquors and tobacco, under the internal revenue system of the United States for each fiscal year since the inception of taxes on the same in 1863 down to and including the year ending June 30, 1893:

^{*}It is admitted that the cause of recent financial embarrassments of the "whisky trust" was overproduction, and that this overproduction in turn was due to an expectation that Congress would increase the tax on spirits.

FERMENTED LIQUORS.

The internal-revenue tax on fermented liquors (beer) has been practically uniform since its first authorization in 1863, namely, \$1 per barrel, holding theoretically 31 gallons. This tax is made payable in stamps, one of which, "denoting the amount of the tax," shall be affixed upon the spigot hole or tap (of which there shall be but one) in such a way that the stamp shall be destroyed upon the withdrawal of the liquor from the barrel or other receptacle.* A deduction of $7\frac{1}{2}$ per cent is allowed to brewers on the purchase of stamps, which is assumed to represent the difference between the theoretical barrel unit of 31 gallons, and the quantity contained in the commercial or trade supply barrel, which, owing to redriving of hoops and repitching, averages from 28 to $28\frac{1}{2}$ gallons. It is obvious, if this deduction is not excessive, that the rate of tax, namely, \$1 for 31 gallons, remains unchanged, and on this basis attention is asked to the following deductions:

A tax of \$1 per 31 gallons is equivalent to 3.225 cents per gallon. On a basis of \$5.25 per barrel, the price at which beer of good quality could be bought in quantity or at wholesale during the past year in the city of New York or vicinity, the present tax is about 20 per cent ad valorem. One barrel of 31 gallons equals 248 pints or 496 half-pints, the present tax is, therefore, one fifth of a cent per half-pint, or per glass as usually sold in saloons for 5 cents; or two-fiftns of a cent per pint.

^{*} Revised Statutes, section 3342, p. 655.

In recent years some of the large industrial establishments of the country have made a practice of furnishing their employés with beer of a good quality at a price but little in excess of the cost of production and distribution. In such cases the beer is sold by weight, a pint being regarded as equal to a pound, and a pound as equal to two glasses such as are usually sold in the saloons. From 26 to 30 tickets, each representing 1 pound of beer, are usually sold for \$1, which makes the average cost to the local consumers of from 12 to 13 cents for a full glass or half pound of beer, and which charge is represented by those competent to express an opinion, as sufficient to cover the wholesale price and entire cost of distribution, labor, ice, rent, and light, and leave a fair profit.

The points of interest made apparent in the foregoing tabular exhibit,

and to which attention is especially asked, are as follows:

(1) The regular and great increase in the quantity of fermented liquors annually made subject to internal-revenue taxation, i. e., from 62,205,375 gallons in 1863 to 1,071,183,827 gallons in 1893, and an increase in per capita consumption very far in excess of the rate of increase in population, i. e., from 1.86 gallons in 1863 to over 16 gallons in 1893.

(2) The concurrent regular increase in revenue from this source, i. e.,

from \$1,558,000 in 1863 to nearly \$32,000,000 in 1893.

• (3) As large and costly plants are essential for the manufacture of fermented liquors on a large scale and at the lowest cost, illicit production is thereby rendered difficult, if not impossible, and whatever of fraud upon the revenue exists in this business is undoubtedly referable to the nonuse or noncancellation and reuse of the stamps which represent the prepayment of the tax as a condition of sale and consumption.

(4) The variations in the product of fermented liquors which the Government has been able to annually subject to taxation since 1863 has been inconsiderable and in remarkable contrast to those occurring in the case of distilled spirits. Besides depression from 1874 to 1879 and for the year 1884 appears to have been influential in checking per capita consumption, though in a small degree, and to have exerted little or no influence in the other years of the three decades that are subject to analysis; results indicating that similar larger and contemporaneous decrements in consumption and revenue in the case of distilled spirits were due to fraudulent practices rather than to an impairment of ability

to consume on the part of the masses.

(5) The average annual increase in the receipt of internal revenue from fermented liquors for the ten years from 1883 to 1892 was \$1,306,057, and for the four years ending with the fiscal year 1893, about \$1,617,000. That this latter ratio of annual increase under the present rate of tax is likely to indefinitely continue is almost demonstrated by the fact that the popularity of fermented or "malt" liquors as beverage among the American people is unquestionably increasing; and also, that large, seemingly, as is their present average per capita consumption—namely, 16 gallons—the present per capita consumption of the people of several other nationalities is much greater; that of the United Kingdom being estimated at 30 gallons; of England and Wales, 36; of Belgium, 40; and of Germany, 45.

Attention here is also asked to another point of fiscal importance. If it becomes desirable at this or any other time for the United States to materially increase its annual revenue by additional taxation, such a result can not be attained more certainly and with so little of expense, effort, or industrial friction, as by a moderate increase of the tax on fermented liquors. The existing tax (20 per cent ad valorem) is lower than upon almost any other industrial product entering largely into domestic consumption. Spirits, paying, for example, from 340 to 660 per cent internal tax; manufactured tobacco, 129 per cent, customs duty; pig iron, 30 per cent; steel, 25 to 50 per cent; wool, 24 to 100 per cent, and the like.

The business of brewing malt liquors is acknowledged to be one of the most successful of domestic industries, and financial participation in it has in recent years been regarded by foreign capitalists as one of the most attractive of American investments. It is also reasonably certain that in the distribution of industrial products for consumption there is no branch of business that returns a larger profit on the labor and capital employed than the retailing of malt liquors, a small retail store often supporting a large family, besides paying high Federal and State The data already submitted, and which are believed to be reliable, show that beer can be retailed at a profit for 13 cents per glass of a half pint, on which the present tax is one-fifth of a cent, yielding a present revenue of about \$32,000,000 per annum. An increase on present rate of tax, i. e., from \$1 to \$2 per barrel of 31 gallons, or from one fifth to two-fifths of a cent per half pint glass, might be reasonably expected to at once yield \$32,000,000 additional per annum, bringing up the present annual revenue from this source to \$64,000,000, with a prospective annual increase of \$3,000,000; and this without increasing the cost of his beer to the individual consumer or materially diminishing the profits of the brewer or the wholesale or retail dealer.

TOBACCO.

The tabular exhibit of the tax experiences of the internal revenue in respect to tobacco shows the annual receipts and their per capita apportionment on the population of the country from the inception of the taxation on this commodity in 1863, down to and including the fiscal year 1893:

The consumption of tobacco in all its forms by the people of the United States, taking the data collected by the Internal-Revenue Department as the basis of estimate, was for the year 1892 about 4 pounds per capita. The number of cigars and cheroots taxed for this same year was

returned at 4,548,799,417.

As a basis for the obtaining of revenue, the comparative per capita consumption of tobacco in other countries is especially worthy of attention in this connection. For the United Kingdom, the amount for 1891, officially reported, was 1.61 pounds; France (estimated) 1½ pounds; for the population of the city of Paris, 3½ pounds; Germany, 4½ pounds; Belgium and Holland, 3½ pounds. The annual consumption of tobacco in the United States is therefore certainly much greater than in most other countries, and is equaled in not more than one or two. This result may be referred to several agencies; to the greater cheapness of the taxed commodity; to greater ability on the part of the masses to consume it, and to a larger use of tobacco for chewing,* the quantity manufactured for this purpose in 1891 being returned at 183,147,000 pounds as compared with 76,708,000 manufactured for smoking.

From 1863 to 1869 the variations in the annual internal revenue receipts from tobacco (always in the way of increase) were very great, and, as it were, spasmodic, and were due mainly to frequent changes in the rate of tax on the different forms of tobacco. During this same period occurred one of the most remarkable illustrations to be found in

^{*}In France the sales of tobacco in 1885 were returned at 700,000 kilograms for "chewing," and 15,400,000 for smoking.

fiscal history of the influence of a tax reduction in increasing the taxed consumption of a comparatively cheap commodity in general use. in 1866, with a uniform tax of \$10 per thousand on cigars, only 347, 443,894 were returned by manufacturers for taxation, while in 1869, under a uniform tax of \$5 per thousand, 991,335,934 were returned, or nearly three times the quantity.

The business depression from 1874 to 1879 appears to have had an influence in checking the popular consumption of tobacco, though in a lesser degree than in the case of distilled spirits or fermented liquors. From 1870 to 1882 the ratio of annual increase in the taxed product of domestic tobacco was greater on the average than the corresponding ratio of increase in the population of the country (which was not the case with distilled spirits), and the total internal revenue collected from this source attained the large aggregate in 1882 of \$47,391,989.

In 1883 the rates of tax on all forms of domestic tobacco and the special taxes on dealers and manufacturers of the same were reduced fully 50 per cent. This reduction of tax caused an immediate reduction of revenue, comparing the receipts of 1882 with those of 1884 the first full year of reduced rates, to the extent of \$21,329,589. This reduction of over 50 per cent in rate of tax, resulted in a smaller proportional reduction of revenue—i. e., of about 45 per cent. In 1886 the tax on cigars was reduced 50 per cent, and in 1890 the taxes on snuff, chewing and smoking tobacco 25 per cent. At this latter date all special taxes relating to tobacco—i. e., licenses to manufacturers, dealers, etc., were also entirely repealed. The annual reduction in revenue in consequence of these last abatements, comparing the receipts for 1890 with those for 1892, was nearly \$3,000,000, notwithstanding an increase in population during the same period of 2,897,750. The internal revenue from tobacco for the fiscal year 1893 was about \$31,890,000. Had the taxes on tobacco existing in 1882 been allowed to remain unchanged, the annual revenue from this source (the increase of population being taken into account) for the fiscal year 1894 would not be less than \$60,000,000.

The United States internal-revenue taxes on tobacco are smaller than those imposed by any other country that seeks to make this commodity a leading source of revenue. In the year 1892 they amounted to 49 cents per capita as compared with 90 cents in 1882. The duties collected on imports of tobacco for 1892 were \$10,265,067 as compared with \$16,172,277 for 1891, and the total customs and internal revenue yielded by tobacco during the fiscal year 1892 was about \$42,000,000,

or 63 cents per capita.

In 1891 the taxes on tobacco in the United Kingdom, excise and customs, were \$1.30 per capita on a population of 37,795,283, and yielded

a revenue of \$49,015,000.

In France the taxes on tobacco are reported at \$1.71 per capita on a population of 38,283,000, yielding an annual revenue of about \$65,000, In other European countries the per capita taxes on tobacco are reported as follows: Austria, \$1.31; Germany, \$1.30; Italy, 94 cents; Hungary, 79 cents.

Were the same ratio of taxation on tobacco as exists to day in the United Kingdom established in the United States, the annual revenue accruing to the Federal Treasury at the present time would be \$55,000,-000. If the rates existing in France were adopted, the annual revenue

from this source would be \$112,000,000.

Whatever may have been the considerations that prompted in recent years the abatement of this important source of national revenue in the United States, it is certain that they were not based on any sound financial policy or on any lesson of past experience in respect to the best methods of raising revenue. Taxes on tobacco are taxes on a typical luxury. Their payment is not obligatory, as are the taxes on the essentials of living, on any citizen, but are in the nature of a voluntary assessment on the part of the consumer, on whom the entire burden of the tax ultimately rests, and which payments may be properly regarded as representing his surplus income. They are not obstructive to the development of any other industrial product, and there is no evidence that the highest rate ever assessed under the internal revenue has ever been productive of general discontent on the part of the masses of the American people.

CONCLUSION.

A consideration of the tax experiences and conditions as above presented ought to be in the highest degree instructive as to the elements of financial strength that at present characterize the Government of the In all civilized nations at the present time the production and consumption of spirits, fermented liquors, and tobacco are recognized as the most legitimate and productive sources from which revenue can be obtained with the minimum of expense and industrial The factors determinative of the productiveness and continued increase of revenue from these sources are mainly two, namely, continued increase of population and continued or increasing ability on the part of the masses to consume. These factors are more influential at the present time in the United States than in any other nation. We are increasing in population in a greater annual ratio than any other country of which we have any definite information. Our ability to consume, owing to the rapid accumulation and distribution of wealth among the masses, is far greater than that in any other nation. mercial disturbances and business depressions, which are potent in all other countries in reducing the consumption of luxuries, appear to have comparatively little effect in the United States, and are not of long continuance.

The wisest fiscal policy for the Federal Government, certainly for the inmediate future, would therefore seem to be to impose the maximum rates of taxation on distilled spirits, fermented liquors, and tobacco, that will not create, in face of efficient administration and severe penalties, undue temptations for revenue evasions. A government that disregards this line of wise expediency to a greater or less degree invariably cheats In the case of distilled spirits, on which the existing rate under the most favorable condition of production is always in excess of 300 per cent on their first cost, or taxable unit, this line seems to have been absolutely ignored; but as the experience of recent years shows that the revenue from this source is increasing in a ratio equal to or in excess of the increase of population, and the amount of illicit product comparatively small, any change in the present tax would seem clearly inexpedient. On the other hand, in the case of fermented liquors and tobacco, the existing taxes are far below the safe line of expediency, and might be advanced—i. e., to the extent of \$1 per 31 gallons, or one-fifth of a cent on the half-pint-in respect to the former, and in the latter at least to the rates imposed in 1882, with great advantage to our national revenue and to a greater simplification of our whole fiscal system. Certainly, if additional revenues to meet present existing and extraordinary require ments for expenditures are needed, it would be difficult to show where an immediate annual increment—with a certain large annual increase of

the same in the future-could be obtained with less of expense and

popular friction than by the tax modifications suggested.

The existing customs duties on the imports of spirits, fermented liquors, and tobacco, are exceedingly high and absurdly disproportionate to the corresponding internal-revenue taxes on the same, and can undoubtedly be modified to some extent to the advantage of the revenue. Thus, on imported spirits, the duties are \$2 per proof gallon and the internal-revenue tax 90 cents; on fermented liquors the relative rates are 20 cents and 3\frac{2}{2} cents per gallon; and on snuff, chewing and smoking tobacco, 50 and 40 cents and 6 cents, respectively. In the United Kingdom, where the productivity of taxes has been carefully studied, the customs duties exceed the excise (internal revenue) taxes upon beer by 6d. (12 cents) on 36 gallons, and upon spirits by 4d. (8 cents) per proof gallon. One effect of the maintenance of our excessively high duties on imported spirits is, that a greater opportunity is offered to combinations (trusts) of domestic producers to advance the price to domestic consumers; and another is, that they encourage the domestic manufacture from cheaper materials of imitations of foreign spirits, whereby the American consumer is induced to use a spurious in place of the genuine article, and the Government is defrauded of the difference in relative taxation, and this amount is believed to be very considerable.

WHAT THE NATIONAL REVENUE FROM SPIRITS, FERMENTED LIQUORS, AND TOBACCO ANNUALLY IS AND WHAT IT MIGHT BE WITH CERTAIN MODIFICATIONS OF EXISTING TAXES.

The following is an exhibit of the receipts of revenue from spirits, fermented liquors, and tobacco for the year ending June 30, 1893, and what might be anticipated from the same sources with the modifications of taxation thereon, as suggested:

	Existing taxes.	Proposed taxes.
INTERNAL REVENUE.* Distilled spirits Formented liquors Tobacco	Dollars. 95,000,000 32,000,000 32,000,000	Dollars. 95, 000, 000 64, 000, 000 60, 000, 000
Total	. 159, 000, 000	219, 000, 000
Spirits, wines, and beers	22, 000, 000	10, 000, 000 ‡ 16, 000, 000 26; 000, 000 245, 000, 000

^{*}Owing to existing industrial and financial conditions no material increase in the revenues from spirits, fermented liquors, and tobacco for the current fiscal year is anticipated.

†Partly estimated.

The normal expenditures of the Federal Government for the fiscal year ending June 30, 1894, were estimated by Secretary Foster at \$169,049,571.* Including an estimate for interest on the public debt of \$26,771,293, the total aggregate expenditure for the year, exclusive of pensions, will approximate \$195,810,754.

*Civil service (less bounty on sugar)	\$90, 483, 670
Army	43, 394, 192
Navy	25, 083, 498
Indians	10, 083, 211
Total	. 169, 049, 571

The customs revenue from tobacco in 1891 was \$16,172,277.

It is therefore obvious that from taxes judiciously imposed on only three commodities or branches of industry the Federal Government can at the present time certainly, economically, and with less burden and disturbance to its people than by any other form of levy, collect an annual revenue sufficient to defray all of its ordinary expenditures, including interest on all its debts, and have in addition an annual surplus of near \$50,000,000, leaving its total revenue from other sources—i. e., import duties, less those collected from spirits, beer, and tobacco, and receipts from permanent miscellaneous sources aggregating about \$9,000,000, available for the payment of pensions and for other purposes.

It is safe to assert that in all financial history no parallel can be found for such an exhibit of the finances of a great nation. The assertion is also warranted that no greater degree of intelligence and honesty on the part of legislators and administrators is needed to free the financial policy of the United States from all possibilities of popular distrust or disturbance than would be requisite for the successful management of the most

ordinary manufacturing, banking, or commercial enterprises.

I am yours, most respectfully,

DAVID A. WELLS.

Hou. J. G. CARLISLE, Secretary of the Treasury.

Letter of Hon. Joseph S. Miller, Commissioner of Internal Revenue, to Hon. John G. Carlisle, Secretary of the Treasury.

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
Washington, August 16, 1893.

SIR: In accordance with your suggestion, I have considered the question of raising additional revenue by increasing the rates of internal taxes on articles and occupations now subject to tax.

Attention has especially been given to the question of increasing the rates of tax on distilled spirits, fermented liquors, and manufactured tobacco, cigars, and cigarettes, all of which are now taxable and which have during recent years yielded about 99 per cent of the internal revenue.

The following table shows the percentage derived from each and all of these three sources during the last two fiscal years:

,	÷ •		Perce	Percentage.	
. · · · · · · · · · · · · · · · · · · ·	Article.		1892.	1893.	
Distilled spirits	tés		59. 347 20. 149 19. 523	58. 831 19. 807 20. 217	
Total	••••••	••••••	99. 019	98. 855	

The figures for previous fiscal years since 1883 give the same aggregate but the percentages derived from each vary. The average percentage of collections on spirits for the nine years ended June 30, 1892 was 58.223, and it has uniformly since 1868 been the leading source of internal revenue. During the first seven fiscal years after the tax was raised to 90 cents per gallon the average percentage from this source was 47.722. In 1883 it was 51.232, and since 1883 it has never been less than 55 per cent of the whole amount collected in any one fiscal year.

On the day, March 3, 1875, that the tax on distilled spirits was fixed at 90 cents per gallon, the tax on manufactured tobacco, including snuff, was raised from 20 cents per pound to 24 cents per pound. This

rate continued for fifty months, or until May 1, 1879, when the rate of tax was reduced from 24 cents to 16 cents per pound, the tax at 16 cents continuing for forty eight months, or until May 1, 1883, when it was reduced to 8 cents per pound. It remained at 8 cents per pound for ninety-two months, or until January 1, 1891, when, under the tariff act of October 1, 1890, it was reduced to the rate now in force, i. e., 6 cents per pound.

The tax on cigars and cigarettes has also fluctuated since March 3, Under the operation of the act of that date, on and for ninetyeight months after May 1, 1875, the tax on cigars and certain large cigarettes was \$6 per thousand and, on all other cigarettes \$1.75 per

thousand.

On May 1, 1883, and since, i.e., one hundred and twenty-two months, to July 1, 1893, it was and now is \$3 per thousand as to cigars and cigarettes weighing more than 3 pounds per thousand, and 50 cents per thousand as to cigarettes weighing not more than 3 pounds to the thousand.

The frequent changes in the rates of tax on tobacco, cigars, and cigarettes as above shown make it difficult to institute comparisons between the percentages at the different rates and the uniform rate of tax on distilled spirits. The problem is still further complicated by changes in the rates of special taxes on dealers in tobacco and cigars, and the final abolition by the tariff act of October 1, 1890, of all special taxes on the manufacture and sale of tobacco.

The best opportunity for comparison is found during three certain

periods, as follows:

1. During the years 1876, 1877, and 1878, when, with the tax on tobacco and snuff at 24 cents per pound, on cigars at \$6 per thousand, and on cigarettes at \$1.75 per thousand, the percentages of receipts from tobacco were 33.944, 34.544, and 36.086, respectively, the percentages. for spirits being for the same years 48.130, 48.295, and 45.382, respectively,

2. During the three fiscal years 1880, 1881, and 1882 the tax on tobacco was 16 cents per pound, that on cigars \$6 per thousand, and that on cigarettes \$1.75 per thousand. The percentages of receipts From tobacco, in 1880, 31.217; in 1881, 31.526, and in 1882, 32.219, while the percentages from spirits were as follows, viz: 1880, 49.138 per cent; 1881, 49.458 per cent, and 1882, 47.502 per cent.

3. During the years 1884 to 1890, both inclusive, uniform rates prevailed as to tobacco, cigars, and cigarettes, as follows: Tobacco, 8 cents per pound; cigars, \$3 per thousand, and cigarettes, 50 cents per thou-During these years the rate of tax on distilled spirits continued at 90 cents per gallon, and the tax on fermented liquors was \$1 per The percentages of collections during this period from these three principal sources were as follows:

TABLE OF PERCENTAGES OF INTERNAL-REVENUE RECEIPTS.

Year.	Spirits.	Tobacco.	Fer- mented liquors.
1884 1885 1886 1887 1888 1888 1889	59. 102 55. 394 55. 745	21. 431 23. 489 23. 872 25. 335 24. 663 24. 345 23. 815	14. 871 16. 216 16. 832 18. 447 18. 760 18. 124 18. 239

More exactly, 92½ cents per barrel, 7½ per cent being allowed on sale of beer stamps.

Upon inspection of the above table the question naturally arises, Why is there not a uniform increase in the collections from each source of revenue in accordance with the increase in the population of the country? An answer may be found in the spirits column and the variations there are largely due to the requirement of section 3293, Revised Statutes as amended, to the effect that the spirits which must be deposited in a distillery warehouse must be withdrawn tax paid within three years from the date of the warehousing bond.

In the years 1884 and 1885 taxes thus became due on an unusual quantity of distilled spirits, and these spirits were withdrawn in consequence of the three year limitation and without regard to the demand for consumption. Many thousands of barrels were, in order to comply with the conditions of the bonds, also withdrawn for export and were exported and in subsequent years returned to the United States to compete for a market with the spirits withdrawn from distillery warehouses during those years. Thus overproduction in years of plenty has operated to depress the receipts from spirits in subsequent years in a twofold manner.

The same disturbing elements now prevail. During the years 1890, 1891, 1892, and 1893 there has been a steady increase in the withdrawals of tax paid spirits, largely due to heavy production during the years 1887, 1888, 1889, and 1890, respectively. When, as may happen any year, the tax paid withdrawals fall off, the casual observer may attribute the decrease to fraud when it may be due to the light product of the

third year preceding.

Great caution should be used in comparing statistics from census reports with those from other sources, and equal caution should be used in accepting conclusions based on such comparisons. Caution should also be used in accepting statements in regard to the rate of tax on distilled spirits. The tax on distilled spirits fixed by the act of July 20, 1868, was about 70 cents per gallon, not 50 cents, as may

appear to one who has not closely examined the law.

When by the act of June 6, 1872, (17 Stat., p. 238), the tax to be paid upon the withdrawal of spirits from the distillery warehouse was fixed at 70 cents per gallon, the distiller was relieved from the payment of the tax of 10 cents per gallon which had theretofore been assessed, and he was also relieved from paying the storekeeper and the gauger the amount paid to these officers, this amount at that time being a sum nearly equal to a tax of 10 cents per gallon.

It is not true therefore that the tax on distilled spirits was actually

increased by the act of June 6, 1872.

Nor is it true that the frauds discovered in 1875 were occasioned by the act of March 3, 1875 (18 Stat., p. 339), increasing the tax to 90 cents per gallon. Although extensive frauds were unearthed just after the passage of that act, it is a fact that through a conspiracy with United States officers these frauds had been in progress for a considerable time before its passage.

The present method of collecting the tax on distilled spirits has been in existence twenty five years, and it is by far much superior to the systems devised to collect the tax on tobacco or on fermented (malt) liquors. It is not necessary to infer that, because during the experimental years prior to 1868 the two-dollar spirit tax was only partially collected, a two-dollar tax can not be collected now, when a very differ-

ent state of affairs exists.

It does not appear to be logical to conclude that the two-dollar rate, or any rate higher than 90 cents per gallon, is a higher rate than can

be collected from spirits when it is true that during the first year, 1863, this office failed to collect the tax at 20 cents per gallon.

My conclusion in this matter is that a moderate increase in the rate of tax on all articles (except oleomargarine) now taxed under internal-revenue laws, would result in a corresponding increase of the revenue. Respectfully, yours,

Jos. S. MILLER, Commissioner.

Hon. J. G. CARLISLE, Secretary of the Treasury.
